**ANNUAL REPORTS  
2014**

## **Introduction**

The Department of Public Utilities (“Department”) has a dual role of ensuring that regulated industries provide quality service at reasonable rates and promoting public safety. Public safety, particularly in the natural gas pipeline and transportation industries, is the Department’s most important responsibility.

The Department is overseen by a three-person Commission appointed by the Governor. The Governor designates one of the Commissioners as Chairman. The Department's responsibilities include establishing rates and ensuring service quality for the investor-owned electric power, natural gas, and water industries; regulating safety in the transportation and gas pipeline areas; and for the siting of energy facilities. The Department does not regulate municipal electric companies or public water authorities.

Highlights from 2014 include: (1) The Department issued orders in June and November on grid modernization and time varying rates that, among other things, will require the electric distribution companies to file 10-year grid modernization plans by August 2015; (2) In response to high basic service prices for the winter of 2014-2015, the Department worked with stakeholders to develop short-and long-term strategies to alleviate impacts to ratepayers, including energy efficiency and competitive supply options; (3) The Department revised its service quality standards and guidelines, which are the performance measures by which the utilities are evaluated; (4) The Department’s Pipeline Engineering and Safety Division received 828 reports of possible Dig Safe violations and, after investigation, issued 834 Notices of Possible Violation and collected \$1,148,000 in civil penalties; and (5) Pursuant to G.L. c. 164, §145, gas distribution companies began submitting their plans to accelerate replacement of aging or leak-prone natural gas infrastructure. Plans filed with the Department by October 31, 2014 must be reviewed, and their costs pre-approved for recovery, by the Department by May 1, 2015.

This report summarizes the responsibilities of the various divisions within the Department, provides information regarding the day-to-day functions of the agency, and outlines the major activities and accomplishments during 2014.

## **Consumer Division**

### **Mission**

The Consumer Division is the Department's primary link with utility customers. The Consumer Division works to ensure that customers, utilities, and the public receive fair and equitable treatment through education, complaint resolution, and evaluation of utility compliance with consumer protection rules and policies. The Consumer Division educates the public and utilities about customer rights and responsibilities and other utility-related customer issues, investigates and resolves disputes between customers and utilities, and evaluates utilities' compliance with the Commonwealth's statutes, Department regulations, Orders, and the utilities' terms and conditions for service. The Consumer Division conducts informal hearings as appropriate to try and resolve customer complaints against their respective utility companies.

### **Responsibilities**

#### **Investigation and Resolution of Customer Complaints**

The Consumer Division is available to assist customers in resolving problems they are having with their providers. Most complaints are made by phone, but also by mail, email, and via the Department's website. The majority of the complaints concern billing disputes, credit issues, or poor quality of service allegations. In those cases in which the utility company is found to be at fault, the Consumer Division will order the company to correct the problem, and to make any necessary bill adjustments. This past year, the Consumer Division directed the utilities to make \$64,270.30 in adjustments.

If a customer or utility company is not satisfied with the resolution of a complaint filed with the Consumer Division with respect to residential billing and service termination issues, either party may request an informal hearing. An informal hearing for a residential complaint is conducted by a Consumer Division Hearing Officer. Parties may appeal the Hearing Officer's decision to the Department's Commission.

#### **Utility Monitoring**

The Consumer Division collects extensive data about the quality of service utility customers receive. This data is used to generate monthly reports, which include cases, inquiries, and bill adjustment amounts per industry and their percentage increase or decrease in the previous twelve-month average. The reports compare companies using measures such as the number of residential complaints per 1,000 customers, and the total number of complaints per month. This data is also used to evaluate whether to grant energy supply licenses and renewals.<sup>1</sup>

---

<sup>1</sup> Massachusetts customers may choose to obtain electric and gas supply from a competitive supplier other than from their local distribution utility. The Department annually certifies the suppliers and agents selling this competitive supply.

To facilitate compliance with Department regulations and policies, Consumer Division staff reviews regulations pertaining to billing, protections from shut-offs, policies on abatements, and other areas of consumer protection. The Consumer Division also reviews utility billing materials and notices. The Consumer Division reviews bill format changes, bill inserts and notices, including rate change notices, as well as informational letters sent to customers. The Consumer Division may recommend changes to notices where necessary to ensure that customers are provided clear and accurate information.

## **Storms**

It is crucial for customers to have utility service that is both safe and reliable at all time, including during serious weather events. The Consumer Division gathers and disseminates timely and accurate information regarding outages and restoration efforts during weather-related events so that appropriate actions may be taken by customers, communities, and utilities. The Consumer Division Director serves as the point person in an effort to increase communication between the Department and the utilities during storm-related events.

## **Distributed Generation/Interconnection Dispute Resolution**

As developers apply to interconnect their distributed generation projects to their local distribution company's distribution system, disputes can arise. The Consumer Division Director is the Department-designated ombudsperson for these disputes. The goal of the ombudsperson is to be easily accessible and provide independent problem solving assistance to the interconnection parties.

## **Department Proceedings**

### **Service Quality**

The Consumer Division is intimately involved with two of the four prongs set forth in the Department's mission statement:<sup>2</sup> the provision of the most reliable service at the lowest possible cost; and ensuring that residential customers' rights are protected. As part of this involvement, the Consumer Division works with the Department's other divisions to compile and review each utility's annual performance regarding customer service, billing, customer satisfaction, safety and reliability. This past year, Consumer Division worked with the Department's other divisions to revamp the performance measures by which the utilities are evaluated.

---

<sup>2</sup> The mission of the Department is to ensure that utility customers are provided with the most reliable service at the lowest possible cost; to protect the public safety from transportation and gas pipeline related accidents; to oversee the energy facilities siting process; and to ensure that residential customers' rights are protected.

**Municipal Aggregation**

General Law c. 164, § 134 authorizes municipalities to aggregate the electrical load of customers within their borders to procure competitive supply of electricity. The Director of Consumer Division participates in the reviewing the aggregation plans to ensure customer education and outreach.

## **Division of Regional and Federal Affairs**

### **Overview**

Wholesale electricity and transmission costs can constitute as much as two-thirds of the retail price of electricity and commodity prices for natural gas. These costs constitute the majority of the bill paid by natural gas and electric customers in Massachusetts. The Division of Regional and Federal Affairs (“DRFA”) supports the Department by collecting, synthesizing, and evaluating the technical and legal factors driving electric system reliability and wholesale energy costs in Massachusetts. DRFA seeks to influence changes in regional market rules, under the rubric of ISO-New England (“ISO-NE”), and federal policies related to transmission infrastructure planning, operations and competitive wholesale market pricing to assure the best interest of Massachusetts consumers. DRFA also helps to coordinate with other energy and environmental agencies in Massachusetts and within New England to influence regional and federal policies.

DRFA actively monitors ISO-NE transmission planning, operations, and implementation of competitive wholesale markets and actively engages in ISO-NE’s stakeholder processes including monitoring and participating in various New England Power Pool (“NEPOOL”) technical committees (*i.e.*, Markets Committee, Reliability Committee, Transmission Committee, NEPOOL Participants Committee, Planning Advisory Committee and various other committees and working groups). In total, these committees and working groups held approximately 100 meetings in 2014.

DRFA also participates in national and regional policy groups including the National Association of Regulatory Utility Commissioners (“NARUC”), the Eastern Interconnection States’ Planning Council (“EISPC”), the New England Conference of Public Utility Commissioners (“NECPUC”), and the New England States Committee on Electricity (“NESCOE”).

DRFA monitors, oversees and actively engages in proceedings before the Federal Energy Regulatory Commission (“FERC”), as well as other federal agencies that take action relative to system reliability and/or issues with cost implications for Massachusetts electric and gas consumers.

### **Filings**

Over the course of 2014, DRFA filed written comments with FERC on a variety of matters, representing Massachusetts’s view on issues affecting system reliability and consumer costs. The following is a sampling of some of the filings:

- FERC’s Order 1000 relating to Transmission Cost Allocation for Public Policy Projects (FERC Docket No. ER13-193 and ER13-196)

- Allco Renewable Energy Limited's Petition for Enforcement under the Public Utility Regulatory Policies Act of 1978 (FERC Docket No. EL14-84)
- Forward Capacity Market Performance Incentives (FERC Docket No. ER14-1050)
- Forward Capacity Auction 8 Results (FERC Docket No. ER14-1409)
- Forward Capacity Market Rule Changes for Capacity Supply Obligations Deferral (FERC Docket No. ER14-2440)
- Footprint Power's Capacity Supply Obligation Deferral Application (FERC Docket No. ER15-60)

### **Representative Matters**

The following represents some of the major issues DRFA was engaged in during 2014:

#### **Reliability.**

- ISO-NE and the New England states recognize that the reliability of electricity supply to New England faces a number of challenges, key among them:

- **Demand Response**

A legal challenge has been mounted at the federal level by some of the existing generators to the inclusion of demand response ("DR") in the capacity and energy markets. DRFA will be monitoring this issue closely as it moves through the courts and will work closely with the other New England states to assure that DR continues to be a viable resource.

- **Continued need for winter reliability programs**

In response to serious reliability challenges experienced in the winter of 2012-13, when generators could not get access to a sufficient amount of natural gas, ISO-NE implemented out-of-market programs in the winter of 2013-14. Out-of-market programs were implemented again this year to ensure that NE generators have access to a sufficient supply of fuel to operate during periods when gas local distribution companies are close to their contracted maximum gas transmission capacity. ISO-NE anticipates that winter reliability programs will be required in 2015-2016 and for two winters beyond that until the Pay for Performance program is operative in 2018. Given this expectation, FERC has directed ISO-NE to work with stakeholders to devise a program (in- or out-of-market) to meet winter reliability concerns. DRFA plans to be very involved in the stakeholder process.

### **Competitive Wholesale Markets**

- **Forward Capacity Market (“FCM”)**

- Implementation of the zonal demand curves

DRFA continues to be active in issues involving the FCM. In January 2014, FERC ordered ISO-NE to submit a demand curve for the FCM by April 2014 to be implemented in time for the ninth Forward Capacity Auction (“FCA”) to be held in February 2015.

### **Planning**

- **Need for expansion of gas pipelines serving New England**

New England’s increased reliance on natural gas to generate electricity has led to severe constraints in the region’s natural gas transmission capacity during the winter months. Two recent studies indicate that these constraints are likely to persist and increase in the coming years. ISO-NE’s most recently commissioned study from ICF International (November 2014) median projections indicate there will be insufficient gas supplies on 24-34 days in amounts ranging from 0.48 to 1.1 BCF/D in the winter 2019-2020. Similarly, the Low Gas Demand study undertaken by Synapse for MA DOER indicates that deficits in pipeline capacity in 2020 will range from 0.6 BCF/D to 0.8 BCF/D. Both studies considered a range of electric load, and gas price assumptions.

- **Planning for future electricity needs while meeting environmental goals**

The New England states have been studying how to reliably provide for future electricity demand while simultaneously striving to reduce greenhouse gas emissions. While the

announced and anticipated retirement of some the region's older, fossil fuel-fired and nuclear generators will reduce emissions, the loss of these facilities will also increase the region's dependence on natural gas and leave it vulnerable in high LDC gas load periods. In December 2013, the New England governors and the Eastern Canadian Premiers agreed to study the feasibility of increasing imports of power (primarily hydropower) from Canada, while simultaneously facilitating the expansion of natural gas distribution in NE. Several studies have explored the costs and environmental benefits of greater imports of Canadian power and the expansion of natural gas infrastructure (Black & Veatch; ICF International; Synapse Low Demand) all pointing to the need for additional natural gas transmission infrastructure. DRFA, working closely with EEA, has been and will continue to be, involved in the Governors' Infrastructure Initiative.

## Electric Power Division

### Overview

The Electric Power Division (“EPD”) provides technical support to the Department in the regulation of the state’s five investor-owned electric distribution companies: Fitchburg Gas and Electric Light Company, doing business as Unital (“Unital”); Massachusetts Electric Company (“MECo”) and Nantucket Electric Company (“Nantucket Electric”), together doing business as National Grid (“National Grid”)<sup>3</sup>; NSTAR Electric Company (“NSTAR Electric”); and Western Massachusetts Electric Company (“WMECo”). EPD’s responsibilities fall into five general categories: (1) energy efficiency; (2) renewable energy resources, including development of distributed generation interconnection standards; (3) “grid modernization,” including “smart grid;” (4) the retail power supply markets in Massachusetts; and (5) safe and reliable electric service. In addition to these specific categories, EPD staff work with other Department divisions on larger cases such as distribution company rate cases and merger proposals.

### Energy Efficiency

Massachusetts electric distribution companies have administered and implemented ratepayer-funded energy efficiency (“EE”) programs for over 20 years. The Green Communities Act<sup>4</sup> includes provisions that significantly change the manner in which the program administrators (“PAs”)<sup>5</sup> provide EE services. The GCA requires PAs to develop, in consultation with the newly-formed Energy Efficiency Advisory Council, three-year plans that acquire all available cost effective EE resources.

On January 31, 2013, the Department approved the Electric and Gas Three-Year EE Plans, covering the years 2013 through 2015. On a statewide basis, the Three-Year Plans are expected to provide net benefits of approximately \$6.2 billion, resulting in almost three dollars in benefits for every dollar spent, over the lifetime of the efficiency measures installed. In addition, the EE programs in the Three-Year Plans are expected to reduce statewide greenhouse gas emissions by roughly 25.6 million tons. In addition, the energy efficiency sector in Massachusetts currently employs more than 40,000 people in the state.

During 2014, the Department issued orders on the distribution companies’ performance in implementing their energy efficiency plans for the period, 2010 through 2012. In addition, the

---

<sup>3</sup> MECo and Nantucket Electric frequently make joint filings.

<sup>4</sup> An Act Relative to Green Communities, Chapter 169 of the Acts of 2008 (“Green Communities Act” or “GCA”), enacted on July 2, 2008

<sup>5</sup> Program Administrators are those entities that administer energy efficiency programs, including the distribution companies and municipal aggregators.

Department issued an order that revised the manner in which the distribution companies can earn incentives for their energy efficiency performance during the current three-year term.

## **Renewable Energy Resources**

### **Introduction**

The Green Communities Act and subsequent legislation include provisions on the following policies related to renewable energy resources: (1) net metering; (2) long-term contracts; (3) ownership by electric distribution companies of solar generation facilities; and (4) interconnection.

