

2015 Massachusetts State Police Crime Gun Survey Report

SEIZED FIREARMS

A total of 927 crime guns were reported to the Commonwealth Fusion Center (CFC) as having been seized in the 2015 calendar year

General Law Chapter 140, Section 131Q Results

In 2014 the Massachusetts legislature enacted Massachusetts General Law Chapter 140, Section 131Q. The statute reads:

A firearm, rifle or shotgun, large capacity weapon, machine gun or assault weapon used to carry out a criminal act shall be traced by the licensing authority for the city or town in

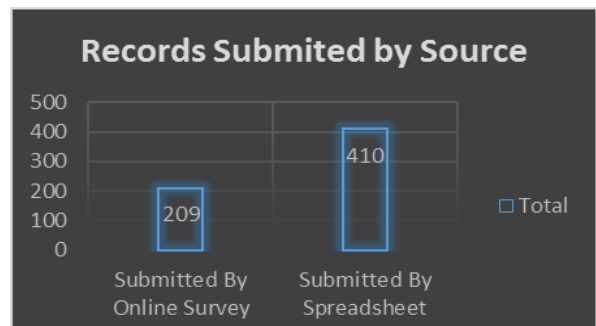

which the crime took place. The licensing authority shall report statistical data, when the

data is readily available as determined by the chief of police, including, but not limited to: (i) the make, model, serial number and caliber of weapon used; (ii) the type of crime committed; (iii) whether an arrest or conviction was made; (iv) whether fingerprint evidence was found on the firearm; (v) whether ballistic evidence was retrieved from the crime scene; (vi) whether the criminal use of the firearm was related to known gang activity; (vii) whether the weapon was obtained illegally; (viii) whether the weapon was lost or stolen; and (ix) whether the person using the weapon was an otherwise prohibited person.

The data shall be reported to the commonwealth fusion center or the criminal firearms and trafficking unit within the division of investigation and intelligence in the department of state police established pursuant to section 6 of chapter 22C. The

colonel of state police shall produce an annual report by December 31 of each year regarding crimes committed in the commonwealth using firearms, rifles or shotguns, large capacity weapons, machine guns or assault weapons, including all the categories of data contained in this section, and shall submit a copy of the report to the joint committee on public safety and homeland security, the clerks of the house of representatives and senate and, upon request, criminology, public policy and public health researchers and other law enforcement agencies.

In order to comply with the mandates of Chapter 140, Section 131Q, on November 25, 2015 an email requesting the submission of the required data was sent to members of the Massachusetts Chiefs of Police Association, as well as to state police unit/troop commanders. The request provided two options for the submission of all crime gun data; either a formatted spreadsheet or agencies could use an online survey.

