

**HOUSE . . . . . No. 3478**

---

**The Commonwealth of Massachusetts**

PRESENTED BY:

***Kip A. Diggs***

*To the Honorable Senate and House of Representatives of the Commonwealth of Massachusetts in General Court assembled:*

The undersigned legislators and/or citizens respectfully petition for the adoption of the accompanying bill:

An Act to streamline broadband permitting and ensure equitable access to infrastructure.

PETITION OF:

| NAME:                        | DISTRICT/ADDRESS:     | DATE ADDED:      |

**In the One Hundred and Ninety-Fourth General Court  
(2025-2026)**  
\_\_\_\_\_

An Act to streamline broadband permitting and ensure equitable access to infrastructure.

*Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:*

1 SECTION 1. Chapter 166 of the General Laws, as appearing in the most recent edition, is  
2 hereby amended by inserting after Section 25B the following new section:

3 Section 25C: Expedited Permitting, Access to Broadband Infrastructure, and Open  
4 Access Networks

5 (a) Purpose.

6 The purpose of this section is to accelerate broadband deployment across the  
7 Commonwealth, ensure fair and equitable access to critical infrastructure, prioritize open access  
8 network models, and establish best practices for efficient permitting and construction processes.

9 (b) Definitions.

10 For the purposes of this section, the following terms shall have the following meanings:

11           1. Broadband infrastructure: Equipment or facilities necessary for broadband delivery,  
12 including poles, conduits, manholes, and wireless systems.

13           2. Broadband provider: Any entity engaged in deploying broadband services, including  
14 public, private, and non-profit organizations.

15           3. Covered infrastructure: Poles, conduits, manholes, and other facilities essential to  
16 broadband deployment.

17           4. Legacy right-of-way agreement: Any pre-existing agreement granting exclusive use of  
18 infrastructure to a single entity.

19           5. Open access network: A broadband network model in which physical infrastructure is  
20 shared by multiple service providers to promote competition, reduce deployment costs, and  
21 ensure equitable access to high-speed internet services.

22           (c) Commonwealth Priority for Open Access Networks.

23           1. The Commonwealth shall prioritize investment in and deployment of open access  
24 networks to ensure broadband infrastructure can support multiple service providers on fair and  
25 equitable terms.

26           2. Any state or municipal funding provided for broadband projects under this chapter  
27 shall require the recipient to implement an open access model for newly constructed  
28 infrastructure.

29           3. Public or non-profit broadband providers operating open access networks shall receive  
30 priority consideration for state funding and access to covered infrastructure.

31 (d) Non-Discriminatory Access to Covered Infrastructure.

32 1. All owners of covered infrastructure, including municipalities, private utilities, and  
33 telecommunications companies, shall grant broadband providers fair and timely access for the  
34 installation, maintenance, and operation of broadband infrastructure.

35 2. Requests for access must be approved or denied within 30 days of submission. Denials  
36 must include written justification and, where feasible, suggested alternatives.

37 3. Fees charged for access to covered infrastructure must be cost-based and transparent,  
38 with standards established by the Department of Telecommunications and Cable (DTC) within  
39 180 days of enactment.

40 (e) Streamlined Permitting.

41 1. State and municipal permitting authorities shall process all broadband infrastructure  
42 permit applications within 45 days for standard projects and within 30 days for underserved or  
43 historic districts.

44 2. The Commonwealth shall develop and adopt a standardized permitting process  
45 applicable to all municipalities and state agencies to streamline broadband deployment.

46 (f) One-Touch Make-Ready (OTMR).

47 1. Pole owners must adopt OTMR procedures to allow broadband providers or  
48 contractors to perform all necessary work in a single coordinated operation.

49 2. OTMR work must comply with the National Electrical Safety Code (NESC) and state  
50 safety regulations.

51           3. The DTC shall establish a publicly accessible registry of qualified contractors  
52 authorized to perform OTMR work.

53           (g) "Dig Once" Policy.

54           1. Municipalities and state agencies may adopt a "Dig Once" policy, mandating the  
55 inclusion of empty conduits during all significant excavation projects to facilitate future  
56 broadband deployment.

57           2. Broadband providers shall be notified of planned excavation projects no fewer than 90  
58 days in advance to coordinate installation efforts.

59           (h) Enforcement and Compliance.

60           1. The DTC shall oversee enforcement of this section and impose fines for non-  
61 compliance, up to \$25,000 per violation per day, with each day constituting a separate offense.

62           2. A broadband provider denied access or facing unreasonable permitting delays may  
63 appeal to the DTC, which shall resolve the matter within 30 days.

64           (i) Reporting Requirements.

65           The DTC shall submit an annual report to the General Court detailing:

66           1. The deployment progress of broadband infrastructure, particularly in underserved areas  
67 and economic development zones.

68           2. Progress in implementing open access networks statewide, including funded projects  
69 and their adherence to the open access model.

70 3. Compliance and enforcement actions taken under this section.

71 SECTION 2. The provisions of this Act shall take effect 90 days after enactment.
