2022 ACTIVITY TO DATE

Employer Contributions

The preliminary October 2022 employer contributions are \$ 156.73 million¹ for a year-to-date total of \$ 1.05 billion¹. These figures exclude the \$867.61 million deposit of bond proceeds discussed above. Year-to-date October 2022 contributions were lower than the comparable period ending October 2021, which were \$ 2.05 billion¹. Year-to-date October 2021 contributions reflect payments made by employers at unadjusted 2021 rates before the passage of Chapter 16 of the Acts of 2021, which was enacted in May 2021. Employers who made payments at the higher, unadjusted 2021 rates in effect before the legislative adjustment were credited the difference between their actual payment and the new, adjusted rate. Employers retained these credits to be applied to future payments.

Benefits and Claimants

Year-to-date through October 31, 2022, DUA paid \$1.20 billion in benefits for regular UI for 564 thousand initial and continuing claims.