### **Net Metering**

Section 78 of the Green Communities Act requires the Department to adopt rules and regulations necessary to implement the provisions relating to net metering. Net metering refers to the process of measuring the difference between (1) the electricity generated by a customer-owned generator and fed back to the grid, and (2) the electricity delivered to the customer by its distribution company. In 2014, Governor Patrick signed into law Chapter 251 of the Acts of 2014, an Act Relative to Credit for Thermal Energy Generated with Renewable Fuels. This legislation, along with the prior legislation passed in 2010 and 2012, requires the Department to adopt rules and regulations implementing certain changes to the net metering provisions of G.L. c. 164, §§ 138 and 139. St. 2010, c. 359, §§ 25-30; St. 2012, c. 209, §§ 23-30.

In regard to net metering in 2014, the Department: (1) reviewed and approved revised net metering tariffs; (2) continued the implementation of a net metering system of assurance<sup>6</sup>; (3) studied the net metering of small hydroelectric facilities; (4) participated in and co-led a solar and net metering task force, required by the aforementioned 2014 legislation, tasked with assessing the costs and benefits of the existing net metering framework; (5) reviewed four petitions for an exemption from the net metering regulations; (6) reviewed 50 applications for classification of entities as municipalities or other governmental entities (together “public”) for the purposes of net metering, thus allowing them to qualify for the public net metering cap; (7) conducted multiple public education presentations and/or discussions; and (8) answered many implementation questions.

---

<sup>6</sup> The website is available at: [www.massACA.org](http://www.massACA.org).

### **Long-Term Contracts**

Section 83 of the Green Communities Act and Section 83A of the 2012 Energy Law,<sup>7</sup> require the Department to adopt rules and regulations necessary to implement the provision relating to long-term contracts between electric distribution companies and renewable energy project developers. In 2014, pursuant to its long-term contract regulations (220 C.M.R. § 21.00), the Department approved long terms contracts for wind energy and renewable energy certificates from three facilities in New Hampshire and Maine. Together the wind contracts will serve an estimated 2.5 percent of the electric load served by the Distribution Companies and are expected to save customers \$853 million by securing clean energy at a fixed price below the projected market price of electricity.

### **Utility Ownership of Solar Facilities**

Section 58 of the Green Communities Act provides that electric distribution companies may construct, own, and operate solar generation facilities. In 2014, the Department reviewed and approved National Grid's proposal for a second phase of the Company's solar program consisting of up to 20 megawatts of solar generation facilities, pursuant to G.L. c. 164, § 1A(f).

### **Interconnection**

Interconnection is the process by which distributed generation is electrically integrated into the electric power system. In 2011, the Massachusetts Department of Energy Resources ("DOER") filed a petition with the Department requesting that the Department open a proceeding on the interconnection of distributed generation. DOER's petition was accompanied by a report entitled "Massachusetts Distributed Generation Interconnection Report," which identified various issues associated with the current distributed generation interconnection standards and application procedure. As a result of DOER's petition, the Department issued a notice of investigation and opened a generic proceeding. The purpose of the investigation was to ensure an efficient and effective interconnection process. As part of the investigation, the Department convened a distributed generation working group ("DG WG") to (1) determine what issues should be resolved regarding the current distributed generation interconnection standards and application procedure to ensure an efficient and effective interconnection process, and (2) deliberate with the goal of reaching a consensus on the resolution of such issues for Department review and approval. The Department's investigation into interconnection continued throughout the year 2014. In 2012, the distributed generation working group ("Working Group") issued its final report, Proposed Changes to the Uniform Standards for Interconnecting Distributed Generation in Massachusetts ("Report"), and submitted it to the Department of Public Utilities ("Department"). The Report contains many recommendations for changes in the Uniform Standards for Interconnection Standards for Distributed Generation ("Tariff"), such as on interconnection timelines and interconnection application fees. The Department approved the

---

<sup>7</sup> An Act Relative to Competitively Priced Electricity in the Commonwealth ("2012 Energy Law"), Chapter 209 of the Acts of 2012, enacted on August 3, 2012.

interconnection timelines and interconnection application fees in 2013. On October 1, 2013, members of the Working Group filed with the Department a timeline enforcement mechanism proposal (“Proposal”). Upon further investigation, the Department issued a new timeline enforcement mechanism on July 31, 2014. In addition, staff from the Electric Power Division monitor the Massachusetts Technical Standards Review Group (“TSRG”), an ongoing effort to address various interconnection related technical challenges.

### **Grid Modernization or Smart Grid**

Section 85 of the Green Communities Act requires each electric company to file a plan with the Department to establish a Smart Grid pilot program. Each pilot program must include advanced technology that provides for (1) real-time measurement and communication of energy consumption, (2) automated load management systems, and (3) remote status detection and operation of distribution system equipment

In 2009, the distribution companies submitted their proposed Smart Grid pilots to the Department. In 2010, the Department issued an order on National Grid’s smart grid pilot proposal, wherein we supported certain elements of the proposal but directed National Grid to make additional filings to address certain issues. In February 2011, National Grid filed a motion to withdraw its pilot proposal, stating that technology had matured since their original proposal and that National Grid determined it could deliver the pilot in a more cost-effective manner with a refreshed proposal. National Grid resubmitted its pilot proposal in December 2011, which the Department approved in August, 2012. National Grid’s two year pilot is ongoing.

In 2010, the Department convened a Smart Grid Pilot Program Evaluation Working Group (“Working Group”) to ensure that certain elements of the pilot programs would be conducted in comparable way by each company so as to maximize the value of results from the pilot programs on a statewide level. In March 2011, the Working Group submitted a Common Evaluation Framework report that included standardized methodologies and demographic sampling approaches to ensure that the quantitative and qualitative information collected by the various pilot programs will be consistent and that the results will be reliable and comparable where appropriate.

On October 2, 2012, the Department opened a generic investigation on the “Modernization of the Electric Grid” to investigate policies that will enable Massachusetts electric distribution companies and their customers to take advantage of grid modernization opportunities. This investigation included the creation of a stakeholder Working Group which met throughout the first half of 2013 and which submitted a final report to the Department in July, 2013. Partly in response to this report, in December 2013, the Department issued a straw proposal for advancing grid modernization, and opened an investigation into issues related to electric vehicles. In 2014, the Department concluded the investigation into grid modernization with orders in June and November that require the electric distribution companies to file grid modernization plans and provide significant guidance on development and review of these plans.

The Department continued its investigation into electric vehicles, including issuing an order in August that addresses the question of Department jurisdiction over electric vehicle charging and the electric distribution companies' role in owning electric vehicle charging equipment. Subsequently, the Department conducted technical sessions and received comments on additional issues related to electric vehicles.

In 2014, the Department also conducted an investigation into time varying rates, *i.e.*, electric pricing structures that reflect the changing wholesale costs of electricity and thereby allow customers (aided by new technologies, service providers, etc) to respond to these changes and reduce costs. After receiving comments on a straw proposal, the Department adopted a framework for changing basic service into a default time varying rate (with a flat rate option), to occur once the necessary metering infrastructure is in place.

## **Retail Power Supply Markets**

### **Introduction**

Prior to the enactment of Chapter 164 of the Acts of 1997 (the "Electric Restructuring Act"), customers had no choice but to purchase both the delivery and supply components of their electric service from their electric company. The Electric Restructuring Act introduced competition in the Massachusetts electric industry by giving consumers the option to purchase the supply component of their electric service from a competitive retail supplier or to continue receiving electricity procured by their electric company.

### **Competitive Power Supply**

Consistent with the objectives of the Electric Restructuring Act, the Department's goal is to provide electricity customers with a broad choice of competitive supply options to allow customers to fully realize the benefits of the restructured electric industry. The Department grants licenses to qualified entities to serve as competitive suppliers<sup>8</sup> and electricity brokers<sup>9</sup> in the restructured industry. EPD staff review license applications to determine whether the applicant has demonstrated, among other things, the financial and technical capability to provide the applicable services. During 2014, the Department approved licenses for six competitive suppliers and 43 electricity brokers. As of year-end 2014, there were 66 licensed competitive suppliers and 212 licensed electricity brokers in Massachusetts. While these suppliers and brokers provide services primarily to large and medium-sized commercial customers, they are

---

<sup>8</sup> Competitive suppliers are entities that procure electricity from generation facilities at the wholesale level and sell the electricity to consumers at retail cost.

<sup>9</sup> Electricity brokers are entities that facilitate or arrange for the sale of electricity to customers, acting as "middlemen" between suppliers and customers.

increasingly serving residential customers as well. In 2014, the Department also opened an investigation into initiatives to improve the retail electric competitive supply market.

The Electric Restructuring Act included provisions that allow a municipality (or group of municipalities) to aggregate the electrical load of customers located within its municipal boundary for the purpose of purchasing competitive power supply. A municipality that seeks to implement a “municipal aggregation” plan must receive Department approval. In 2014, the Department approved municipal aggregation plans for 13 cities and towns in the Commonwealth, and addressed other petitions related to municipal aggregations.

### **Basic Service**

Basic service, formerly known as “default service,” is the retail power supply service that each electric distribution company provides to customers not receiving such service from the competitive market. Each distribution company procures power supply for its basic service customers from the wholesale electricity markets through competitive solicitation processes.

For its residential and small commercial and industrial (“C&I”) customers, each distribution company issues a Request For Proposals (“RFP”) for basic service supply on a semi-annual basis. Each solicitation procures 50 percent of the company’s basic service supply requirement for these customers for a twelve-month term. As such, at any point in time, basic service rates for residential and small C&I customers are based on the winning bid prices from the two most recent solicitations.

For its medium and large C&I customers, a distribution company issues an RFP solicitation for basic service supply on a quarterly basis. Each solicitation procures 100 percent of the company’s basic service supply requirement for these customers for a three-month term.

In addition to procuring power supply for its basic service customers, each distribution company must comply with the state’s Renewable Portfolio Standards (“RPS”). The RPS requires that competitive suppliers and distribution companies providing basic service provide Renewable Energy Certificates for certain percentages of sales for various classes of renewable energy resources.

EPD staff reviews each company’s solicitations to ensure that they (1) comply with the Department’s rules and regulations, and (2) are sufficiently competitive such that the results of the solicitations are consistent with prevailing market conditions.

In response to high basic service prices for the winter of 2014-2015, the Department solicited input from stakeholders about possible actions and worked with stakeholders to provide customers with information about steps to mitigate bill increases and consider competitive supply options.

## **Distribution Service Quality and Reliability**

The Electric Power Division is responsible for ensuring that the Massachusetts electric companies provide their customers with safe and reliable distribution service. EPD discharges this responsibility through three primary tools. First, the Department requires electric companies to submit periodic reports on issues related to distribution service quality and reliability. Some of the periodic reports are described below. Second, the Department requires that the companies maintain an outage reporting website, which allows the Department to access real-time information regarding significant power outages that occur on their distribution systems. Finally, the Department reviews the companies' annual service quality reports to determine if a penalty is warranted.

### **Reporting Requirements**

The Department requires each electric distribution company to periodically file reports on issues related to distribution service quality and reliability. EPD staff review these reports and meet with the companies, as necessary, to ensure that the companies' actions are consistent with Department requirements. Some of the periodic reports filed with the Department are described below.

#### **Annual Planning and Reliability Report**

The annual planning and reliability report includes an analysis of the company's distribution system, including (1) a ten-year load growth forecast capable of identifying high-growth areas/zones; (2) a description of the company's transmission and distribution design and planning criteria and an explanation of how those criteria are applied; (3) a distribution system operating study focused on contingency analysis and management; and (4) an update to corrective actions and significant capital investments planned for the next five years.

#### **Annual Storm and Emergency Restoration Report**

The report details the company's storm and emergency plans ("ERPs") to respond to any emergency event such as hurricanes or snowstorms. The companies are required to file their ERPs annually, including actions taken to prepare for an emergency event. The ERPs are established pursuant to 220 C.M.R. § 19.00, Standards of Performance for Emergency Preparation and Restoration of Service for Electric Distribution and Gas Companies, and Emergency Response Plan Guidelines for electric companies. In addition, the Department closely monitored a number of storm events in 2014 even though none of these events resulted in a formal investigation.

### **Quarterly Outage Report**

The report summarizes all significant outages that occurred in a company's electric system, within the reporting quarter, including the actions taken or planned to mitigate the outage causes.

### **Quarterly Stray Voltage and Manhole Safety Report**

The report describes each company's practices with regard to stray voltage and manhole issues, including systematic testing/inspection and corrective actions performed consistent with the approved distribution safety plans. In addition, the companies are required to report stray voltage and manhole incidents as soon as they occur, including corrective actions. EPD continues to track those corrective actions and related activities.

### **Semi-Annual Double Pole Reports**

The report details the companies' efforts to address the double pole issue, including removal of poles and transfer of wires owned by various attachers. The double pole reports are filed pursuant to the Department's regulations relative to reducing the number of double utility poles in the Commonwealth, as required by Chapter 46 of the Acts of 2003. The source of the double pole data comes from a pole life-cycle management system ("PLM") database jointly developed by the utilities. The Department continues to monitor the semi-annual double pole reports.

### **Reporting of Outage Events**

Each electric distribution company is required to maintain, on a real-time basis, information regarding outages that occur on its distribution system. Each company's outage report can be accessed by Department staff via a secure internet-based Outage Reporting Protocol ("ORP") system. The ORP information includes, for example, (1) the location of the outage; (2) number of customers affected; (3) number of circuits affected or out-of-service; (4) likely cause; (5) any bodily injury; and (6) whether a critical facility, such as a hospital, is involved. EPD staff monitors the ORP data, and responds to reports of significant and/or frequent interruptions to customers, and when a reliability trend is observed. In addition, each company files, annually, a report of all customer outages that occurred on its system in the prior year.

### **Service Quality Standards**

The Department requires that each electric distribution company submit an annual service quality report that details how the company has performed with respect to standards established in the Department's Service Quality Guidelines. A major component of these guidelines relates to companies' performance regarding the frequency and duration of outages during the previous year, both on a system-wide and circuit-specific level, and performance relating to customer billing and other complaints. EPD staff reviews each electric company's service quality report to evaluate performance. A company can incur a penalty of up to 2.5 percent of its distribution and transmission revenue if its service quality performance degrades in comparison to historic benchmark performance levels.

On December 11, 2012, the Department opened a generic investigation regarding the service quality guidelines established in Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 99-84 (2001) and amended in Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116 (2007). After a multi-year process including comments on a straw proposal, on December 22, 2014, the Department issued an Order revising the Service Quality guidelines.