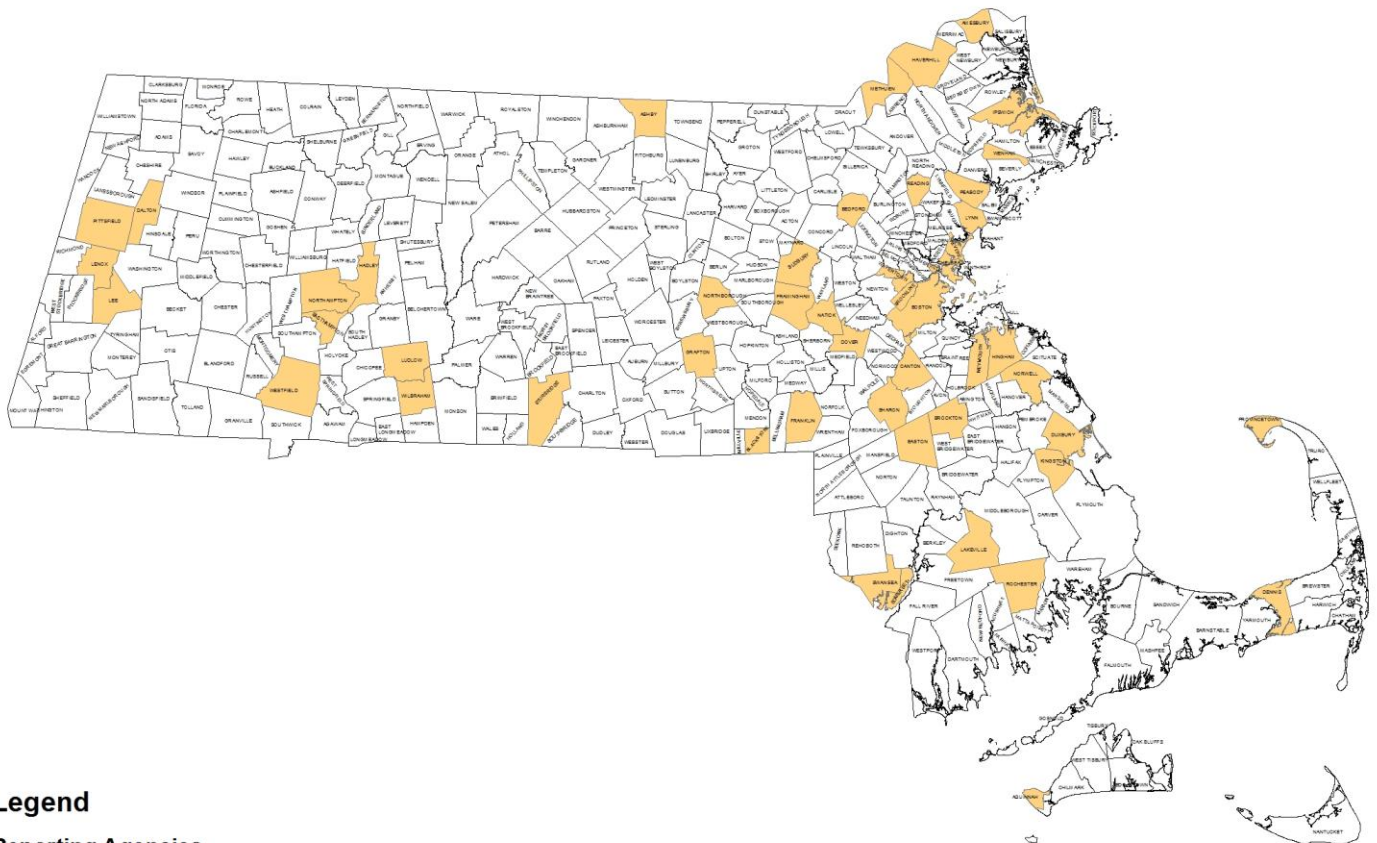

The determination of what data was readily available was determined by the chief of police. A collection deadline of December 24, 2015 was established for the submission of data.

All data submissions that were received by the deadline were aggregated into a single format. Please see the end of this document to find the complete record of all

the submitted data for the 2015 calendar year. A total of 927 crime guns were reported to the Commonwealth Fusion Center (CFC) as having been seized in the 2015 calendar year.

In this, the first year of such a comprehensive crime gun data collection and reporting scheme, certain challenges and collection gaps were identified. Specific

All results based on 2015 MSP Chapter 140 firearms survey. This map does not include State, Hospital or College reporting Law Enforcement.

data categories such as; nexus to known gang activity, whether a conviction occurred, whether fingerprint evidence was recovered from the gun and whether the gun was illegally obtained, are often the product of ongoing investigation and may not be readily available for submission in all cases. Individual agencies also differed on whether to submit firearms which were seized in the course of gun buyback programs or used in the commission of a suicide. An existing data submission mechanism, which validates and normalizes the entered data, was also found to be lacking.

In order to address these challenges and to ensure future refinement and validation of crime gun data, it is proposed that future gun surveys employ a different collection mechanism. In 2016 crime gun data will be collected through the use of eTrace, a Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) web based crime gun data submission portal.

