An Act promoting transparency in electric bills.

*Whereas*, The deferred operation of this act would tend to defeat its purpose, which is to establish a framework for consumer electricity rate savings and to make certain other changes in law, necessary or appropriate to effectuate important public purposes, therefore, it is hereby declared to be an emergency law, necessary for the immediate preservation of the public convenience.

*Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:*

1           SECTION 1. Notwithstanding any general or special law, rule, or regulation to  
2 the contrary, each calendar year, the department of public utilities shall conduct a public hearing  
3 to evaluate the economic consequences to the consumers of the costs assessed on residential and  
4 commercial ratepayers to meet the renewable portfolio standards of the Commonwealth,  
5 including the Commonwealth’s expenditures for administration and enforcement of all  
6 renewable energy programs, incentives, and funding available in the Commonwealth. The  
7 department of public utilities shall develop and issue, by March first of each year, a report which  
8 shall detail the amount in the previous calendar year of wholesale and retail pricing, that is  
9 directly attributable to the Commonwealth’s renewable portfolio standard requirements. The  
10 department may include in such report recommendations to address any identified pricing

11 mechanism flaws that, if corrected, could result in lower energy cost to ratepayers. The  
12 department is hereby authorized and directed to promulgate rules and regulations necessary to  
13 carry out the provisions of this section.

14                   SECTION 2. Notwithstanding any general or special law, rule or regulation to  
15 the contrary, beginning January 1, 2012, all electric bills sent to retail and commercial customers  
16 by an electric or distribution company or competitive supplier shall include a separate line-item  
17 to reflect the rate charged for renewable energy generation, transmission, and distribution  
18 services contained in the total retail price. The department is hereby authorized and directed to  
19 determine whether any additional information shall be required to be disclosed on the bills and to  
20 promulgate rules and regulations to implement the provisions of this subsection. Rules and  
21 regulations relative to the appeals process for billing disputes or damage claims made by  
22 customers shall be published and distributed to customers as part of an education and outreach  
23 program.
