QUARTERLY REPORT ON MULTIPLE 51AS

This document serves as the Department of Children & Families' Quarterly Report on Multiple 51As, as required by MGL c.18B, §25, which states:

“In addition to the immediate notification required under subsection (n) of section 7, the commissioner shall report quarterly on the total number of cases of multiple 51A reports reviewed by the department under subsection (r) of section 51B of chapter 119, the types of those cases, and their resolutions. The report shall be filed with the governor, the clerks of the senate and the house, the joint committee on children, families and persons with disabilities, and the child advocate.”

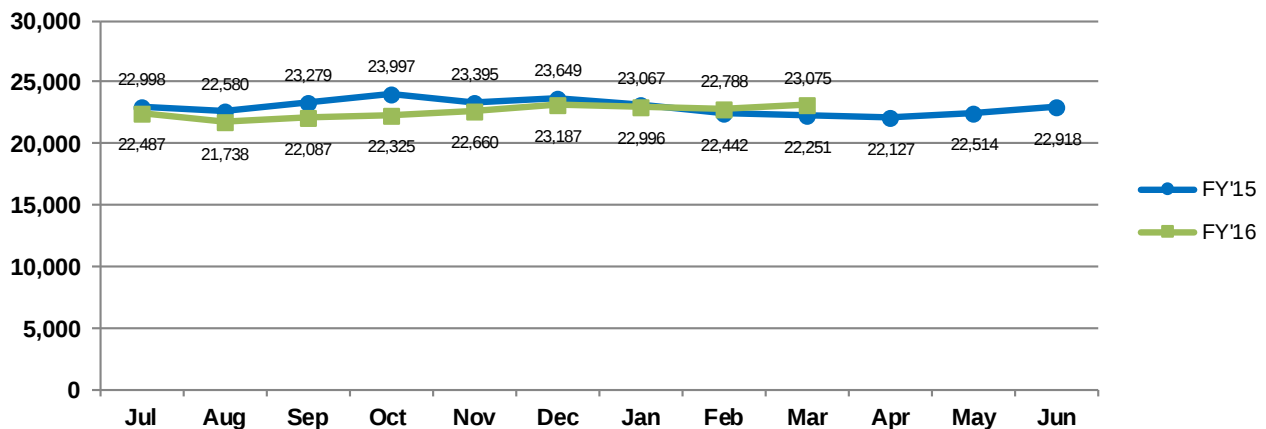

The Department is currently developing the capacity to track information regarding the area clinical reviews and regional clinical reviews required under MGL c.119, §51B(r). Area clinical reviews occur when three or more reports involving separate incidents have been filed on any child in a family within a 12-month period. Regional clinical reviews occur when three or more reports involving separate incidents have been filed on any child in a family within a three-month period.

In the following pages, please find the total number of multiple 51A reports reviewed by the Department under MGL c.119, §51B(r), from FY 2016, Quarter 3 through FY 2018, Quarter 3. Please note that the data presented in these graphs do not reflect whether these multiple reports were filed on the same or separate incidents.