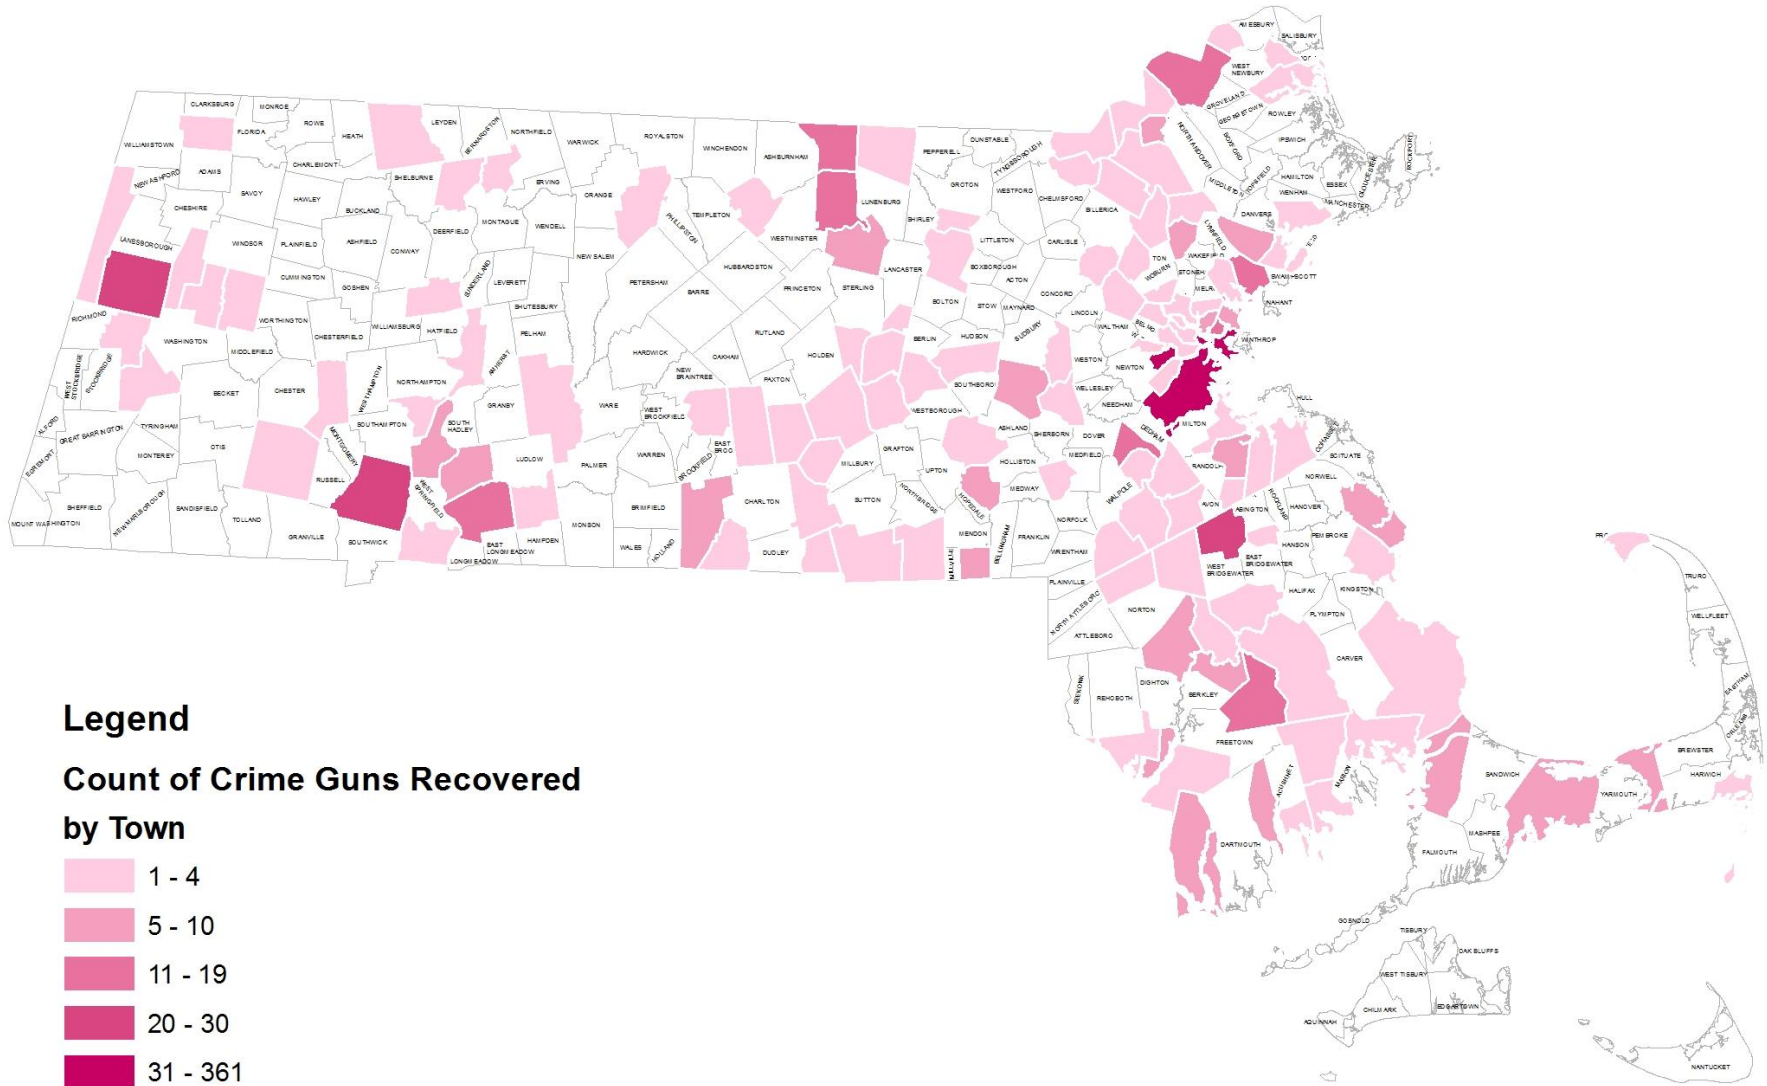

eTrace is designed to conduct the Chapter 140, Section 131Q statutorily mandated ATF trace of a crime gun's history. eTrace also collects much of the data which Chapter 140, Section 131Q requires to be reported annually. eTrace can be customized in order to collect the specific data sets defined by Chapter 140, Section 131Q and to meet the specific needs of the Commonwealth. In 2016 the Commonwealth Fusion Center will spearhead a collaborative effort with ATF to identify points of contact within each Massachusetts law enforcement agency and to train them in the use of eTrace and in the uniform submission of crime gun data. The CFC will promote the use of eTrace as the preferred mechanism to submit future crime gun data for annual reporting purposes.

