Any limitations imposed under the plan for acute care treatment or post-acute care treatment must be separately stated in the plan.

(4) Except as provided by Subsection (c), a health benefit plan must include the same payment limitations, deductibles, copayments, and coinsurance factors for coverage required under this chapter as applicable to other similar coverage provided under the health benefit plan.

The term includes precertification, certification, recertification, or any other activity that involves providing a reliable representation by the issuer to a physician or health care provider.

(2) The commissioner by rule shall require a health benefit plan issuer to provide adequate training to personnel responsible for preauthorization of coverage or utilization review under the plan. The purpose of the training is to prevent denial of coverage in violation of Chapter 175, Section 47EE(b) to avoid confusion of medical benefits with mental health

The person must make the request or submit the appeal in the manner prescribed by the terms of the plan's health insurance policy or agreement, contract, evidence of coverage, or similar coverage document. To comply with the requirements of this section, the health benefit plan issuer must respond through a direct telephone contact made by a representative of the issuer, and in writing to the person requesting review.

(f) Treatment Facilities

(1) A health benefit plan may not deny coverage under this chapter based solely on the fact that the treatment or services are provided at a facility other than a hospital.
