

LIFE WITHOUT AFFF SEMINAR

September 13, 2021

Activity Number:
FFF

Session:
E1: In person
E2: Virtual

Location:
Department of Fire
Services
Stow Campus
1 State Road
Stow, MA 01775

Time:
0900-1100

Life Without AFFF program will speak to fire service personnel, emergency management officials, airport fire (ARFF) and supply chain supervisors in need of guidance on replacing AFFF containing PFAS with Synthetic Fluorine Free Foams, now known by NFPA and Underwriters Laboratories as, SFFF's and F3 firefighting foams.

This presentation is designed to give attendees an understanding of the challenges associated with transitioning from tried and true AFFF products to modern non-fluoridated SFFF and F3 products.

Focus will be on application rates and techniques for ignited and un-ignited events when employing NFPA 11 fluorine free foams and NFPA 18 wetting agents at automobiles: aircraft, road tanker, railcar and or marine spill fires.

Speaker:
Jim Cottrell of Cottrell Associates, Inc. Combat Support Products division has forty years of experience in high hazard consulting, training and product development for leading manufacturers in the firefighting industry.

Jim has many years of service on U.L. 162 Foam Standard Technical Panel speaking to Fire Dept user interests. Jim also chairs IFSTA's Foam Technical Committee.

If you are unable to attend this in person, we will be broadcasting this live via Adobe Connect. If interested then register in LMS using course FFF session E2, the URL will be sent to you via LMS upon enrollment.
