

APPENDIX C

1. Does the MSPCL see the potential of bias cascade from exposure to irrelevant contextual information at the crime scene (which is unavoidable and inevitable) to potentially impacting/biasing work back at the lab when the same person responding to the crime scene also examines the evidence back at the lab? [The MSPCL recognizes that bias cascade can occur and there may be potential for this to impact casework at the lab if appropriate safeguards are not employed.](#)
2. Would it be possible to change this --not by prohibiting crime scene responders from examining evidence in the lab-- but to just have them examine evidence from a different crime scene, not the one they attended. That is, would it be possible to have a procedure, or best practice, that compartmentalize and control contextual information, so as to avoid bias cascade from the crime scene to the work back at the lab: Crime scene responders will not examine in the lab evidence from a crime scene they attended.

[It is theoretically possible to implement a policy limiting crime scene responders from processing evidence collected from the scene they responded to. This may require restructuring the manner in which cases are assigned and evaluating how that would impact \(positively or negatively\) the case productivity in the laboratory. However, it should be noted that frequently, the role of a responder at the scene and their exposure to contextual information that may negatively impact subsequent casework can be quite limited. Consequently, we would suggest careful evaluation of the current measures already in place at the laboratory \(e.g., evidence driven analysis, review procedures, case management personnel\) to determine if such measures sufficiently mitigate any negative impact from bias cascade.](#)

[If, after this evaluation, the Board believes the current measures are not sufficient, we would ask that the Board engage in dialogue with the laboratory to evaluate the cost/benefit relative to a blanket policy prohibiting scene responders from processing evidence at a scene they responded to versus a limited policy. Examples of a limited policy could be restricting the processing of evidence by crime scene responders in units and/or for tasks the Board determines most likely to be negatively impacted by bias. If any type of policy is recommended, it will be necessary to evaluate what resources the laboratory will need to effectively implement such a policy without negatively impacting case productivity.](#)

Motion to request that MSP lab provide the FSOB with a summary of their own assessment of the issues addressed in section (c) items (i) & (ii) of the G.L. audit.

Lab's response (in writing and at an oral presentation at the next meeting) should include: (1) annual management review document (most recent); (2) equipment list (most recent); (3) budget request submitted to General Headquarters; and (4) a synthesis/summary of the key issues and concerns from the lab's perspective arising out of these documents. The response and supplemental documents should be submitted to the board on or before October 11, 2019.

MEETING MINUTES

Massachusetts State Police Crime Laboratory

124 Acton Street
Maynard, MA 01754

2018 MSPCL Management Review

Date: Tuesday, January 22, 2019	Time: Start: 9:00am	End: 12:00pm
Date: Thursday, January 24, 2019	Time: Start: 1:00pm	End: 4:00pm
Date: Tuesday, February 5, 2019	Time: Start: 1:00pm	End: 3:00pm
Location: Massachusetts State Police Crime Laboratory, Maynard, 1 st floor conference room		

Attendance:		1/22/19	1/24/19	2/5/19
1.	Acting QA Manager Laura Bryant	√	√	√
2.	Major Deborah Rebeiro	√	√	√
3.	Director Kristen Sullivan	√	√	√
4.	Deputy Director Albert Elian	√	√	√
5.	Program Coordinator Brittany Kadra	√ (partial)	√	√
6.	Deputy Director Lynn Schneeweis	√	√	√
7.	Deputy Director/Detective Captain Mary Ritchie	√	√	√
8.	Section Manager Stefany Harman	√	√	√
9.	Section Manager Nancy Brooks	√	√	√
10.	Detective Lieutenant David Cahill	√	√	√
11.	Detective Lieutenant Steven Bennett	√	√	√
12.	Lieutenant Christine Fisher	√	√	√
13.	Detective Lieutenant Mary Sennott	√ (partial)	√	√
14.	Legal Counsel Darina Griffin	√	√	√
15.	Legal Counsel Kerry Collins	Absent	√	√
16.	Lieutenant Kenneth Heffernan	Absent	Absent	√
17.	Lieutenant Jessica Jennings	Absent	Absent	√
Topics for Discussion				
1	Review of the suitability of laboratory policies and procedures, (Management, QAMS)			
2	Internal/External Audit Reports from the previous year(s), 2017 & 2018 (QAMS)			
3	Corrective and preventive actions from the previous year(s), 2017 & 2018 (QAMS)			
4	Proficiency Testing Results from the previous year(s), 2017 & 2018 (QAMS)			
5	Reports and comments from key management, supervisory personnel, and other staff members, 2017 & 2018 (Management)			
6	Customer and personnel feedback and complaints from the previous year (QAMS, Management)			
7	Changes in volume and types of casework, or in the range of laboratory activities, 2018 (Management)			
8	Staff Resources and training, including adequacy of Resources (monetary, personnel, equipment), 2018 (Management)			

