5 communities. Said plan shall seek, to the extent possible, to facilitate the continued economic

7 continuing efforts by the federal and state government to rebuild fish stocks and maximize the
8 socio-economic benefit derived from those stocks. The plan developed pursuant to this section
9 shall be fair and equitable with regard to geographic locations and gear sectors within the
10 commercial fishing industry.

22 that such equipment is acquired by and installed aboard a vessel having its principal port in the
23 Commonwealth as documented by federal and state permits for participation in commercial
24 fisheries.

25 The modification, repair, or other improvement of a commercial fishing vessel
26 with its principal port in the Commonwealth, as documented by federal and state permits for
27 participation in commercial fisheries, and which shall have a reasonably expected useful life of