Through use of eTrace, the Commonwealth Fusion Center seeks to ensure that each licensing authority has an effective, uniform collection mechanism that will result in both the trace of a crime firearm, as well as the timely submission of all required Chapter 140 Section 131Q data.

The CFC will further conduct an analysis of submitted data in an attempt to inform investigators and policy makers, to identify crime gun trends, to identify gun traffickers and to compile future annual crime gun reports.

Please see below for the survey results analysis and raw data.

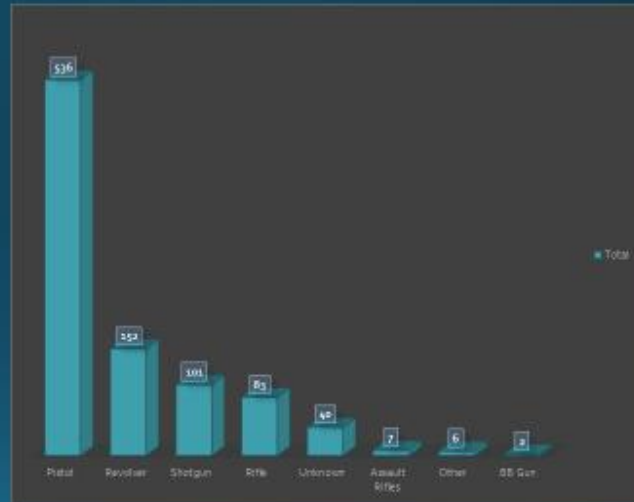

2015 Chapter 140 Survey

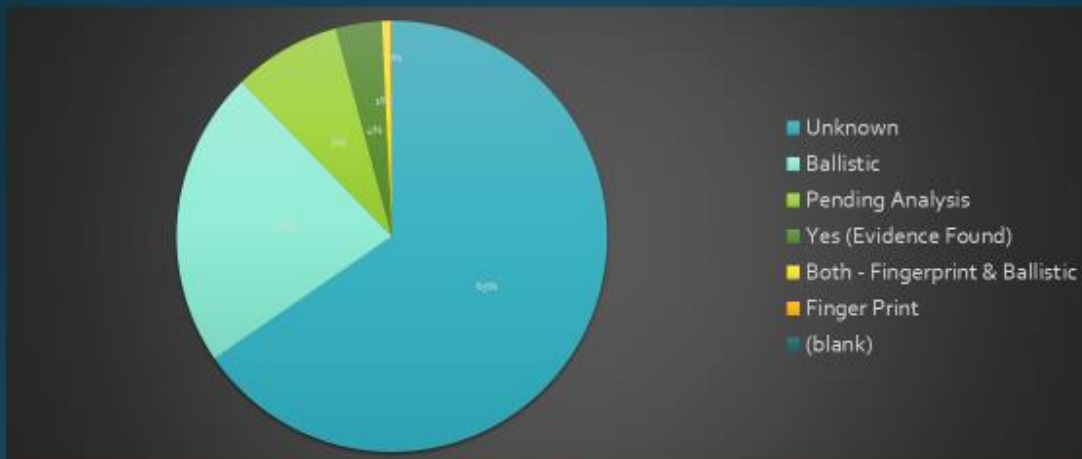

All results based on 2015 MSP Chapter 140 firearms survey. This map includes State, Hospital or College reporting Law Enforcement.
