An Act ensuring safe patient access to emergency care.

*Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:*

1 SECTION 1. This act may be referred to as Laura’s Law, after Laura Beth Levis.

2 SECTION 2. The department of public health shall promulgate regulations to require all  
3 hospitals in the Commonwealth to meet criteria appropriate to ensure safe patient access at all  
4 times to a hospital emergency room or department, including but not limited to criteria related to  
5 indoor and outdoor signage, indoor and outdoor lighting, best-practice way-finding, and security  
6 and monitoring of all emergency department access points. Such criteria shall include minimum  
7 requirements for proper security monitoring of any prominent hospital doors or entrances that are  
8 locked at night through which a patient might try to egress, as well as the installation of panic  
9 buttons, emergency doorbells, or active video-intercom systems and any other safety features the  
10 department finds necessary to ensure patient access to an emergency room or department. The  
11 criteria shall incorporate the most-current published industry standards, related to the above  
12 criteria, including but not limited to the standards in the Facilities Guidelines Institute and The

13 International Association for Healthcare Security and Safety. The department shall promulgate  
14 regulations not later than December 31, 2019.

15 SECTION 3. The commissioner of public health shall convene a working group to report  
16 and make recommendations on emergency department oversight. The report shall include, but  
17 not be limited to, an evaluation of current emergency department oversight, regulation, and  
18 enforcement, the adequacy of fees to cover inspection and oversight, the deterrent effect of  
19 penalties for violations of rules and regulations and cost recovery assessment for damages  
20 resulting from the failure to comply with rules and regulations, and any other matters the  
21 working group finds that would enhance patient access and the safety of emergency departments.  
22 The working group shall report its findings, including any proposed legislation to the joint  
23 committee on public health no later than July 31, 2019.