9	Security and Health Safety Programs, 2018 (Management)
10	Outcomes of the Assurance of Validity of Results, 2018 (Management, QAMS)
11	Review of Subcontractors, 2018 (Management, QAMS)
12	Objectives of the management system, 2017 & 2018 (Management)
13	Changes in internal and external issues that are relevant to the laboratory, 2018 (Management, QAMS)
14	Results of Risk Identification, 2018 (Management, QAMS)
15	New Goals, Objectives, and Improvements for 2019
16	Other topics, if applicable (Management)

Meeting Minutes:

“Inputs”

1. Lab Policies and Procedures

Quality Assurance

- 2018 Annual document review utilized “verify up to date” function in Qualtrax
 - Some difficulties using this system as it was new and documents “in edit” did not automatically expire, which would have prompted review
 - This required additional communication with units outside of Qualtrax
 - QA to re-evaluate procedure for 2019
 - Discussed meaning of not suitable for use versus needing edits
- Documents in review – how can process be improved?
 - Discussion with group
 - Some sections incorporate timelines for document review prior to submitting to QA
 - QA could prioritize documents based on Unit input
 - Possibility of scheduling when units may submit documents for review
 - Removing comments on documents prior to submission unless comments are specifically for QA will help improve back & forth process
 - Difficult in Qualtrax to see who has seen edits on document – can only see who document is currently in edit for (edit history only shown in email)

Biology

- Forensic Biology Item Analysis Policy and Discovery polices are suitable for use but need revision and Director’s input on lab-wide expansion.
- Expedited policy needs to be updated with use of expedited form that is currently waiting for approval – universal support/application needed for success.

CSSS

- Some concerns were discussed regarding procedure for marking items prior to going to other units (e.g. DNA) for analysis
 - Could items be marked after Crim/DNA, or be flagged to be marked if not sent to other units?

- Is there a way to mark just proximal container? (future meeting discussion)

2. Audit Reports – Internal/External

- ANAB (May 7th – 11th 2018)
 - All audit remediations were completed
 - Time frame much shorter than with ASCLD/LAB (30 days from close-out meeting (not from report) to submit plan, 60 days from close-out meeting to show objective evidence (not business days)
 - Close out meeting was May 10th
 - Plan for remediation due June 10th (lead assessor reviewed and accepted plan)
 - Objective evidence due Friday, July 6th (actual Monday, July 9th)
 - Review and approval must be obtained by July 10th
- Internal Audits (*Summaries of 2017 and 2018 audits provided in meeting*)
 - Trends – administrative errors, safety concerns, need for additional training/awareness in procedures for contamination prevention
 - Non-conformance forms – responses still outstanding from several units
 - Technical Audits
 - Close-out held November 1st
 - Plan for next year is to conduct technical audits concurrently with QAMS internal audits
 - Pilot performed by MRL and Crim unit in 2018
 - Positive feedback on this with technical expert present during observations and evaluation of QC (for auditors unfamiliar with section), audit trail can be combined next year due to redundancy, shared case files for file review was difficult
 - Shorter time frame for audit reports (new accreditation standards reference *reasonable* time frames)
- Inventories
 - Drugs
 - 3 inventories conducted at each location per year
 - All inventory discrepancies resolved (e.g., items scanned to incorrect location). No items of evidence identified as lost or missing.
 - FIS
 - Inventory conducted at each location; all inventory discrepancies resolved.
 - Added search of AN custodies as well as analyst work areas and inactive LIMS locations in 2018 (to ensure nothing listed in LIMS)
 - ECU
 - Completed annual ECU inventory
 - No outstanding items requiring follow-up.
 - Crime Lab System
 - During QAMS internal audit of ECU, it was determined that additional locations, not under the control of or maintained by ECU, will require an inventory.
 - Started inventory process, but was put on hold pending meeting with deputy directors to improve process and develop plan for completion inventory of additional locations in 2019
 - The inventory process requires suspending evidence intake and LIMS activities, ETs, QA personnel, supervisor present at site, palm pilots
- OAT Upcoming audit (plan)
 - QAMS internal audit and technical audit to be conducted at the same time
 - Conformance file to be initiated at the time of audit

