HOUSE No. 4144

By Ms. Nguyen of Andover, a petition (accompanied by bill, House, No. 4144) of Tram T. Nguyen and others relative to further testing after combined sewage overflow events. Environment, Natural Resources and Agriculture.

The Commonwealth of Massachusetts

**In the One Hundred and Ninety-Second General Court
(2021-2022)**

An Act relative to further testing after a CSO event.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

1 SECTION 1. Section 43A of chapter 21 of the General Laws, as appearing in the 2020
2 Official Edition, is hereby amended by inserting after subsection (f) the following subsection:-

3 (f $\frac{1}{2}$) The department, in consultation with the department of public health, shall establish
4 quality assurance project plan standards for the testing of water bodies and waterways for
5 bacteria or other pollutants following a discharge from a permittee’s combined sewage overflow
6 outfall.

7 Testing shall be conducted by the department, or its designee, using the department’s
8 quality assurance project plan, within a reasonable amount of time after a combined sewage
9 overflow notification as determined by the department based on the time elapsed since the
10 combined sewage overflow and the flow rate of the river. Testing shall be conducted at multiple
11 locations downstream from each combined sewage overflow outfall. Testing may be suspended
12 December through March based on weather conditions as determined by the department.

13 The department shall compile the data from each combined sewage overflow and produce
14 a report in November of each year. The department, in consultation with the department of
15 public health, shall use this data to create a predictive model for post-combined sewage overflow
16 water quality.

17 The department shall use the data to determine areas with high bacteria content and shall
18 require any permittee with bacteria content over 235 colony forming units per 100 milliliters to
19 develop a combined sewage overflow mitigation plan, which the department shall be in charge of
20 approving. Permittees developing an approved mitigation plan shall be prioritized in state storm
21 water funding.

22 SECTION 2. Subsection (g) of said section 43A of said chapter 21, as so appearing, is
23 hereby further amended by striking the first 2 paragraphs and inserting in place thereof the
24 following paragraph:-

25 A permittee shall report the volume of discharge from its outfall. A permittee shall install
26 accurate metering equipment to measure discharge from its outfall and issue public advisories
27 within timeframes established by subsections (c) and (d).