## Natural Gas Division

### Overview

The Natural Gas Division (“Gas Division”) provides technical support to the Department in the regulation of the state’s eight investor-owned natural gas companies (also called “local distribution companies” or “LDCs”): Bay State Gas Company d/b/a Columbia Gas of Massachusetts; The Berkshire Gas Company; Blackstone Gas Company; Fitchburg Gas & Electric Light Company d/b/a Until; Boston Gas Company and Colonial Gas Company, each d/b/a National Grid; Liberty Utilities (New England Natural Gas Company) Corp. d/b/a Liberty Utilities; and NSTAR Gas Company. In total, these companies serve approximately 1.51 million gas customers, and have combined operating revenues of approximately \$2.47 billion.

Over the last several years, the Gas Division has worked to promote competition in the local gas distribution industry through the “unbundling” of rates. The Gas Division has brought about regulatory changes that provide gas customers with opportunities to participate in a competitive gas market, while maintaining traditional consumer protections. The Gas Division has the authority and the responsibility to:

- Review LDCs’ forecast and supply plans and long-term gas supply contracts;
- Review non-tariff contracts for the sale and transportation of natural gas;
- Review the appropriateness and accuracy of LDC filings made pursuant to the Cost of Gas Adjustment Clause (“CGAC”) and the Local Distribution Adjustment Clause (“LDAC”);
- Review LDCs’ energy efficiency filings;
- Assist the Rates and Revenue Requirements Division in base rate, merger, and financing filings;
- Review LDCs’ service quality filings;
- License gas suppliers and retail agents; and
- Review and, where appropriate, intervene in federal regulatory proceedings and activities that affect the interests of gas consumers in the Commonwealth.

### Natural Gas Division Responsibilities

#### Review of Forecast and Supply Plans

LDCs must submit a five-year Forecast and Supply Plan to the Department for approval every two years. In its review of the forecast component, the Gas Division determines whether the

company has accurately projected the gas requirements of the company's service area. A forecast must contain accurate and complete historical data and employ reasonable statistical projection methods. In its review of the supply plan, the Gas Division must determine whether the plan is adequate to meet projected customer demand under a range of contingencies. During 2014, the Gas Division reviewed five forecast and supply plans.

### **Review of Long-Term Gas Supply Contracts**

LDCs must submit all supply contracts with terms longer than one year to the Department for review and approval. Long-term supply contracts include both gas commodity (the natural gas itself) and capacity (the pipeline required to transport the natural gas from the production areas to the LDC's distribution system). In evaluating a gas company's proposed contract for commodity or capacity, the Gas Division examines whether the acquisition of the resource would be consistent with the public interest. To do so, the Gas Division determines whether the LDC has shown that the acquisition (1) would be consistent with the company's portfolio objectives, and (2) would compare favorably to the range of options reasonably available to the company and its customers. During 2014, the Gas Division reviewed nine long-term supply contracts.

### **Review of Non-Tariff Contracts**

Large commercial and industrial gas customers capable of burning alternative fuels, such as oil or coal, sometimes find that their gas companies' Department-approved tariffs are not competitive with alternative fuel options. To retain these customers and assure a continued stream of revenue, LDCs may offer them non-tariff contracts, subject to Department approval. In its review, Gas Division staff ensures that (1) the customer is capable of burning an alternative fuel; (2) the price charged under the contract exceeds the marginal cost of providing this service; and (3) the company's existing ratepayers are not responsible for any of the costs associated with providing the specified service. In 2014, the Gas Division reviewed 25 non-tariff contracts.

### **Review of Requests for Cost Adjustments**

Department regulations allow gas companies to recover costs incurred for the purchase, storage, and interstate transportation of gas (referred to as "gas supply costs"). Gas commodity costs typically fluctuate seasonally. Through semi-annual cost-of-gas adjustment filings, LDCs request billing changes that enable them to reconcile these fluctuations. The Gas Division reviews these filings to ensure accounting accuracy and prudent company practices, and approves adjustments to billings via the Cost of Gas Adjustment Factor. In 2001, the Department amended its regulations to require gas companies to make interim filings for recovery of gas supply costs, when projected under- or over-collections exceed five percent. These adjustments help reduce the impact on customers' bills when there are significant changes in gas supply costs. During 2014, the Gas Division reviewed 23 requests for cost of gas adjustments.

Similarly, Department regulations allow a gas company to recover or credit, on a reconciling basis, a variety of costs that have been determined to be distribution-related but are not included

in base distribution rates.<sup>10</sup> The charge used to recover all of these costs is referred to as the Local Distribution Adjustment Factor (“LDAF”). Examples of recoverable expenses include the costs of energy efficiency programs and costs related to the federal restructuring of the gas industry. LDCs can also recover costs associated with federal and state-mandated cleanups of past contamination at sites polluted by wastes from gas manufacturing plants. Although most gas manufacturing plants in Massachusetts ceased operations by the early 1950s, their wastes continue to present environmental hazards. The Gas Division reviews all company requests for adjustments via the LDAF to ensure accounting accuracy and prudent company practices. During 2014, the Gas Division reviewed 14 LDAF requests.

### **Review of Energy Efficiency Filings**

Since 1992, the Department has required LDCs to develop energy efficiency plans that bring cost savings to consumers and reduce the overall need for gas. With the passing of the Green Communities Act in 2008, gas companies are now required to submit energy efficiency plans to the Department for approval every three years. The companies’ plans include weatherization service programs (e.g., energy audits, attic and wall insulation, air sealing, and heating system repairs), behavioral feedback programs, and rebates for the installation of thermostats or for the replacement of boilers, furnaces, and water heaters with high-efficiency units. Gas companies must submit energy efficiency plans to the Gas Division, which reviews the proposed plans to ensure that, among other things, (1) the programs are delivered cost-effectively, capturing all available energy efficiency opportunities; (2) administrative costs have been minimized to the fullest extent practicable; and (3) competitive procurement processes have been used to the fullest extent practicable, while also being mindful of rate and bill impacts on consumers. The companies can then recover energy efficiency-related costs via the energy efficiency surcharge in the LDAF. In 2014, the Gas Division reviewed 31 energy efficiency filings.

### **Cooperation with the Rates and Revenue Requirements Division**

The Gas Division works closely with the Rates and Revenue Requirements Division to review various rate case filings and merger and acquisition petitions. In traditional rate cases, Gas Division staff is responsible for reviewing the terms and conditions of distribution service, the allocation of local production and storage costs, weather normalization, gas-related cash working capital, marginal costs, and the treatment of revenues from off-tariff contracts. In 2014, the Gas Division participated in the Department’s review of three rate related filings.

### **Review of Service Quality Filings**

In June 2001, the Department issued an order finalizing service quality standards for all electric and gas distribution companies. The order established performance measures for customer

---

<sup>10</sup> Base distribution rates are designed to recover distribution-related costs (i.e., the costs to operate the LDC), including plant and equipment, labor, taxes, interest on borrowed funds, return on investment, billing, metering, and customer service.

service, billing, customer satisfaction, staffing levels, safety, and reliability. Pursuant to this order, the LDCs filed company-specific service quality plans for Department review, which the Department approved in spring 2002. Each gas company filed a service quality report in March 2006 (and must do so every March), comparing its actual performance against the service quality standards established by the Department. The Gas Division is responsible for the review of all gas service quality plans to ensure that the companies maintain a minimum quality of service. During 2014, the Gas Division reviewed nine service quality plans.

### **Licensing of Gas Suppliers and Retail Agents**

Massachusetts customers may choose a gas supplier other than the LDC serving the customer's neighborhood. This allows customers to comparison shop and negotiate for the best value in gas commodity from competitive suppliers. The price charged by these competitive suppliers for natural gas, however, is not regulated. Instead, competitive gas suppliers set their own prices, just like the sellers of most goods and services in the marketplace.

Gas suppliers and retail agents wishing to sell natural gas to Massachusetts retail customers must be certified by the Department on an annual basis. The Gas Division reviews the applications for these licenses and conducts interviews with the applicants. Staff determines whether the applicants have the technical ability to procure and deliver natural gas, and whether they are familiar with the Department's rules and the gas industry in general. The Gas Division also evaluates documentation of the applicant's financial capability, such as the level of capitalization or corporate backing, to provide the proposed services. In 2014, the Gas Division reviewed 142 applications for Gas Supplier or Gas Retail Agent licenses. Of the licenses reviewed, the Gas Division has recommended and the Department approved 141 applications. Of them: 25 were applications for renewal of Gas Supplier licenses; 3 were new application for a Gas Supplier license; 91 were applications for renewal of Gas Retail Agent licenses; and 22 were new applications for Gas Retail Agent licenses. No applications have been rejected. Any outstanding applications are due to the applicant's failure to submit additional materials, as requested by the Gas Division, in order to complete the application.

### **Participation in Federal Policy-Making**

Over the past decade, actions taken by FERC, the U.S. Department of Energy, and Congress have dramatically changed federal regulation of the natural gas industry. These changes directly affect the interests of Massachusetts customers who are served by federally regulated pipelines and liquefied natural gas ("LNG") import terminals. Gas Division staff work with other state agencies and regional organizations to stay informed regarding current federal statutory and regulatory proposals, and to develop public positions on issues that may affect Commonwealth interests.

### **Public Information and Review of Consumer Complaints**

Gas Division staff provide information and assistance on a daily basis to consumers, government officials, marketers, regulated companies, consultants, and financial analysts. In addition, Gas

Division staff assisted the Department's Consumer Division in addressing gas-related consumer issues.

### **2014 Gas Division Accomplishments**

During 2014, the Gas Division reviewed:

- 5 forecast and supply plan filings;
- 9 long-term gas supply contracts;
- 25 non-tariff contracts for the sale and transportation of natural gas (firm service, quasi-firm service);
- 23 gas-cost-recovery filings pursuant to the CGAC;
- 14 cost recovery filings pursuant to the LDAC;
- 31 energy efficiency filings;
- 9 service quality reports; and
- 142 applications for the licensing of gas suppliers and gas retail agents.

## Legal Division

### Overview

The Legal Division staff serves as the chief legal and policy advisor to the Commission and provides legal support to all divisions of the Department.

### Legal Division Responsibilities

#### Formal Adjudications

The Legal Division's primary duty is presiding over adjudicatory proceedings conducted under the Massachusetts Administrative Procedures Act (G.L. c. 30A) and the Department's procedural regulations (220 C.M.R. § 1.00). During 2014, the Legal Division participated in the issuance of 423 Orders. A list of the Department's 2014 Orders is attached at Appendix 2.

Adjudications are the formal determination of parties' rights through a quasi-judicial process. All parties — both the party filing the action and any intervenors — are entitled to due process safeguards, meaning that the parties are entitled to adequate notice and the opportunity to be heard. Parties to the action have the right to present evidence, cross-examine witnesses, and receive a written decision from the Department. Pursuant to G.L. c. 25, § 4, the Chairman of the Department may delegate authority to an attorney from the Legal Division, known as the "Hearing Officer," to preside over Department adjudications.

Adjudicatory proceedings vary in complexity and include a wide range of subjects, such as reviews of:

- rates;
- contracts for the sale and purchase of electric power, natural gas, and water;
- long-term contracts for renewables;
- long-range forecast and supply planning;
- energy efficiency plans;
- service quality plans;
- financial transactions (e.g., stock, bond, and security issuances);
- proposed mergers;
- storm investigations;

- emergency response plans;
- municipal aggregation plans;
- proposed energy facility construction and siting (e.g., electric generation facilities and transmission lines); and
- billing disputes between residential consumers and utilities.

In conducting a formal adjudicatory proceeding, the Department generally holds two types of hearings: (1) a public hearing; and (2) an evidentiary hearing. Public hearings are publicized throughout the utility's service territory. In certain types of cases, public hearings are held in a utility's service territory. Public hearings are transcribed by a stenographer. If held in a utility's service territory, public hearings are conducted during the evening, usually in an easily accessible public building such as the Town Hall, and are often presided over by a Commissioner. The public hearings afford local consumers the opportunity to learn more about a rate request, offer their input about the pending case, and comment on the practices of the utility. Residential and business customers are a valuable source of information to the Department in developing a case record.

Evidentiary hearings are conducted in a courtroom setting in the Department's Boston offices. These proceedings are also transcribed by a stenographer. The hearings are presided over by the Hearing Officer, with the active participation of the Department's technical staff. The technical staff participates by questioning witnesses to ensure that the record is accurate and complete.

While the adjudicatory process does not require adherence to all formal rules of evidence, the evidentiary hearing process follows many rules of civil procedure as set forth in the Department's regulations, 220 C.M.R. § 1.00., and parties are almost always represented by counsel from the utility bar. Evidentiary hearings afford intervenors and the Department the opportunity to question company witnesses. In many cases, the Attorney General of the Commonwealth is an intervenor. Other intervenors may include public interest organizations, the Division of Energy Resources ("DOER"), and local consumer, business, or neighborhood groups. Sometimes intervenors put on a direct case with witnesses of their own.

Based on the evidence in the record, the Department issues a Final Order at the conclusion of each adjudicatory proceeding. Pursuant to G.L. c. 25, § 5, the Department's Final Order is appealable directly to the Massachusetts Supreme Judicial Court.

## **Other Types of Proceedings**

### **Requests for Advisory Rulings**

The Department is sometimes called upon to issue advisory rulings with respect to the applicability of any statute or regulation enforced or administered by the Department. The

Department has discretion to decline a request for an advisory ruling. G.L. 30A, § 8; 220 C.M.R. § 2.08.

### **Notice of Inquiry Proceedings**

The Department issues a Notice of Inquiry (“NOI”) when the agency desires public input on a particular issue. Thus, NOIs are Department-initiated investigations that are neither formal adjudications nor rulemakings. The goal of the NOI is to encourage broad input into the development of public policy. The Department derives authority to issue an NOI from G.L. c. 164, § 76.

Participants in an NOI proceeding file comments and may provide sworn testimony. However, participants normally are not subject to cross-examination and do not have appeal rights. The order issued at the close of the investigation is usually a general policy statement with guidelines for future actions by utilities or by the Department. The policy established through the NOI may be further developed in the future through company-specific adjudications. In 2014, the Department issued four NOIs: D.P.U. 14-04, Investigation by the Department of Public Utilities into Time Varying Rates, D.P.U. 14-72, Investigation by the Department of Public Utilities on its own Motion to Revise Guidelines for Electric Companies' Emergency Response Plans, D.P.U. 14-118; Investigation by the Department of Public Utilities Regarding the Feasibility, Impacts and Benefits of Allowing Electric Distribution Company Customers to Net Meter Electricity Generated by Small Hydroelectric Facilities, and D.P.U. 14-140; Investigation by the Department of Public Utilities upon its own Motion into Initiatives to Improve the Retail Electric Competitive Supply Market.

