By Ms. Provost of Somerville and Senator Jehlen, a joint petition (accompanied by bill, House, No. 1050) of Denise Provost and others relative to mammography services and breast cancer early detection for medical assistance recipients. Health Care Financing.

The Commonwealth of Alassachusetts

In the Year Two Thousand Thirteen

An Act relative to breast cancer early detection.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

Section 10D of Chapter 118E of the general laws is hereby amended by adding the
 following subsection:-

3 (b) Every provider of mammography services shall, if a patient's mammogram reveals
4 dense breast tissue, as determined by the interpreting physician based on standards promulgated
5 by the American College of Radiology, provide notification to such patient that shall include at
6 minimum the following information:

7 1) That the patient's mammogram shows dense breast tissue.

8 2) That dense breast tissue is common and not abnormal, but that dense breast tissue may 9 increase the risk of breast cancer.

3) That dense breast tissue can make it more difficult to find cancer on a mammogram,and that sometimes additional testing is needed for reliable breast cancer screening.

4) The interpreting physician's determination whether or not additional testing is
recommended for the patient. If additional testing is recommended, then the interpreting
physician shall make or note the need for an appropriate referral.

5) That under the Massachusetts Patient's Bill of Rights, the patient has the right to
discuss the results of the patient's mammogram with the interpreting radiologist or the referring
physician.

6) That a report of the patient's mammogram has been sent to the referring physician, andwill become part of the patient's medical record.
