

HOUSE No. 726

The Commonwealth of Massachusetts

In the Year Two Thousand Nine

An Act Relative to Producer Responsibility for Mercury-Added Lamps..

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

1 SECTION 1. Section 6J of Chapter 21H of the General Laws, as appearing in the 2006
2 Official Edition, is hereby amended by striking subsections (d), (e), and (f) and inserting in their
3 place thereof the following subsections:

4 (d) (1) Effective January 1, 2011, each manufacturer of a mercury-added lamp
5 offering for sale or distribution mercury-added lamps in Massachusetts shall, individually or
6 collectively, implement a department approved mercury-added lamp recycling program for
7 lamps sold or distributed in Massachusetts for household use.

8 (2) The recycling program required under subparagraph (1) shall include the following
9 elements:

10 (i) Convenient collection locations throughout the state where reasonable operation costs
11 are provided by the manufacturer and where mercury-added lamps can be deposited for recycling
12 at no charge to the household consumer;

13 (ii) Handling and recycling equipment and practices in compliance with all applicable
14 law;

15 (iii) Effective education and outreach, including but not limited to point of purchase
16 signage and other materials provided to retail establishments without cost;

17 (iv) Reporting to the department by February 15 of each calendar year the number of
18 lamps recycled under the program in the previous calendar year, the estimated number of out-of-
19 service mercury-added lamps in the previous calendar year, the methodology for estimating the
20 number of out of service mercury-added lamps previously approved by the department following
21 the solicitation of public comment, an evaluation of the effectiveness of the program,
22 recommendations for increasing the number of lamps recycled under the program, and an
23 accounting of the costs associated with administering and implementing the recycling program.

24 (3) Each manufacturer required to implement a recycling program under paragraph (1)
25 shall submit its proposed program for department review and approval by January 1, 2010. The
26 department shall solicit public comment on the proposed program before approving or denying
27 the program.

28 (4) Beginning April 1, 2011, a manufacturer not in compliance with this section is
29 prohibited from offering any mercury-added lamp for final sale in the state, or distributing any
30 mercury-added lamp in the state. A manufacturer not in compliance with this section shall
31 provide the necessary support to mercury-added lamp retailers to ensure the manufacturer's
32 mercury-added lamps are not offered for sale, sold at final sale, or distributed in the state.

33 (5) No mercury-added lamp wholesaler shall sell mercury-added lamps unless the
34 wholesaler informs the purchaser in writing on the invoice or another separate document that the

35 lamps contain mercury and that the lamps are prohibited from placement in a solid waste landfill
36 or combustor. Retail establishments that incidentally sell mercury-added lamps are exempt from
37 the requirements of this subsection.

38 (6) Any contractor who removes mercury-added lamps shall inform the person for whom
39 the work is being done:

40 (i) That a removed mercury-added lamp contains mercury; and

41 (ii) How the removed mercury-added lamp should be discarded.

42 (7) A mercury-added lamp retailer shall not offer for final sale a mercury-added lamp
43 produced by a manufacturer not in compliance with this section. The department shall notify
44 retailers of any manufacturers of mercury-added lamps deemed not in compliance with section.

45 (8) Recycling goals of 30% in 2009, 40% in 2010, 50% in 2011, 60% in 2012, and 70%
46 thereafter are hereby established for the mercury-added lamp recycling program in
47 Massachusetts.

48 (e) (1) Beginning on April 15, 2012, and annually thereafter, the department shall
49 report to the house and senate committees on ways and means on the progress made in achieving
50 these recycling goals, modifications (if any) to the program it intends to require in the
51 manufacturer programs as needed to improve lamp recycling rates, and recommendations (if
52 any) for statutory changes needed to facilitate mercury-added lamp collection and recycling.

53 (2) The report for calendar year 2012 shall include:

54 (i) An estimate of the number of lamps recycled and the recycling rate for mercury-
55 added lamps from small businesses over each of the last three years;

56 (ii) Proposed goals for the recycling of mercury-added lamps from small businesses
57 reasonably consistent with the goals in this section for households;

58 (iii) A comprehensive strategy for meeting the proposed recycling goals;

59 (iv) Any proposed statutory changes recommended as necessary to implement the
60 strategy proposed in the report;

61 (v) The availability of non-mercury lamps to replace mercury-use lamps and any
62 legislative changes as appropriate to reduce mercury use in lamps.

63 (f) The department shall review the standards of mercury content for lamps of the several
64 other states, and subsequent to said review the department shall adopt, implement, and enforce
65 mercury content standards for lamps. The department may adopt rules minimizing the mercury
66 content of lamps within various categories, including adoption of a no mercury standard where
67 non-mercury alternatives are available at comparable cost.

68 (1) Procurement of low mercury lamps. It is the policy of the state to promote the
69 manufacture of lamps containing the lowest possible mercury content while maximizing energy
70 efficiency and lamp life by purchasing lamps with such attributes and providing information to
71 other large purchasers of lamps.

72 (i) When purchasing lamps for use in state buildings, the commissioner of buildings and
73 general services shall request from potential suppliers information about mercury content, energy
74 use, and lamp life. The commissioner of buildings and general services shall purchase lamps
75 with the lowest possible mercury content. The commissioner of buildings and general services
76 shall make available to the public information obtained under this subsection on the mercury

77 content, energy use, and lamp life of lamps. When purchasing lighting or lamps, the agency shall
78 comply with those requirements that the commissioner of buildings and general services is
79 subject to.