### **Rulemakings**

**The Department conducts rulemakings pursuant to G.L. c. 30A, §§ 2 - 5 and 220 C.M.R. § 2.00, to adopt, amend, or repeal regulations pertaining to the activities of all industries the Department is charged by statute with regulating. A rulemaking proceeding may involve simple procedural regulations or may address complex regulatory issues. The Department is required to provide public notice of a proposed rulemaking and to allow an opportunity for public comment. After consideration of the public comment, the Department may issue final regulations. Any final regulation must be published in the Code of Massachusetts Regulations. In 2014, the Department conducted four rulemakings. The Department completed rulemaking proceeding D.P.U. 13-09, adopting final regulations 220 C.M.R. § 22.00, Notification of Vegetation Maintenance Activities for Transmission Rights-of-Way, effective June 20, 2014. In D.P.U. 14-53, the Department amended 220 C.M.R. § 7.00, Residential Energy Conservation Service Program Cost Recovery, and made a technical correction to 220 C.M.R. § 11.02, Rules Governing the Restructuring of the Electric Industry, General Definitions. Final regulations 220 C.M.R. § 7.00 and 220 C.M.R. § 11.02 took effect November 21, 2014. In addition, the Department promulgated final regulations, effective December 5, 2015, in rulemaking proceeding D.P.U. 14-79, amending 220 C.M.R. § 260.00, Motor Carriers and Brokers. The Department also conducted emergency rulemaking D.P.U. 14-104, amending 220 C.M.R.**

**§ 18.00, Net Metering, adopting emergency regulations effective November 4, 2014 and made permanent with the filing of a Notice of Compliance.**

## **Pipeline Engineering and Safety Division**

### **Overview**

The Pipeline Engineering and Safety Division (“Pipeline Safety Division”) is responsible for technical and safety oversight of seven investor owned natural gas companies and four municipal gas departments in Massachusetts. As a certified agent of the U.S. Department of Transportation (“US DOT”), the Pipeline Safety Division enforces federal regulations pertaining to natural gas distribution pipelines within the Commonwealth. The Pipeline Safety Division also enforces the Department’s own comprehensive gas safety regulations and the state’s “Dig Safe” law, a statute requiring companies and individuals performing excavation work to notify the Dig Safe program in order to ensure safe excavation work. The Pipeline Division is also responsible for oversight of Steam Distribution companies and testing of gas meters for use in the state.

The Pipeline Safety Division’s authority over technical and safety issues requires it to:

- Inspect gas facilities for compliance with federal and state design, construction, operating, maintenance, and emergency and plant security regulations, and enforce such regulations;
- Investigate and determine the cause of gas related Incidents and make recommendations to minimize recurrences;
- Develop regulations applicable to the gas industry to enhance public safety;
- Enforce the Dig Safe Law by investigating alleged violations and assessing civil penalties;
- Examine and investigate a steam distribution company’s safety performance and investigate steam release incidents;
- Inspect and test gas meters for accuracy and safety before the meters are installed at consumers’ premises;
- Resolve consumer complaints regarding the accuracy of electric and gas meters by field tests; and
- Ensure that utility operators restore the streets and roads after excavating in the public way.

### **Pipeline Safety Division Responsibilities**

Natural gas is considered a hazardous fuel by both the state and the federal government. Massachusetts has over 23,000 miles of gas mains and eleven operators with 18 liquefied natural gas (“LNG”) plants and eight LP plants. These facilities serve over 1.4 million customers.

To protect consumers and the general public from the potential hazards involved in the transmission, distribution, production, storage, and use of natural gas and propane, both the US DOT and the Department regulate these facilities. In addition to enforcing the Department's regulations, the Pipeline Safety Division acts as an agent for the US DOT in the enforcement of federal regulations. The Pipeline Safety Division inspects natural gas distribution pipeline facilities within the Commonwealth, investigates incidents, and imposes remedial actions. These remedial actions can include civil penalties when the Department determines that a natural gas operator did not comply with federal and state pipeline safety regulations.

The Department is authorized to assess civil penalties for violations of federal and state safety regulations. The penalties cannot exceed \$200,000 per violation for each day the violation persists and \$2,000,000 for any related series of violations. G.L. c. 164, § 105A.

### **Gas Facility Inspections**

The Pipeline Safety Division's engineers inspect jurisdictional gas facilities — pipelines, meter stations, regulator stations, dispatch centers, LNG plants, and propane plants — for compliance with federal and state safety regulations. If it determines that violations may exist, the Pipeline Safety Division issues a Notice of Probable Violation ("NOPV") or Warning Letter to the alleged violator along with a Consent Order. The Consent Order includes proposed action(s) to be taken by the alleged violator to correct the violation, and a proposed civil penalty. The alleged violator may agree to the Consent Order, thereby resolving the case, or may request an informal review conference with Pipeline Safety Division. Following a requested informal review conference, the Pipeline Safety Division issues a written decision. If a company disputes the written decision, it may request an adjudicatory hearing before the Department.

In 2014, the seven Public Utilities Engineers spent over 700 person days performing inspections. The Pipeline Safety Division issued nine NOPVs and levied \$490,000 in civil penalties. The Pipeline Safety Division has collected to date a total of \$630,000 in civil penalties. These civil penalties are deposited into the General Fund of the Commonwealth.

### **Intrastate Transmission Pipelines**

There are approximately 23 miles of intrastate gas transmission lines in Massachusetts. The increased use of natural gas to generate electricity has resulted in the construction of new intrastate pipelines to connect power plants directly to interstate gas transmission lines. As intrastate facilities, these pipelines fall under the aegis of the Pipeline Safety Division, whose engineers inspect their design, construction, operation, and maintenance. Such pipelines typically operate at pressures significantly higher than local gas distribution pressures.

### **Investigation of Natural Gas Incidents**

When a gas related incident occurs, such as a fire or explosion that results in personal injury and/or significant property damage, the Pipeline Safety Division's engineers: (1) investigate to determine its cause; (2) determine whether the pipeline operator was in violation of any safety

regulations; and (3) ascertain what actions an operator could take to prevent or minimize a recurrence. During 2014, the Pipeline Safety Division investigated one gas-related incident.

### **Intrastate LNG/LPG Facilities**

LNG/LPG plants provide an important part of the gas supply in Massachusetts. Especially in winter months, LNG plants provide as much as 20 percent of the daily gas supply used during peak demand times. Ensuring the safe and effective operation of these plants has always been a priority for the Pipeline Safety Division.

The Pipeline Safety Division inspects each LNG/LPG plant comprehensively once every four years. In addition, the Pipeline Safety Division conducts specialized inspections at each LNG/LPG plant at least once in a 24-month period and comprehensive inspections every four years. The security of these plants is a large concern for the Pipeline Safety Division. The Pipeline Safety Division continually monitors the security of the LNG plants. Monitoring includes on-site inspections, reviews of procedures, and reviews of operating and maintenance records.

### **Dig Safe Law Enforcement**

Massachusetts' Dig Safe law requires any person who proposes to excavate in public or private land to pre-mark the excavation site and to notify the Dig Safe Center of the intent to excavate. The Dig Safe Center then contacts all operators of underground gas pipelines and electric, telecommunication, and television cables in the excavation locale. These operators, in turn, must mark the locations of their facilities in advance of the excavation to minimize the risk of potential damage by the excavator. Lastly, the excavator must take adequate precautions to prevent damage to the facilities while digging.

Any person aware of possible violations of Dig Safe procedures may report them to the Pipeline Safety Division; utility operators are mandated by regulation to report possible Dig Safe violations. The Pipeline Safety Division investigates the reports, issues NOPVs, conducts informal review conferences with the respondents and operators of the facilities, and performs field inspections, as necessary. The Pipeline Safety Division then issues a written decision, and has the authority to assess a civil penalty of \$1,000 for a first offence and up to \$10,000 in certain circumstances. An alleged violator that disputes the written decision may request an adjudicatory hearing before the Department.

In 2014, the Pipeline Safety Division received 828 reports of possible Dig Safe violations. After investigating these reports, the Pipeline Safety Division at year end issued 834 NOPVs, and collected \$1,148,000 in civil penalties.

### **Steam Distribution**

State regulations for Steam Distribution Companies apply to every steam distribution company operating a plant, equipment or facilities for the manufacture, production, transmission,

furnishing or distribution of steam to or for the public for compensation within the Commonwealth. The Steam Regulations prescribe minimum safety requirements for the design, fabrication, installation, inspection, testing, operation, and maintenance of steam facilities by steam distribution companies. The Department has the authority to conduct examinations and investigations into a steam distribution company's safety performance, and to levy fines against steam distribution companies for failure to comply with G.L. c. 164B, or Department regulations.

### **Gas Meter Testing**

State law requires that each gas meter be tested by the Pipeline Safety Division for volumetric accuracy and for leakage once every seven years, or when the meter is removed from service. Gas companies and municipal gas departments ("operators") typically remove meters to be tested and replace them with previously approved meters. Operators then deliver meters to their meter shops where one of the Pipeline Safety Division's compliance officers tests them to ensure that they are not leaking and that the consumer is getting the correct amount of gas. In 2014, the Pipeline Safety Division collected \$1,992,550 in meter testing fees.

### **Consumer Metering Complaints**

The Pipeline Safety Division assists the Department's Consumer Division in addressing complaints by customers pertaining to both electric and gas metering. In the case of an electric meter, the Pipeline Safety Division Staff will serve as an observer when a meter that has generated a complaint is tested for accuracy. For gas meters, the meter that has generated a complaint is removed and tested at the operator's premises by a Pipeline Safety Division compliance officer.

### **Restoration of the Public Way after Utility Openings**

In response to complaints from municipalities and the industry about the lack of repairs made to public roads after utility work was completed, the Department promulgated street restoration standards in 1998. The regulations set standards for soil compaction, paving, and other activities affecting road condition.

### **Partnership with Industry**

In areas of cooperation, the Pipeline Safety Division has worked with regulators in the other five New England states and Northeast Gas Association, or NGA, to develop qualification procedures for welders of steel pipelines and fusers of plastic pipeline. This effort resulted in uniform qualifications for welders and fusers throughout New England that allows operators to avoid expending resources for the requalification of an employee from another New England state. At the same time, pipeline safety regulators are assured that the personnel are qualified in these essential pipeline construction functions.

The Pipeline Safety Division also worked with utilities and the Dig Safe Center to conduct training sessions for excavators. The sessions provide excavators with information about

underground utility lines and precautions to take when excavating near those lines. Programs such as Managing Underground Safety Training are an important tool for preventing damage to underground pipelines and cables.

### **Precedent, Policies, and Practice**

The Department is a national leader in gas pipeline safety. The Pipeline Safety Division's actions in response to violations of gas-related safety regulations have gained the recognition of US DOT and agencies in other states. With more LNG plants than any other state in the country, the Commonwealth's LNG safety regulations are among the most stringent in the country.

Massachusetts has continued to address the important issue of replacement or abandonment of leak prone pipe consisting of unprotected bare steel and cast-iron pipe. The Department's regulations require pipeline operators to prioritize and replace segments of unprotected bare steel and cast-iron pipe in accordance with Department developed criteria. In addition, companies must replace or abandon cast iron pipes, subject to specific criteria, when third-party excavation occurs nearby.

The Department has taken measures to address the potential safety hazards posed by unused service lines. The Department has updated existing regulations requiring the abandonment of unused lines. The regulations also specify more stringent gas leakage survey methods for operating lines.

### **2014 Pipeline Safety Division Accomplishments**

In Summary, the Pipeline Safety Division in 2014:

- Conducted gas facility inspections, resulting in the issuance of 9 compliance actions for violations of pipeline safety regulations, assessed \$490,000, and has collected to date \$630,000 in civil penalties from operators who violated the pipeline safety regulations.
- Investigated 828 reports of Dig Safe violations and has issued to date 834 Notices of Probable Violation for violations against the Dig Safe Law, and has collected to date \$1,148,000 in civil penalties from Dig Safe violators.
- Tested approximately 199,255 gas meters, thereby collecting \$1,992,550 in meter testing fees.

Initiated investigations of one gas-related incident.

## **Rates and Revenue Requirements Division**

### **Overview**

The Rates and Revenue Requirements Division (“Rates Division”) is responsible for providing the technical expertise to determine the appropriate levels of revenues to recover through rates, and determining the rate design for the five investor-owned electric companies, eight investor-owned gas companies, and seventeen investor-owned water companies conducting business in Massachusetts. The technical support provided by the Rates Division includes expertise in economics, finance, accounting, and public policy.

The Rates Division assists the Department’s Legal Division in developing the evidentiary record in adjudicatory proceedings concerning the rates and finances of the investor-owned natural gas, electric, and water companies doing business in Massachusetts. The Department’s decisions in these proceedings are directly appealable to the Supreme Judicial Court under G.L. c. 25, § 5.

The regulation of the natural gas, electric, and water industries requires the Rates Division to:

- Analyze electric utility restructuring-related filings including reconciliation of basic/default service, transmission and transition costs and revenues;
- Analyze requests to change base distribution rates through historic test year cost-of-service regulation, as well as Offers of Settlement regarding base distribution rates;
- Analyze Revenue Decoupling proposals;
- Analyze financing petitions (issuing securities);
- Analyze mergers and acquisitions proposals;
- Assist in determining the annual assessment of electric, gas and water utilities;
- Analyze municipal streetlight purchase agreements;
- Assist the Electric Power Division in implementing the provisions of the Green Communities Act, the Energy Act of 2012, retail power supply markets, and service quality investigations where expertise in rates is needed;
- Provide information and assistance to the public, government agencies, press, private industries, and other government officials where expertise in rates is needed.

### **Review of Electric Utility Restructuring-Related Filings**

As part of the continued implementation of the Electric Restructuring Act, the Department annually conducts a reconciliation (or true-up) and adjustment to the rate for each electric company's transition, basic service, and transmission factors. Under the Electric Restructuring Act, each electric distribution company may collect (1) those stranded or transition costs associated with divesting its generation business that it cannot mitigate; (2) the costs it incurs to procure electric power to meet its basic service obligations; and (3) the costs it incurs on behalf of its retail customers to provide transmission service. In a true-up, the Rates Division evaluates the costs and revenues that each electric distribution company proposes to reconcile to determine if they meet the requirements of the Restructuring Act and its restructuring plan.

