

# SENATE . . . . . No. 1592

---

## The Commonwealth of Massachusetts

PRESENTED BY:

***Barry R. Finegold***

*To the Honorable Senate and House of Representatives of the Commonwealth of Massachusetts in General Court assembled:*

The undersigned legislators and/or citizens respectfully petition for the adoption of the accompanying bill:

An Act relative to a microgrid pilot program.

PETITION OF:

NAME:	DISTRICT/ADDRESS:
<i>Barry R. Finegold</i>	<i>Second Essex and Middlesex</i>
<i>Marcos A. Devers</i>	<i>16th Essex</i>

# SENATE . . . . . No. 1592

---

By Mr. Finegold, a petition (accompanied by bill, Senate, No. 1592) of Barry R. Finegold and Marcos A. Devers for legislation relative to a microgrid pilot program. Telecommunications, Utilities and Energy.

---

## The Commonwealth of Massachusetts

An Act relative to a microgrid pilot program.

*Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:*

1           SECTION 1. Chapter 25A of the General Laws is hereby amended by inserting after  
2 section 11I the following section:-

3           Section 11J. (a) As used in this section, the following words shall, unless the context  
4 clearly requires otherwise, have the following meanings:-

5           "Critical facility", any hospital, police station, fire station, water treatment plant, sewage  
6 treatment plant, public shelter or correctional facility, any commercial area of a municipality, a  
7 municipal center, as identified by the chief elected official of any municipality, or any other  
8 facility or area identified by the department as critical;

9           "Distributed energy generation", the generation of electricity from a unit with a rating of  
10 not more than 65 megawatts on the premises of a retail end user within the transmission and  
11 distribution system;

12           "Microgrid", a group of interconnected loads and distributed energy resources within  
13 clearly defined electrical boundaries that acts as a single controllable entity with respect to the  
14 grid and that connects and disconnects from such grid to enable it to operate in both grid-  
15 connected or island mode.

16           (b) The department shall establish a microgrid grant and loan pilot program, subject to  
17 appropriation, to support local distributed energy generation for critical facilities. The  
18 department shall develop and issue a request for proposals from municipalities, electric  
19 distribution companies, participating municipal lighting plants and private entities seeking to

20 develop microgrid distributed energy generation, or to repurpose existing distributed energy  
21 generation for use with microgrids, to support critical facilities. Any entity eligible to submit a  
22 proposal pursuant to this section may collaborate with any other such entity in submitting such  
23 proposal.

24 (c) The department may award grants or loans under the microgrid grant and loan pilot  
25 program to municipalities, electric distribution companies, participating municipal lighting plants  
26 and private entities. Such grants and loans shall only be used to provide assistance to recipients  
27 for the cost of design, engineering services and interconnection infrastructure for any such  
28 microgrid. The department may establish any financing mechanism to provide or leverage  
29 additional funding to support the development of distributed energy generation and microgrids  
30 that is not limited to the cost of interconnection infrastructure.

31 (e) On or before January 1, 2014, the department shall file a report the clerks of the  
32 senate and the house of representatives, the joint committee on telecommunications, utilities and  
33 energy and the senate and house committees on ways and means identifying other funding  
34 sources necessary to expand the microgrid grant and loan pilot program established pursuant to  
35 this section and any legislative changes necessary to access such funding.

36 (f) The department shall study the methods of providing reliable electric services to  
37 critical facilities, taking into consideration the location of such critical facilities. Such study shall  
38 evaluate the costs and benefits of such methods, including, but not limited to, the use of  
39 microgrids, undergrounding and portable turbine generation, and shall make recommendations  
40 identifying the most cost-effective and reliable of such methods. Not later than January 1, 2014,  
41 the department shall submit the findings of such study to the clerks of the senate and the house  
42 of representatives, the joint committee on telecommunications, utilities and energy and the senate  
43 and house committees on ways and means.
