Hi Teri,

This is Justin Rodriguez and I recently testified at the Collaboration and Consolidation Committee. I just want to reaffirm my posture that consolidating with the Sheriff's is a wasteful and very unhelpful approach to a budget that is still misappropriated. This will only corporatize the Sheriff's, versus fix an economic and social issue in the DOC primarily. The reports I exhibited were asked to be sent, and here they are for the commission to review and take note of when evaluating best solutions for sound recommendations upon completion of their commission reports. Take care, and thank you. Photos of report covers are to be extracted from the resources that I extracted them from if the commission cares enough to apply this historical information for a sound solution, to an over 30 year old issue since the DOC was removed from HHS. Please do not forget the comparative analysis that I also left in their hands the day of the hearing. Consolidation means multiple items reigned into to create 1 wholesome item. Please keep that in mind. Especially without continued oversight, or at least effective oversight measures in place of this budget, and institution over a socially "protected" class.

My best,
Justin Rodriguez