### **Review of Requests to Change Base Rates**

The Rates Division investigates petitions to change base rates as follows:

- Reviewing the filings
- Participating in informal technical conferences
- Issuing information requests to the Company and Intervenors
- Drafting pre-hearing memoranda for the Commission
- Cross-examining Company and Intervenor witnesses during hearings
- Developing the evidentiary record
- Developing and discussing with the Commission various options for resolution of issues
- Preparing Draft Orders per the directives from the Commission
- Review and approve compliance filings

Changes to base rates are based on historic test year cost-of-service regulation. The Department sets rates using cost-of-service pricing principles where electric, gas, and water rates are based upon the cost to serve various classes of ratepayers. Under cost-of-service pricing, the Rates Division reviews the costs incurred by utility companies during a historic test year adjusted for known and measurable changes to determine the reasonableness of such costs and to determine whether they were prudently incurred. The categories of costs include the company's annual operation and maintenance expenses, capital investments, and rates of return for shareholders (i.e., return on equity). Appropriate annual expenses plus a return on undepreciated rate base

(i.e., return on net capital investment) make up the company's cost of service or the revenue requirement upon which rate structures must be designed to recover.

Once the company's cost of service has been determined, a rate structure must be established that affords the company a reasonable opportunity to earn its allowed rate of return while meeting other policy goals. Rate structure is the level and pattern of prices that customers are charged for the use of utility services. A customer class rate structure is a function of the cost of serving that rate class and the design of rates calculated to cover that cost. In setting rates, the Department balances its goals for utility rate structure by taking into consideration multiple factors such as economic efficiency, energy efficiency, continuity, fairness, earnings stability, and simplicity. For water companies, the traditional review of rate cases through adjudicatory proceedings is not always cost-effective because the administrative costs of preparing and litigating a rate case for a small water company can equal or exceed the rate relief sought. To streamline the regulatory process, the Department has created a Settlement Intervention Staff, or SIS, comprised of Rates Division staff and Legal Division staff, that independently reviews rate requests and conducts off-the-record negotiations with water company officials and intervenors. The Settlement Intervention Staff does not have direct communication with the Commission regarding pending cases. Rather, the Settlement Intervention Staff and the other parties on the case may submit a proposed rate settlement to the Commission. An Adjudicatory Team comprised of Rates Division and Legal Division staff review the proposed settlement and make recommendations to the Commission. The Commission may approve the settlement, return it to the settling parties with suggested modifications, or reject it with or without subsequent evidentiary hearings. To date, this process has saved the Department, water companies, and ratepayers considerable amounts of time, resources, and expenses.

The Department's regulatory authority over investor-owned water systems is in certain areas concurrent with that of the Massachusetts Department of Environmental Protection ("MDEP"). In situations where cross-over issues are involved, such as in water conservation and adequacy of service, Rates Division staff work with staff at the MDEP to ensure that the provisions of the agencies' respective duties are implemented in a harmonious manner.

Replacement of gas infrastructure through a mechanism known as the Targeted Infrastructure Reinvestment Factor, or TIRF, allows gas companies accelerated recovery through retail rates of the cost to replace leak-prone mains and services pursuant to the recovery plan approved by the Department in its last base rate case. Annual recovery of the revenue requirement associated with these investments is approved subject to further review.

### **Green Community Act Legislation Initiatives**

In response to the Green Community Act requirements, the Rates Division reviewed long-term purchase power contracts for renewable energy (wind power), analyzed solar installation programs, smart grid pilot programs, as well as assisted the Department's Electric Power Division in establishing net metering tariffs.

## **2012 Energy Legislation**

In 2012, legislation was passed that focused on energy issues in the Commonwealth. In response to this legislation, Rate Division staff spent considerable time developing a plan for addressing the provisions of the legislation that directly deal with work performed by the Rates Division, such as Section 51, which requires that reconciling factors be cost-based.

### **Review of Requests to Change Reconciling Rates**

In addition to reviewing changes to base rates, the Rates Division is responsible for reviewing proposed rate changes to items for which the Companies are allowed to collect their actual costs (*i.e.*, where dollar-for-dollar recovery is intended). These items include the pension and post-retirement benefit adjustment factors, PAFs, and the Residential Assistance Adjustment Factors, or RAAFs. (PAFs are factors designed to annually recover a company's costs related to providing their employees with pensions. RAAFs are designed to recover costs related to low-income discounts and arrearage management programs). Further, the Department has approved, where appropriate, storm cost recovery adjustment factors to recover costs associated with major storms. The annual cable surcharge for Nantucket Electric is also a reconciling rate mechanism that is reviewed by the Rates Division. Additionally, pursuant to a Department approved settlement, the Department reviews on an annual basis the recovery of costs associated with NSTAR Electric's Capital Projects Scheduling List, or CPSL, that recovers costs associated with measures NSTAR has taken to mitigate the occurrence of stray voltage, to inspect manholes, and to reduce the amount of double utility poles in its service area.

Another reconciling factor is the Revenue Decoupling Mechanism, or RDM, that allows the electric and gas companies to reconcile the revenues collected from base distribution rates with the revenue requirement approved by the Department in its last base rate case, pursuant to the revenue decoupling plan approved by the Department. RDM adjustments are filed annually for the electric companies and semi-annually for the gas companies. Further, for National Grid's electric subsidiaries, the Department approved a Capital Expenditure, or Cap-Ex, Mechanism that allows National Grid to recover the revenue requirement associated with a pre-determined amount of its annual capital investment incurred since its prior rate case.

### **Review of Financing Requests**

The Rates Division is also responsible for the review of financing petitions. Financing petitions include the issuance of debt or equity securities, as well as investment of funds or guaranteeing the indebtedness of other companies. The primary focus in such cases is to carry out statutory mandates that require utilities to issue only those securities reasonably necessary for utility operations and to avoid overcapitalization. During 2014, the Rates Divisions evaluated and approved three financing petitions for a total of \$850,500,000.

### **Review of Mergers and Acquisitions**

Pursuant to G.L. c. 164, § 96, the Rates Division reviews all intrastate merger and acquisition proposals that are filed with the Department to determine if they are in the ratepayers' best interests. The Rates Division analyzes the proposal's effect on:

- Rates
- Service Quality
- Net Savings
- Competition
- The financial integrity of the post-merger entity
- Fairness in the distribution of resulting benefits between shareholders and ratepayers
- Societal effects such as job loss and economic development
- Long-term strategies to ensure a reliable and cost-effective delivery system
- Any anticipated disruption in service
- Other factors that may negatively affect customer service

### **Coordination of Annual Assessments**

Pursuant to G.L. c. 25, § 18, electric and gas companies that do business in Massachusetts are subject to an annual assessment on a percentage of their intrastate revenues. The Rates Division is responsible for gathering the revenue figures for the electric and gas utilities.

### **Review of Retail Electric Contracts**

The Rates Division is responsible for the mandatory review of negotiated electric contracts between electric distribution companies and retail customers. Such contracts are evaluated to ensure consistency with Department standards. The onset of competitive options for generation service for industrial customers has reduced the number of requests for electric contracts in recent years.

### **Review of Utility Accounting Matters**

Utility companies are required to maintain their books in accordance with Department regulation. To maintain uniformity of accounting, utilities are required to submit questions

concerning the appropriate interpretation of the Department's accounting regulations to the Department. The Rates Division also reviews requests involving accounting practices, including requests by companies to defer expenses on their books for later review in a base rate proceeding. The Rates Division also supports challenges to the Department's decisions that are appealed to the Massachusetts Supreme Judicial Court.

### **Oversight of Municipal Utilities**

The Department's role in regulating municipal light plants is limited in comparison to the jurisdiction exercised over investor-owned utilities. Municipal light plant rates are set by public officials acting under legislative mandate and therefore do not require the close scrutiny and measure of Department supervision that is authorized or required in the case of investor-owned utilities. For example, the Department does not have authority over municipal light plant financing, and does not have authority to suspend and investigate the rates of municipal light plants. The Department generally defers to the ratemaking authority and policies vested by statute in the municipality unless the rates are prohibited by statute or rise to the level of undue discrimination.

The Department's jurisdiction over municipal light plants can be summarized as follows:

- requiring annual returns pursuant to General Laws ("G.L.") c. 164, § 63;  
1.
- requiring that accounting records be maintained in accordance with the Department's Uniform System of Accounts pursuant to G.L. c. 164, § 63;  
2.
- requiring rate filings pursuant to G.L. c. 164, §§ 58, 59;  
3.
- reviewing and approving changes in depreciation accrual rates from the statutory permitted 3.0 percent set forth in G.L. c. 164, § 57;  
4.
- requiring compliance with the Department's billing and termination regulations in accordance with 220 C.M.R. §§ 25.00 et seq.; and  
5.
- hearing petitions from customers who have been denied service, pursuant to G.L. c. 164, § 60.  
6.

The Department does not have any jurisdiction over the municipal light plant in Gosnold. While this system is subject to the requirements of G.L. c. 164, Gosnold was exempted from Department oversight by special legislation in 1936 and 1941. Similarly, the Department does

not exercise any jurisdiction over Devens Utilities, a combination gas/electric/water/wastewater system operated by the Massachusetts Development Finance Agency (“MDFA”) that serves the Devens Economic Area at the site of the former Fort Devens. The MDFA is authorized pursuant to G.L. c. 23G, § 3 to provide utility services to the former Fort Devens facility; § 31 of the 1998 enabling act exempts the MDFA as a quasi government agency from any state oversight of its utility rates.

### **Review of Municipal Depreciation Requests**

Pursuant to G.L. c. 164, § 57, municipal utilities are allowed to include in their rates an annual provision for depreciation expense equal to three percent of depreciable plant (plant less land and land rights), unless otherwise allowed by the Department. Because municipal utilities rely on depreciation funds as a source of funds for plant improvements and expansions without resorting to outside financing, municipal utilities may seek authorization to increase their depreciation rate for a particular year. During 2013, the Rates Division evaluated and approved eight requests for increases in municipal depreciation rates.

### **Review of Customer Complaints**

The Rates Division provides assistance to the Department’s Consumer Division in the review of rate and billing disputes by residential customers. In addition, because billing disputes by commercial and industrial customers are not generally handled by the Consumer Division, the Rates Division, has, at times, provided informal assistance in resolving these billing disputes, primarily through review and interpretation of the applicable tariffs.

### **Public Information**

Another important responsibility of the Rates Division is to provide timely and accurate information to the public regarding activities in the electric, gas, and water industries. This task requires working with other regulatory agencies, consumer groups, public interest groups, power suppliers, and utility companies to help them understand Department regulations and policies. The Rates Division also assists in the development of agency regulations to address the changing circumstances in the utility industry such as electric industry restructuring, gas unbundling, and new financial accounting standards. The Rates Division also works with the Department’s Consumer Division to respond to consumer complaints and to draft policy recommendations regarding consumer issues.

## 2014 Rates Division Major Activities

During 2014 the Rates Division actively participated in the following significant filings:

- Plymouth Water Company, D.P.U. #14-120. Rate Case
- NStar Gas, D.P.U. #14-150. Rate Case
- Aquarion Water Company, D.P.U. #14-58. Financing
- Boston Gas and Colonial Gas d/b/a National Grid – Gas, D.P.U. #14-76  
Targeted Infrastructure Reinvestment Factor (TIRF)
- New England Gas d/b/a Liberty Utilities, D.P.U. #14-82  
Targeted Infrastructure Reinvestment Factor (TIRF)
- Bay State Gas d/b/a Columbia Gas, D.P.U. #14-83  
Targeted Infrastructure Reinvestment Factor (TIRF)
- Fitchburgh Gas and Electric, D.P.U. #14-130. Gas System Enhancement Program (GSEP)
- Berkshire Gas, D.P.U. #14-131. Gas System Enhancement Program (GSEP)
- Boston Gas and Colonial Gas d/b/a National Grid – Gas, D.P.U. #14-132  
Gas System Enhancement Program (GSEP)
- New England Gas d/b/a Liberty Utilities, D.P.U. #14-133  
Gas System Enhancement Program (GSEP)
- Bay State Gas d/b/a Columbia Gas, D.P.U. #14-134  
Gas System Enhancement Program (GSEP)
- NStar Gas, D.P.U. #14-135. Gas System Enhancement Program (GSEP)
- Massachusetts Electric and Nantucket Electric d/b/a National Grid – Electric,  
D.P.U. #14-85. Storm Fund Cost Recovery
- Western Massachusetts Electric, D.P.U. #14-126. Storm Fund Cost Recovery
- Massachusetts Electric and Nantucket Electric d/b/a National Grid – Electric,  
D.P.U. #14-84. Grid Modernization (Grid-Mod)

NStar Electric, D.P.U. #14-117. Grid Modernization (Grid-Mod)

## **Energy Facilities Siting Board and Department Siting Division**

### **Overview**

The Energy Facilities Siting Board (“Siting Board”) is a nine-member board charged with reviewing certain proposed energy facilities so as to provide “a reliable energy supply for the Commonwealth with a minimum impact on the environment at the lowest possible cost.” The Siting Board’s primary function is to review, and where appropriate, issue certificates, zoning exemptions, and other approvals necessary for the construction of major energy infrastructure in Massachusetts, including large power plants, electric transmission lines, natural gas pipelines, and natural gas storage facilities. The Siting Board also has the authority to relieve unwarranted regulatory obstacles to the construction of necessary energy infrastructure by issuing or altering the terms of other state and local permits.

Administratively, the Siting Board is located within the Department but by statute, it is not subject to Department supervision or control. The nine-member Board is comprised of the Secretary of Energy and Environmental Affairs, who is the Chairman of the Board, the Secretary of Housing and Economic Development, the Commissioner of the Department of Environmental Protection, the Commissioner of the Department of Energy Resources, two Commissioners of the Department of Public Utilities, and three public members appointed by the Governor for a term coterminous with that of the Governor.

The Siting Board is staffed by members of the Department’s Siting Division. Siting Division responsibilities to the Siting Board and to the Department require its staff to:

- Adjudicate petitions to site and construct major energy infrastructure;
- Represent the Commonwealth in proceedings before FERC with respect to energy facilities to be sited in Massachusetts;
- Adjudicate petitions by public service corporations for exemptions from local zoning requirements;
- Adjudicate petitions by utility companies for eminent domain and for land survey access;
- Adjudicate petitions for override of state and local permits, licenses, or other requirements;
- Adjudicate petitions by electric companies for approval to construct transmission lines; and
- Enforce decisions of the Siting Board through the issuance of orders and civil penalties.

A list of Siting Board decisions and Department Siting Division orders from 2014 is attached as Appendix 1.

