**The Commonwealth of Massachusetts**

**In the One Hundred and Ninety-Fourth General Court  
(2025-2026)**

An Act accelerating wetlands restoration.

*Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:*

1 SECTION 1. Section 18 of chapter 91 of the General Laws, as appearing in the 2022  
2 Official Edition, is hereby amended by inserting after the fifth paragraph, the following  
3 paragraph:

4 No license or permit shall be required for dredge or fill, as defined by the department, as  
5 part of work to restore tidelands, including salt marshes; provided that such a project is permitted  
6 by the department or local issuing authority pursuant to section 40 of chapter 131 and applicable  
7 regulations; and provided further, that such a project does not impair public access or navigation  
8 and does not involve placement of a structure.

9 SECTION 2. Section 40 of chapter 131 of the General Laws, as so appearing, is hereby  
10 amended by inserting after the twenty-seventh paragraph the following paragraph:

11 The notice of intention required in the first paragraph of this section shall not apply to  
12 targeted hand removal of invasive, non-native plants from resource areas. The department shall  
13 issue regulations on the scope and methods for such invasives removal, including standards to

14 minimize disturbance to soils and native plants and wildlife, requirements for notification to  
15 conservation commissions, and the competency of individuals performing such work.

16 SECTION 3. Notwithstanding any special or general law to the contrary, the secretary of  
17 energy and environmental affairs shall undertake a Wetlands Restoration Streamlining Initiative  
18 to improve the efficiency and reduce permitting and monitoring costs for ecological restoration  
19 projects as defined in 310 CMR 10.04. This initiative shall include a review of laws and  
20 regulations governing projects in wetlands or waterways including, but not limited to, those  
21 overseen by the environmental policy act office, department of environmental protection, office  
22 of coastal zone management, division of fisheries and wildlife, natural heritage and endangered  
23 species program, division of marine fisheries, and division of ecological restoration. The review  
24 shall solicit input from experts and restoration practitioners. Not later than 12 months following  
25 the passage of this act, the secretary shall issue a report with recommendations for legislative and  
26 regulatory amendments to reduce the time, complexity, and costs of permitting ecological  
27 restoration projects, and maintaining important habitat.

28 SECTION 4. (a) The executive office of energy and environmental affairs shall establish  
29 a pilot program for research activities and demonstration projects for nature-based solutions, as  
30 defined in section 1 of chapter 21N of the General Laws. The program shall: (i) define categories  
31 of nature-based solutions and develop standards for their use; (ii) coordinate, streamline and  
32 expedite the permitting and review process for activities and projects; and (iii) prioritize  
33 activities and projects that advance scientific knowledge, provide conservation benefits, and  
34 minimize impacts to existing wetlands. The secretary of energy and environmental affairs and  
35 commissioners/directors of permitting agencies may modify specific performance standards for  
36 nature-based solutions.

37 (b) The pilot program shall commence upon the effective date of this Act and operate for  
38 5 years. Not later than one year from the effective date of this Act, and annually thereafter, the  
39 secretary shall file a report with the clerks of the senate and house of representatives and the joint  
40 committee on environment and natural resources that: (i) details the categories of nature-based  
41 solutions; (ii) analyzes the approval time for all permits required for each approved research  
42 activity or demonstration project; (iii) specifies any specific performance standards modified for  
43 each approved research activity or project; and (iv) provides data about the effectiveness of each  
44 approved research activity or project.