## **Siting Board Responsibilities**

### **Overview**

The Siting Board reviews petitions to construct major new energy infrastructure, including power plants, electric transmission lines, natural gas pipelines, and natural gas and fuel oil storage facilities. G.L. c. 164, §§ 69 G-S. Siting Board review is conducted by means of a formal adjudicatory proceeding in accordance with G.L. c. 30A. Final decisions of the Siting Board are appealable directly to the Massachusetts Supreme Judicial Court.

The Siting Board's review of most types of energy infrastructure encompasses the need for the facility, alternative means of meeting that need, alternative sites, and environmental impacts and costs; however, since restructuring of the electric utility industry in 1997, the Board's review of power plants is generally limited to potential environmental impacts. The Siting Board's environmental review covers a broad range of issues, including: (1) potential impacts of a project on air quality, land use, water resources, noise, visual impacts, habitat areas, flora and fauna, safety, and health; (2) impact mitigation measures; and (3) the cost of impact mitigation. Siting Board decisions typically represent a balancing of cost, local and regional environmental impacts, and the benefits of the project in terms of contributing to a reliable energy supply.

### **Review of Generation Facilities**

On October 10, 2013, the Siting Board in EFSB 12-2 approved a Petition to Construct submitted by Footprint Power Salem Harbor Development LP for a proposed new 630 megawatt (692 MW maximum output with duct firing) combined-cycle natural gas-fired power plant at the site of the current coal- and oil-fired Salem Harbor Station (retired on June 1, 2014). The Conservation Law Foundation (CLF) appealed the Footprint Final Decision to the Supreme Judicial Court ("SJC") in November 2013. Siting Board staff prepared and submitted the docket records to the SJC and staff assisted the Office of the Attorney General in her preparations to represent the Board before the SJC. The Attorney General filed a Brief with the SJC on February 18, 2014 defending the Board's Decision. Prior to oral arguments at the SJC, CLF and Footprint Power entered into a settlement agreement resolving the appeal.

In response to an appeal of the City of Salem's zoning approvals by two Salem residents, Footprint filed an Initial Petition for a Certificate of Environmental Impact and Public Interest ("Certificate") on August 5, 2013 seeking Siting Board issuance of all state and local permits and approvals for the project. Footprint subsequently filed its Application for a Certificate on October 11, 2013. Beginning in October and continuing through the end of 2013, the case proceeded through discovery, evidentiary hearings, and submission of briefs. On February 20, 2014, the Siting Board met to review a Tentative Decision and approved the issuance of the Certificate with conditions. Of note, the Siting Board decided that the Prevention of Significant Deterioration (PSD) air permit, could not be included in the Certificate as it is a federal permit

and the Board's Certificate authority is limited to issuance of state and local permits and approvals. Separately, two Salem residents appealed the final PSD permit (issued by MassDEP) to the US EPA's Environmental Appeals Board, which eventually denied the appellants' petition for review of the Final PSD permit in all respects.

The Siting Division assisted the Division of Regional and Federal Affairs in preparing comments in support of a rule change by ISO-NE that would allow a generation facility, such as Footprint Power, to seek a one-year delay in its required deadline to meet a contractual Capacity Supply Obligation given extenuating circumstances (such as permit appeals and other delays) that are beyond the reasonable control of the project developer. FERC approved this ISO-NE Forward Capacity Market rule change, and subsequently allowed Footprint to defer its capacity supply obligation by one year, to June 1, 2017. Following the aforementioned favorable permit and regulatory outcomes, Footprint announced on January 9, 2015 that it had closed on its project financing and would commence construction of the new facility; Footprint had already demolished most of the old coal-fired plant and begun site remediation.

Siting Board staff continued to assist the Office of the Attorney General during 2014 in connection with the ongoing appeals to the SJC of the Siting Board's Final Decisions regarding a 350 MW power plant proposed for construction in Brockton by Brockton Power Company LLC (EFSB 07-7/D.P.U. 07-58/59 and EFSB 07-7A/D.P.U. 07-58/59). Staff assisted the Office of Attorney General in its preparation of various motions and briefs leading to oral arguments before the SJC in March of 2014. On July 31, 2014, the SJC issued decisions upholding the Siting Board's decisions on the three related Brockton Power appeals cases.

### **Review of Transmission Facilities**

At the start of 2014, there were two transmission projects pending before the Siting Board, both petitions of New England Power Company d/b/a National Grid. The Interstate Reliability Project (IRP) is a 75-mile 345 kV overhead transmission line that would run from Millbury, Massachusetts to North Smithfield, Rhode Island, and then terminate in Lebanon, Connecticut. The Massachusetts portion of IRP is approximately 15 miles, with the proposed route along existing right-of-way in the towns of Millbury, Sutton, Northbridge, Uxbridge and Millville. The Company also sought individual and comprehensive local zoning exemptions under the Board's delegated Department authority. The Siting Board approved IRP with conditions on May 16, 2014 in EFSB 12-1/DPU 12-46/47.

National Grid's other transmission petition, EFSB 13-2/DPU 13-151/152, known as the Salem Cables Project, involves the proposed removal of two 115 kV underground transmission lines in the downtown area of the City of Salem and their replacement with two new underground 115 kV transmission lines running between Salem Harbor Substation and Canal Street Substation in Salem. National Grid also filed for individual and comprehensive zoning exemptions from the Salem Zoning Ordinance and for approval of the transmission lines pursuant to G.L. c. 164, §72. In addition to replacing the existing cables that are obsolete and difficult to maintain, the project would provide a more robust interconnection from the proposed Footprint Power facility to the regional power grid and facilitate greater deliverability of Footprint's capacity. On November

14, 2014, the Siting Board issued a Final Decision approving the Salem Cables Project, with conditions.

Three additional transmission-related Siting Board cases were filed in 2014. On April 28, 2014 NSTAR Electric Company filed a petition to construct a new 115 kV transmission line on an existing right-of-way between Walpole and Holbrook and construct a new switching station in Sharon. Given the ongoing review of this project by ISO-NE in the Greater Boston Reliability Study, staff deferred discovery on the filing until the ISO-NE review confirms the project need and its continued selection as the preferred solution; a conclusion of the ISO-NE studies is anticipated in early 2015.

In a filing on August 8, 2014 (docketed as EFSB 02-2B/EFSB 07-8A) Cape Wind and NSTAR Electric Company submitted for Siting Board review proposed changes to the Barnstable Switching Station to accommodate the interconnection requirements of the Cape Wind project, as delineated by ISO-NE. The 18.4-mile transmission line from the proposed Cape Wind off-shore wind farm to the existing Barnstable Switching Station had been previously approved by the Siting Board in prior cases. The project change submission consisted of new equipment required at the Switching Station and enlargement of the site to accommodate the equipment. On November 17, 2014, the Siting Board approved the proposed project change, with conditions. On December 5, 2014, the Town of Barnstable and the Barnstable Fire District appealed the Siting Board's decision to the SJC, and the case is currently pending.

On December 23, 2014, NSTAR Electric Company submitted a petition to the Siting Board for approval to construct two new 115 kV underground transmission lines in the cities of Boston, Everett and Chelsea and to build a new substation in Boston, as well as modify existing substations in Chelsea and Everett. As part of the filing, the Company also sought exemptions from the City of Boston's zoning ordinances. The case was docketed as EFSB 14-4/DPU 12-128/129 and is currently in progress.

### **Review of Natural Gas Pipelines and Storage Facilities**

The Siting Board continued its review of a Project Change Filing (PCF) made by the Colonial Gas Company d/b/a National Grid regarding a gas pipeline previously approved by the Siting Board for construction in Sandwich and several other Cape Cod municipalities. The Company proposed the PCF in response to concerns expressed by various officials of the Town of Sandwich regarding the density of utilities within the Service Road layout where the Siting Board originally approved the pipeline for construction. The PCF (docketed as EFSB 05-2A) was approved by the Siting Board, with conditions, in a Final Decision issued on August 14, 2014.

In a submission to the Siting Board on April 10, 2014, the University of Massachusetts at Amherst requested that the Board confirm that it could continue to operate its temporary LNG storage facility indefinitely without need of Siting Board approval. UMASS later modified the request to seek permission to continue operating the temporary LNG storage facility, with up to 30,000 gallons of storage, through the winter of 2016/2017. In a Supplemental Advisory Ruling

issued on August 14, 2014, the Siting Board advised UMASS that the storage facility, as described in the filing, could continue to operate through the 2016/2017 winter season without requiring Board approval.

On February 21, 2014, Boston Gas filed a petition seeking a determination as to whether the Company's proposed installation of new liquefaction equipment at its Commercial Point LNG facility would be subject to Siting Board jurisdiction and therefore require Board approval. Based on its review of the filing, the Siting Board found that the project would not constitute a "facility" under the definition used in the Siting Board's statutes and regulations, and therefore, no approval was needed from the Siting Board for construction of the proposed liquefaction equipment. The Final Decision in EFSB 14-1 was issued on August 14, 2014.

### **Federal Licensing Proceedings**

The Siting Board represents the Commonwealth in proceedings before federal agencies such as FERC with respect to the construction of energy facilities in Massachusetts. In 2013, Algonquin Gas Transmission (Algonquin) proposed the Algonquin Incremental Market (AIM) Project, an expansion of its existing pipeline system in New York, Connecticut, Rhode Island and Massachusetts. In Massachusetts, AIM would include 4.9 miles of new pipeline and other related facilities in the towns of Westwood, Dedham and the West Roxbury sections of Boston. Algonquin participated in FERC's pre-filing process, during which the EFSB submitted comments and held a public comment hearing in Dedham in December 2013. On February 28, 2014, Algonquin filed its Certificate application with FERC seeking approval to construct, own and operate the AIM pipeline. The Siting Board intervened in this case and continued to participate actively, attending public meetings and submitting various rounds of written comments to FERC. A Final Environmental Impact Statement is due to be issued by FERC in early 2015, and a final Order regarding the Certificate sometime thereafter.

In connection with the Footprint Power project in the City of Salem, Algonquin initiated a FERC pre-filing process in 2013 for the construction of a 1.2-mile, 16-inch diameter pipeline (Salem Lateral) and a new metering and regulation station in Salem. The Salem Lateral would have a sub-sea tie in to the existing Hubline Pipeline in Beverly Harbor and connect to the site of the proposed Footprint Power plant. The pre-filing process was completed in early 2014, and Algonquin filed a Certificate application on July 10, 2014. On December 2, 2014 the FERC issued its Environmental Assessment for the proposed project. A decision from FERC on the Certificate application is expected sometime in early 2015.

Another FERC jurisdictional pipeline proposal being addressed by the Siting Board is Tennessee Gas Pipeline's Connecticut Expansion Project, CP 14-529-000 that would involve new pipeline in the Town of Sandisfield. The Siting Board intervened in this proceeding (which was not conducting using the FERC pre-filing process) and has submitted written comments and continues to follow the matter closely.

Perhaps the mostly widely publicized new pipeline proposal in 2014 is Tennessee Gas Pipeline's Northeast Energy Direct Pipeline (NED), submitted for "pre-filing" at FERC on September 15,

2014; NED would involve a new pipeline originating in the Marcellus Shale region of Pennsylvania, continuing through New York State into Massachusetts and New Hampshire before terminating at Dracut. NED is proposed as either a 30- or 36-inch pipeline capable of bringing up to 2.2 billion cubic feet per day (bcf/d) of natural gas into New England. Tennessee has announced that it has obtained 500 million cubic feet per day of commercial commitments called “precedent agreements.” NED’s 115.4-miles of Massachusetts pipe sections include 63.7 miles of mainline and 51.7 miles of lateral lines.

In response to public concerns, Tennessee significantly revised the project by: (1) routing a significant portion of the pipeline in southern New Hampshire (although many Berkshire and Franklin County towns in Massachusetts would still be affected); (2) using existing electric transmission line corridors (almost exclusively) to reduce environmental impacts; (3) reducing the extent of Article 97 state lands (e.g. parks, wildlife areas, etc.) and the number of affected landowner properties in general. There are many steps ahead for the proposal during the pre-filing and certificate phases, expected to run through at least 2016.

### **Permit Override Authority**

Through the granting of a Certificate of Environmental Impact and Public Interest, the Siting Board has the authority to override a state or local ordinance, permit requirement, license, or other “burdensome condition or limitation” that would unduly delay or prevent construction of an energy facility approved by the Board. G.L. c. 164, §§ 69K-69O. A facility developer may also apply for a Certificate if it determines there are inconsistencies among resource use permits issued by state or local agencies. As noted above, Footprint Power received a Certificate from the Siting Board in connection with its proposed power plant in Salem.

### **Enforcement**

The Siting Board is authorized to levy a civil penalty when an applicant has violated any order of the Board. G.L. c. 164, § 69H. The maximum fine is \$1,000 per day per violation, with a maximum civil penalty of \$200,000 for any related series of violations. The Siting Board did not levy any civil penalties in 2014.

### **Siting Board Regulations**

The regulations of the Siting Board are contained in 980 C.M.R. §§ 1.00-12.00. In 2014, no new regulations were promulgated, nor were any rescinded or modified. GL c. 30A, § 5A requires state agencies to produce a small business impact statement for existing regulations that are twelve years old or older in order to evaluate whether the regulation continues to be necessary and to consider the economic impacts of that regulation on small businesses. In 2014, the Siting Division participated in an ongoing effort across state government to identify regulations that have potentially adverse effects on small businesses in the Commonwealth and are no longer necessary or useful for their intended purposes.

### **Participation in Regional Transmission Planning Activities**

Siting Division staff, along with the Division of Federal and Regional Affairs staff at the Department, participated in efforts by NESCOE and ISO-NE to better understand existing regional transmission planning procedures and identify areas where new approaches could be beneficial. Siting Division staff were actively involved in reviewing ISO-NE's Draft Planning Technical Guide and offering comments and suggestions on successive drafts. Division staff also attended ISO-NE training sessions on Regional System Planning as well as related meetings, conferences, webinars and workshops. Staff also reviewed and commented on NESCOE's Non-Transmission Alternatives (NTA) Framework.

### **Department Siting Division Responsibilities**

The Siting Division, comprised of attorneys and technical analysts, performs the staff work for the Siting Board under its statutory mandates. In addition, the Siting Division handles a variety of land use cases for the Department, including petitions for zoning exemptions, for authority to exercise eminent domain, and for permission to construct transmission lines that may be below Siting Board review thresholds.

### **Zoning Exemption Review**

State law authorizes the Department to exempt public service corporations from compliance with specific municipal zoning ordinances or by-laws if it determines that the present or proposed use of the land or structure is reasonably necessary for the convenience or welfare of the public. G.L. c. 40A, § 3. The Siting Division adjudicates these cases for the Department. In several cases (described below under Electric Transmission Facilities) zoning exemptions are sought in conjunction with Section 72 approvals from the Department.

### **Electric Transmission Facilities**

G.L. c. 164, § 72, requires electric companies to obtain Department approval prior to the construction or alteration of transmission lines. To receive such approval, the electric company must show that the proposed project is needed and that it serves "the public convenience and is consistent with the public interest." The Siting Division typically adjudicates these petitions on behalf of the Department.

In D.P.U. 13-64, NSTAR requested exemptions from the Zoning Ordinance of the Town of Barnstable in order to expand its existing Hyannis Junction substation by installing additional electrical equipment and a new 115kV/23kV step-down transformer. The company also proposed reconductoring one mile of 115 kV transmission line, and installing a new 23 kV distribution feeder line. A Settlement Agreement between NSTAR and the Town of Barnstable was reached regarding measures to be taken to protect drinking and other water resources from potential contamination. The Department issued an Order granting the requesting zoning exemptions, with conditions, on March 18, 2014.

In DPU 13-86, NSTAR requested a Section 72 approval from the Department to construct two new 115 kV underground transmission lines extending 4,933 feet in length from the K Street Substation in South Boston to a connection point within the median of Columbia Road near its intersection with G Street, also in South Boston. The Department issued an Order on November 4, 2014, approving the project with conditions.

In DPU 13-126/13-127, NSTAR requested both Section 72 approval and a zoning exemption to construct a new transmission switching station and distribution substation on Electric Avenue in the North Brighton neighborhood of Boston in addition to two new looped 115 kV underground transmission lines to connect existing NSTAR facilities with the new Electric Avenue substation. In conjunction with the project, NSTAR also proposed to install 30,000 feet of underground duct banks within 16,500 linear feet of road to house new distribution (not transmission) lines. The project and additional facilities are needed to more reliably supply current and future load requirements for portions of Watertown, Newton, Brighton, Allston and the Longwood Medical area. The Department issued an Order on September 26, 2014 approving the project with conditions.

In late 2013, DPU 13-177/178 NSTAR submitted a petition to construct a new substation on a parcel of company-owned land on Seafood Way in South Boston and also loop two of its existing 115 kV transmission lines from Northern Avenue into the new substation. The company requested both Section 72 approval and zoning exemptions from the Department. NSTAR indicated that a rebounding economy as well as the need to maintain and improve service reliability are important factors driving the submission of this facility proposal. The Department approved the project, with conditions, on January 7, 2015.

At year's end, a number of transmission-related DPU cases were still in progress, including for NSTAR/WMECO/NU: the Barnstable-Harwich Tap 115 kV line (DPU 14-08); a modification at the Mashpee Substation requiring a zoning exemption (DPU 14-03); a 115 kV underground transmission line in Cambridge and Belmont and related zoning exemptions for a new substation in Belmont (DPU 14-55/56); and a 115 kV transmission line and new switching station in Northfield and Erving (DPU 14-187/188). National Grid had the following cases pending at year's end: DPU 14-128/129, a petition to construct two new 115 kV transmission lines in the towns of Greenfield and Montague; and, as a co-petitioner with NU in DPU 14-128/129, mentioned above.

### **Eminent Domain and Survey Access**

On behalf of the Department, the Siting Division adjudicates petitions by electric, natural gas, water, and railroad companies for the right to exercise the power of eminent domain to meet their public service obligations. G.L. c. 164, §§ 72, 72A; G.L. c. 160, § 83. To grant eminent domain, the Department must determine that the project is necessary for the purpose alleged, will serve the public convenience, and is consistent with the public interest. No eminent domain petitions were filed with or reviewed by the Siting Division during 2014.

The Siting Division also administers the Department's authority to grant permission to electric, natural gas, and water companies to enter private lands for the purpose of making a survey in preparation of an application for facility construction or prior to initiating a request for an eminent domain proceeding. Tennessee Gas Pipeline filed a request with the Department in DPU 13-166 for authorization to survey land at a residential location in Sandisfield, Massachusetts. The petition was approved with conditions by the Department on February 18, 2014.

#### **Assistance to Other Department Divisions**

In 2014, the Siting Division provided technical and legal support to other Department divisions to assist with ongoing cases and special projects, as needed. In particular, several members of the Siting Division contributed to the Department's involvement in projects or studies or legislative proposals relating to the need for additional generating capacity in the NEMA/Boston area, and the New England market, in general.

## **Transportation Oversight Division**

### **Overview**

The Transportation Oversight Division regulates the rates and practices of common carriers used to transport passengers and property, including trucks, railways, buses, household moving companies, towing companies, and hazardous waste companies. In addition, the Transportation Oversight Division licenses all intra-state Massachusetts-based motor bus companies. The Transportation Oversight Division investigates and may hold fitness hearings after a consumer complaint, a driving violation, or an accident involving a common carrier. Undoubtedly, the most critical function of the Transportation Oversight Division is public safety. The other major responsibility of the Transportation Oversight Division is consumer protection.

Although no assessments are levied against regulated common carriers, these companies are subject to fees for services such as licensing, inspection, and examination. These revenues are not retained by the Department, but are deposited directly into the Commonwealth's General Fund. During 2014, the Transportation Oversight Division generated approximately \$483,490 in revenues, which was deposited into the General Fund.

### **Critical Public Safety Functions**

In accordance with the provisions of G.L. c.90, § 8A, and G.L. c.159A, § 9, the Transportation Oversight Division issues School Bus Driver Certificates and Motor Bus Driver Certificates. During 2014, the Transportation Oversight Division issued over 912 new school bus driver certificates. Ensuring a cadre of reliable school bus drivers is essential to children's safety. The Transportation Oversight Division licenses all school bus drivers in Massachusetts after (1) reviewing a physician's exam, (2) evaluating driving records, (3) performing a criminal record check and Sex Offender Registry Review, and (4) administering a three-part driving skills test. The Transportation Oversight Division works with the Registry of Motor Vehicles ("RMV") and the school bus industry to set standards for school bus drivers as well as providing other commercial driver training and qualification requirements.

#### **School Bus Driver Certificates and Motor Bus Driver Certificates issued in 2014**

School Bus Driver Certificates: (New and Renewals)	11,223
Motor Bus Driver Certificates:	1,982
Total Certificates Issued:	13,205

### **On-Site School Bus Driver Compliance Reviews**

In cooperation with the RMV, Transportation Oversight Division staff performs periodic, random compliance reviews of school bus drivers. These reviews are conducted on-site, at

schools, and are arranged so as not to interfere with the school day. Transportation Oversight Division staff reviews the driver's license and certification while an RMV official conducts a safety inspection of the school bus.

During calendar year 2014, a statewide compliance review was performed in the month of October:

<u>Companies Reviewed</u>	<u>Drivers Reviewed</u>	<u>Total Violations Identified</u>
October 29	337	80 (2 Driver/78 Bus minor defects)

### **Destination Specific Compliance Inspections**

Under a Memorandum of Understanding (MOU) with the Massachusetts State Police Truck Team the Transportation Oversight Division Bus Inspectors perform Joint Passenger Carrier Compliance Inspections at various destinations checking passenger for-hire vehicles, motor coaches and drivers. The inspections are conducted at multiple locations throughout the commonwealth at sites with high frequency of subject vehicles. For example, South Station, Logan Airport, Jiminy Peak, Wachusett Ski Mountain, The Big "E" and Six Flags New England. Working with the State Police and the Federal Motor Carrier Safety Administration (FMCSA), the compliance schedule is created quarterly to reflect seasonal trends specific to various programs scheduled throughout the calendar year in the state. The target locations and times are designed to prevent passenger disruption where ever possible. There are (1) to (2) passenger carrier compliance checks scheduled weekly. The program is funded through the Unified Carrier Registration Program (UCR) which supports random inspections to ensure that carriers are operating with the correct authority, proper insurance levels and have safe drivers and equipment.

Division field staff also conduct what are called "Safety Assessments" (SA's) this is a type of audit designed to provide a regulated carrier with an overview of its compliance with various federal safety regulations. Unlike a Compliance Review, results of the SA are not reported to the Federal Motor Carrier Safety Administration (FMCSA) rather, this is an outreach tool the Department provides to carriers in an effort to help them identify any deficiencies that will need attention without imposing a penalty.

### **Safety Oversight of Transit Authorities and Passenger-For-Hire Bus Companies**

State law specifies the Department as the oversight agency responsible for the safety of equipment and operations of all Massachusetts regional transit authorities and passenger-for-hire bus companies based in Massachusetts, including transit bus systems, motor coaches, and sightseeing vehicles. The Transportation Oversight Division performed 2,398 safety inspections during 2014.

The Federal Transit Administration (“FTA”) requires that states oversee the safety and security of Rail Fixed Guideway Systems. The Massachusetts Bay Transportation Authority (“MBTA”) is the only Massachusetts transit authority that operates a rail fixed guideway system. As required by G.L. c. 161A, § 3(I), and 49 C.F.R. Part 659, the Transportation Oversight Division approves and monitors the safety and security program plans of the MBTA, the fifth largest transit authority in the United States. The Transportation Oversight Division also monitors the MBTA’s compliance with the Department’s System Safety and Security Program Standard. While other states with smaller transit authorities often dedicate an entire regulatory division to overseeing the transit authority’s Rail Fixed Guideway System, MBTA oversight is but one responsibility of the Transportation Oversight Division. A random inspection of MBTA subway cars, operation facilities inspections such as, carhouses and external safety audits are examples of this oversight program. During 2014, the Transportation Oversight Division also participated in (152) internal MBTA safety/security audits. In accordance with the provisions of 49 C.F.R. Part 659, the Transportation Oversight Division annually reviews, tests, and approves the System Safety Plan and Security Program Plan created by the MBTA. Transportation Oversight Division staff work closely with MBTA staff conducting on-site inspections of facilities and equipment. In addition, Transportation Oversight Division staff review and participate in internal safety and security audits to further enhance compliance and safety/security plans.

In addition, under authority delegated by the Federal Railroad Administration and as required by G.L. c. 160, the Transportation Oversight Division performs inspections of new installations and upgrades of highway/railroad grade crossing signal systems.

#### **Safety Inspections (Bus and Rail) in 2014**

Transit bus, motor coach, and sightseeing vehicles	2,398
Highway/railroad grade crossing signal systems (New installation/upgrades)	4
Transit audits	152
Safety Assessments	8
Compliance Reviews	13
Total Safety Inspections:	2,575

#### **Licensing of Certain Common Carriers**

In accordance with G.L. c. 159B, § 3, and G.L. c. 159A, §§ 7 and 11A, the Transportation Oversight Division licenses common carriers transporting people or property by vehicle. During 2014, the Transportation Oversight Division conducted (92) licensing hearings.

#### **Licensing Hearings in 2014**

Bus Companies	41
Tow Companies	15
Household Movers	28

---

Total: 84

In addition, five licenses were revoked or disciplinary action was taken against carriers that failed to maintain insurance and/or to obtain current-year identification devices.

**Provision of Decals and Permits**

Vehicle specific decals and permits (for trucks, buses, etc.) are required by law to denote a licensed common carrier. In 2014, the Transportation Oversight Division issued 2,611 decals and permits, collecting over \$104,420 in revenues.

**Appendix 1 – 2014 Siting Board Decisions and Siting Division’s Department Orders**

EFSB 13-1 .	Final Decision issued February 25, 2014 approving with conditions the Application of Footprint Power Salem Harbor Development LP for a Certificate of Environmental Impact and Public Interest
EFSB 12-1/DPU 12-46/47 .	Final Decision issued May 16, 2014 approving with conditions the petition of New England Power Co. d/b/a National Grid to construct the Interstate Reliability Project transmission line and related facilities.
EFSB 13-1 .	Final Decision issued February 25, 2014 approving with conditions the Application of Footprint Power Salem Harbor Development LP for a Certificate of Environmental Impact and Public Interest
EFSB 13-2/DPU 13-151/152.	Final Decision issued November 14, 2014 approving with conditions the petition of New England Power Co. d/b/a National Grid to construct the Salem Cable replacement project
EFSB 02-2B/EFSB 07-8A .	Final Decision issued November 17, 2014 approving with conditions a project change filing submitted by NSTAR Electric Company and Cape Wind Associates.
EFSB 05-2A .	Final Decision issued August 14, 2014 approving with conditions the project change filing of Colonial Gas Company d/b/a National Grid for a gas pipeline in Sandwich.
UMASS Supplemental Advisory Ruling .	Final Decision issued August 14, 2014 advising UMASS Amherst that continued use of a temporary 30,000 gallon LNG storage facility would not require Siting Board approval through 2016/2017 winter season.
EFSB 14-1 .	Final Decision issued August 14, 2014 determining that liquefaction equipment replacement at the Boston Gas Commercial Point LNG storage site does not constitute a “facility” subject to EFSB jurisdiction.

DPU 13-64

.

Final Decision issued March 18, 2014 granting zoning exemptions to NSTAR to expand its existing Hyannis Junction substation by installing additional electrical equipment and a new 115kV/23kV step-down transformer.

DPU 13-86

.

Final Order issued on November 4, 2014 approving with conditions NSTAR's petition to construct two new 115 kV underground transmission lines extending from the K Street Substation in South Boston to a connection point within the median of Columbia Road near its intersection with G Street, also in South Boston.

DPU 13-126/13-127

.

Final Order issued on September 25, 2014 approving with conditions NSTAR petition to construct a new transmission switching station and distribution substation on Electric Avenue in the North Brighton neighborhood of Boston in addition to two new looped 115 kV underground transmission lines to connect existing NSTAR facilities with the new Electric Avenue substation.

## Appendix 2 - Department Orders Issued in 2013

<b>Docket #</b>	<b>Caption</b>	<b>Issued</b>	<b>Order Type</b>
12-TD-3	Petition of the City of Quincy for an Exemption from Minimum Bridge Clearance Requirements, pursuant to M.G.L. c. 160, § 98, to allow the construction of a motor vehicle access bridge over the MBTA rail line in Quincy Center at a height of less than twenty-two feet six inches.	1/4/2013	Order
12-123	Petition of National Grid USA for a waiver of the Department of Public Utilities' jurisdiction over National Grid USA's acquisition of an interest in Clean Line Energy Partners LLC, pursuant to G.L. c. 164, § 96(c).	1/14/2013	Order
09-131	Petition of New England Gas Company for Approval of an Earnings Sharing Rate Adjustment for Calendar Year 2008.	1/14/2013	Order
12-81	Investigation by the Department of Public Utilities on its own Motion Commencing a Rulemaking pursuant to G.L. c. 30A, § 2 and 220 C.M.R. §§ 2.00 et seq. to Amend 220 C.M.R. § 18.00 et seq.	1/18/2013	Order
13-38	Petition of Fitchburg Gas and Electric Light Company d/b/a Unitil to the Department of Public Utilities for review and approval of the refund to customers of the Company's share of the ISO-New England Inc. Disgorgement Fund pursuant to the Settlement Agreement between Constellation Energy Commodities Group and the Federal Energy Regulatory Commission.	1/23/2013	Stamp Approval
13-39	Petition of Massachusetts Electric Company and Nantucket Electric Company d/b/a National Grid to the Department of Public Utilities for review and approval of the refund to customers of the Company's share of the ISO-New England Inc. Disgorgement Fund pursuant to the Settlement Agreement between Constellation Energy Commodities Group and the Federal Energy Regulatory Commission.	1/23/2013	Stamp Approval
13-40	Petition of NSTAR Electric Company to the Department of Public Utilities for review and approval of the refund to customers of the Company's share of the ISO-New England Inc. Disgorgement Fund pursuant to the Settlement Agreement between Constellation Energy Commodities Group and the Federal Energy Regulatory Commission.	1/23/2013	Stamp Approval

13-41	Petition of Western Massachusetts Electric Company to the Department of Public Utilities for review and approval of the refund to customers of the Company's share of the ISO-New England Inc. Disgorgement Fund pursuant to the Settlement Agreement between Constellation Energy Commodities Group and the Federal Energy Regulatory Commission.	1/23/2013	Stamp Approval
12-86	Petition of Milford Water Company, pursuant to G.L. c. 164, § 94, and G.L. c. 165, § 2, for Approval of a General Rate Increase as set forth in M.D.P.U. No. 18A and M.D.P.U. No. 20.	1/24/2013	Order
09-131	Petition of New England Gas Company for Approval of an Earnings Sharing Rate Adjustment for Calendar Year 2008.	1/25/2013	Stamp Approval
12-93	Petition of Western Massachusetts Electric Company to the Department of Public Utilities for review and approval of its proposed Revenue Decoupling Adjustment Factor and amendments to its Revenue Decoupling Tariff.	1/28/2013	Order
11-105	Petition of Western Massachusetts Electric Company to the Department of Public Utilities for review and approval of its proposed Revenue Decoupling Adjustment Factor and amendments to its Revenue Decoupling Tariff.	1/28/2013	Order
12-GC-22	Petition of The Berkshire Gas Company for Approval of a Long-Term Firm Transportation Agreement with The Trustees of Amherst College.	1/29/2013	Order
12-GAF-P3	Blackstone Gas Company 2012/2013 Revised Peak Cost of Gas Adjustment Clause Filing.	1/29/2013	Letter Order
12-GAF-P6	New England Gas Company 2012/2013 Revised Local Distribution Adjustment Factors.	1/29/2013	Letter Order
10-55	Petition of Boston Gas Company, Essex Gas Company and Colonial Gas Company, each d/b/a National Grid, pursuant to G.L. c. 164, § 94 and 220 C.M.R. § 5.00 <i>et seq.</i> , for Approval of a General Increase in Gas Distribution Rates, a Targeted Infrastructure Recovery Factor, and a Revenue Decoupling Mechanism.	1/31/2013	Order

11-120-A Phase II	Investigation by the Department of Public Utilities on its own Motion into Updating its Energy Efficiency Guidelines.	1/31/2013	Order
12-100	Petition of Bay State Gas Company d/b/a Columbia Gas of Massachusetts to the Department of Public Utilities for approval of its proposed energy efficiency investment plan, budget and allocation of program operating costs during the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-101	Petition of The Berkshire Gas Company for approval by the Department of Public Utilities of the Company's Three-Year Energy Efficiency Plan for the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-102	Petition of Blackstone Gas Company to the Department of Public Utilities for approval of its proposed energy efficiency investment plan, budget and allocation of program operating costs during the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-103	Petition of Boston Gas Company and Colonial Gas Company d/b/a National Grid for approval by the Department of Public Utilities of the Companies' Three-Year Energy Efficiency Plan for the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-104	Petition of Fitchburg Gas and Electric Light Company d/b/a Unitil (Gas Division) to the Department of Public Utilities for approval of its proposed energy efficiency investment plan, budget and allocation of program operating costs during the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-105	Petition of NSTAR Gas Company for approval by the Department of Public Utilities of the Company's Three-Year Energy Efficiency Plan for the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-106	Petition of New England Gas Company to the Department of Public Utilities for approval of its proposed energy efficiency investment plan, budget and allocation of program operating costs during the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-107	Petition of The Cape Light Compact for approval by the Department of Public Utilities of the Compact's proposed Three-Year Energy Efficiency Plan for the period January 1, 2013 through December 31, 2015.	1/31/2013	Order

12-108	Petition of Fitchburg Gas & Electric Light Company d/b/a Unitil (Electric Division) for approval by the Department of Public Utilities of the Company's Three-Year Energy Efficiency Plan for the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-109	Petition of Massachusetts Electric Company and Nantucket Electric Company d/b/a National Grid to the Department of Public Utilities for review and approval of the Companies' Three-Year Energy Efficiency Plan for the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-110	Petition of NSTAR Electric Company to the Department of Public Utilities for review and approval of the Companies' Three-Year Energy Efficiency Plan for the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-111	Petition of Western Massachusetts Electric Company to the Department of Public Utilities for review and approval of the Companies' Three-Year Energy Efficiency Plan for the period January 1, 2013 through December 31, 2015.	1/31/2013	Order
12-82	Order by the Department of Public Utilities, on its own motion, pursuant to G.L. c. 25, § 10, delegating to the Director of the Consumer Division the performance of certain functions relating to the processing and resolution of complaints made under G.L. c. 159B, § 21.	2/6/2013	Order
10-55	Petition of Boston Gas Company, Essex Gas Company and Colonial Gas Company, each d/b/a National Grid, pursuant to G.L. c. 164, § 94 and 220 C.M.R. § 5.00 et seq., for Approval of a General Increase in Gas Distribution Rates, a Targeted Infrastructure Recovery Factor, and a Revenue Decoupling Mechanism.	2/7/2013	Stamp Approval
10-138	Petition of Western Massachusetts Electric Company for approval of its 2011 and 2012 Annual Net Metering Recovery Surcharges.	2/7/2013	Order
11-104-A	Petition of Western Massachusetts Electric Company for approval of its 2011 and 2012 Annual Net Metering Recovery Surcharges.	2/7/2013	Order
10-162	Petition of Fitchburg Gas and Electric Light Company, d/b/a Unitil for approval of its 2011 and 2012 Net Metering Recovery Surcharges.	2/7/2013	Order
11-123	Petition of Fitchburg Gas and Electric Light Company, d/b/a Unitil for approval of its 2011 and 2012 Net Metering Recovery Surcharges.	2/7/2013	Order

12-TD-2	Appeal of Ronald Minkin d/b/a Martha's Vineyard Transport, LLC, of a decision of the Director of the Transportation Oversight Division, requesting that the Department of Public Utilities (1) act as the licensing authority and issue an amended municipal street license for a specified route in the Town of Edgartown, Massachusetts, pursuant to the provisions of G.L. c. 159A, § 1, and (2) issue it an amended certificate of public convenience and necessity for the operation of a sightseeing service on Martha's Vineyard over certain routes, including the Towns of Edgartown, Oak Bluffs, Vineyard Haven, Aquinnah, Chilmark, and West Tisbury, pursuant to G.L. c. 159A, § 7.	2/12/2013	Order
10-62	Investigation by the Department of Public Utilities on its own motion into the ratemaking treatment of margins generated from interruptible transportation, capacity release, off-system sales, interruptible sales, portfolio management and optimization agreements, and related transactions.	2/19/2013	Order
13-BSF-C1	Petition of NSTAR Electric Company for approval of its basic/default service pricing and procurement pursuant to G.L. c. 164, §1B(d), effective April 1, 2013.	2/19/2013	Stamp Approval
12-121	Petition of Fitchburg Gas and Electric Light Company d/b/a Unifil for review and approval of its Annual Electric Reconciliation Mechanism filing, for effect on January 1, 2013, pursuant to G.L. c. 164, § 1A(a), 220 C.M.R. § 11.03(4)(e), and D.P.U./D.T.E. 97-115/98-120.	2/22/2013	Order
13-46	Petition of Massachusetts Electric Company and Nantucket Electric Company d/b/a National Grid for approval by the Department of Public Utilities of the Company's first annual cost reconciliation filing for the recovery of costs through the Company's Solar Cost Adjustment Factor Tariff, M.D.P.U. No. 1147-A.	2/25/2013	Order
12-RAAF-09	Petition of Massachusetts Electric Company and Nantucket Electric Company d/b/a National Grid to the Department of Public Utilities for review and approval of its Annual Residential Assistance Adjustment Factor Reconciliation and rate filing, effective March 1, 2013.	2/26/2013	Order
13-GC-01	Petition of Boston Gas Company d/b/a National Grid for approval by the Department of Public Utilities of a Firm Transportation Service Agreement between National Grid and Kraft Foods Group, Inc., Atlantic Gelatin Division.	2/27/2013	Letter Order
12-115	Petition of Massachusetts Electric Company and Nantucket Electric Company, each d/b/a National Grid, for review and approval of the companies' annual revenue decoupling mechanism adjustment factor.	2/27/2013	Order

13-EC-01	Joint Petition of Fitchburg Gas and Electric Light Company d/b/a Unitil and the City of Fitchburg for approval by the Department of Public Utilities of a Special Contract for Customer-Owned Outdoor Lighting Delivery Service.	2/27/2013	Order
13-05	Petition of Massachusetts Electric Company and Nantucket Electric Company, each d/b/a National Grid, for approval of an annual retail rate adjustment and reconciliation filing.	2/28/2013	Order
12-GAF-P6	Petition of New England Gas Company for review and approval by the Department of Public Utilities of the Company's 2012-2013 Peak Cost of Gas Adjustment Clause filing, and its proposed 2012-2013 Local Distribution Adjustment Factor.	2/28/2013	Letter Order
12-68	Petition of New England Gas Company for authorization to create a regulatory asset related to pension and post-retirement benefits other than pensions.	3/1/2013	Order
13-08	Petition of Massachusetts Electric Company d/b/a National Grid for an advisory ruling pursuant to G.L. c. 30A, § 8 and 220 C.M.R. § 2.08.	3/4/2013	Order
12-72-A	Petition of Bay State Gas Company d/b/a Columbia Gas of Massachusetts for approval of its Revenue Decoupling Adjustment Factor for the 2012-2013 Peak Period, November 1, 2012, through April 30, 2013.	3/7/2013	Order
12-77	Investigation by the Department of Public Utilities on its own motion into the need for additional capacity in NEMA/Boston within the next ten years, pursuant to Chapter 209, Section 40 of the Acts of 2012 "An Act Relative to Competitively Priced Electricity in the Commonwealth" and pursuant to G.L.c. 164 § 76.	3/7/2013	Order
11-75-E	Investigation by the Department of Public Utilities on its own Motion into Distributed Generation Interconnection.	3/13/2013	Order
13-07	Joint Petition of New England Gas Company and Plaza Massachusetts Acquisition, Inc. to the Department of Public Utilities requesting approval for the sale of assets comprising NEGC to PMA.	3/14/2013	Order
12-ASMT-6	Assessment for expenditures incurred by the Massachusetts Emergency Management Agency pursuant to Section 2 of Chapter 139 of the Acts of 2012.	3/15/2013	Order
12-SQ-01	Investigation by the Department of Public Utilities into Bay State Gas Company d/b/a Columbia Gas of Massachusetts 2011 Service Quality Report filed pursuant to Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-B (2006) and D.T.E. 04-116-C (2007).	3/19/2013	Order

12-SQ-02	Investigation by the Department of Public Utilities into The Berkshire Gas Company's 2011 Service Quality Report filed pursuant to Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-B (2006) and D.T.E. 04-116-C (2007).	3/19/2013	Order
12-SQ-03	Investigation by the Department of Public Utilities into Blackstone Gas Company's 2011 Service Quality Report filed pursuant to Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-B (2006) and D.T.E. 04-116-C (2007).	3/19/2013	Order
12-SQ-04	Investigation by the Department of Public Utilities into Fitchburg Gas and Electric Light Company d/b/a Unitil's Gas Division 2011 Service Quality Report filed pursuant to Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-B (2006) and D.T.E. 04-116-C (2007).	3/19/2013	Order
12-SQ-05	Investigation by the Department of Public Utilities into Boston Gas Company d/b/a National Grid's 2011 Service Quality Report filed pursuant to Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-B (2006) and D.T.E. 04-116-C (2007).	3/19/2013	Order
12-SQ-06	Investigation by the Department of Public Utilities into Colonial Gas Company d/b/a National Grid's 2011 Service Quality Report filed pursuant to Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-B (2006) and D.T.E. 04-116-C (2007).	3/19/2013	Order
12-SQ-07	Investigation by the Department of Public Utilities into Essex Gas Company d/b/a National Grid's 2011 Service Quality Report filed pursuant to Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-B (2006) and D.T.E. 04-116-C (2007).	3/19/2013	Order
12-SQ-08	Investigation by the Department of Public Utilities into New England Gas Company's 2011 Service Quality Report filed pursuant to Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-B (2006) and D.T.E. 04-116-C (2007).	3/19/2013	Order
12-SQ-09	Investigation by the Department of Public Utilities into NSTAR Gas Company's 2011 Service Quality Report filed pursuant to Service Quality Standards for Electric Distribution Companies and Local Gas Distribution Companies, D.T.E. 04-116-B (2006) and D.T.E. 04-116-C (2007).	3/19/2013	Order

12-87	Petition by NSTAR Electric Company, pursuant to NSTAR/Northeast Utilities Merger, D.P.U. 10-170 (2012) and G.L. c. 164, § 94, for approval by the Department of Public Utilities of the following standby rate tariffs: M.D.P.U. No. 136E, M.D.P.U. No. 138D, M.D.P.U. No. 254F, M.D.P.U. No. 255F, M.D.P.U. No. 337E, and M.D.P.U. No. 338E.	3/21/2013	Order