3. Corrective Action/Preventative Action

- QA Notes – suggested referring to specific standard you're deviating from or not in conformance with. This will make it easier for QA and supervisors to evaluate.
- PARs
 - 9 initiated between 2016 and 2018, 2 completed within established time frame, 1 not pursued
 - 6 initiated in 2017 and 2018
 - Drug Unit x4
 - DNA x2
 - Ways to improve process in future?
 - Categorize PARs? High priority vs low priority
 - Confusing structure, multi-unit forms would be helpful
 - QA can provide guidance on PARs in future
- CARS (*Summaries of 2017 and 2018 nonconformances and corrective actions provided in meeting*)
 - Root cause analysis
 - Recent AFQAM meeting put more emphasis on digging deeper to prevent recurrence. The analyst made an error, but why?
 - QA can assist with getting workflow started, walk through nonconformance workflow in real time and initiate CAR in one meeting.
 - Reminder - CARs must be signed (agreed upon by all parties) before corrective action is initiated
 - 1 CAR in 2017 and 1 in 2018 in which remediation process underway before we had any signatures on the forms
 - Discussed options moving forward to improve the process, including initiating workflows and involving QA earlier in the process

4. Proficiency Test Results

- ANAB notified of any proficiency test discrepancies. Discrepancies also reviewed as part of external audit in May. (*Summaries of 2017 and 2018 nonconformances and corrective actions provided in meeting*)
- We had 3 instances this year where test results were not submitted online to the vendor, 2 in Crim and 1 in DNA. DNA was noted before deadline but Criminalistics PTs were after the fact. Fortunately Forensic Assurance let us submit after the fact-not all vendors will do so. Units should discuss on their end how to ensure this doesn't happen in the future.
- Management would like to implement a new process this year, having the CSI PT's done multi-unit to more realistically represent the crime scene response process. One mock scene will include CSSS/FIS/CSRU
 - This has been discussed several times in the past-to test our "system" on entire crime scene processing. Will set up meeting to discuss implementation for 2019.
- Request to issue PTs for tech reviewers (for those who no longer conduct laboratory work, but still perform TRs). This is a requirement in DNA. The topic comes up in discovery requests when information on technical reviewers is requested (including CV, results of PTs closest to date of work). Follow-up discussion needed between QA and Director.
- We were questioned by CTS back in October as to why we order fewer tests from them. The response provided was three-fold: cost, recent issues with biology tests, and the increasing number of options for PT vendors.

Cost Comparison:

- CTS Digital Latent Print \$240 Printed \$340
Forensic Assurance Digital Latent Print \$200 Printed \$275
- Digital download: \$40 x 40 analysts = \$1600 savings.
CSSS satisfied with quality of FA tests.
- CTS Biology test \$160
Forensic Assurance Biology test \$125

\$35 x 28 analysts = \$980 savings

MSP Issues with Criminalistics Tests (not seen with Forensic Assurance tests)

- Recent example: Gunshot Residue Distance Determination Test
 - Consensus/acceptable result based on the responses submitted when the test was completed
 - Should this have been determined prior to release of the test? Using the actual test fire distance seems more appropriate.
 - Unclear why a result was evaluated and boxed as inconsistent, based on what others reported on the completed test after being released for use.
 - QA notified ANAB of this concern.
- Similar issue with BSPA

More PT vendor options available:

- Technical Leaders select from what's available. They may try a new vendor if an applicable test becomes available and decide to switch to this vendor for future tests.

5. Reports and Comments from key management, supervisory personnel, and other staff

Biology

- EDI-2 hits confirmed in 2018, would like feedback on EDI process
- CODIS Hits: 492
 - Case to case hits: 25
 - Case to MA offender hits: 438
 - Case to out of state offender hits: 29
- Issued a total of 1,308 hit letters – all counties and following states: AZ, CT, FL, GA, IA, ME, MI, NH, NY, NC, OH, OR, RI, SC, SD, VT, VA.
- JusticeTrax
 - Goal to complete workflows by March 31st
 - Units to begin protocol updates
 - Fall – training for analysts to go live
 - JMM working on case information migration
 - Will need to train external agencies – pre-log evidence requirement

Chemistry

- OAT began entering all BTs into LIMS
- Chemistry continues to distribute urine and OUI kits to local PDs through National Highway Safety grant
- Drugs – returning cases to submitting agencies (~100 cases prior to 2015) as we will reach capacity in evidence room
 - Notice to be provided to chiefs of police, MDAA, and at evidence window to return 2016 cases
 - Cases can be resubmitted if processing needed for trial

CSSS

- High staff turnover
- Increase in number of multi-unit cases
- 620 open assignments as of January 2019 (includes all satellites)
- Mideo will change how unit functions in future – close to paperless file
- As a result of nonconforming work, additional follow-up discussions were held and it was determined that the unit

will begin verifying exclusions as discussed prior to this nonconformance.

FIS

- Supervisor retiring, but may return on 960 to assist with NIBIN program
- With one analyst leaving, Springfield will have one qualified examiner
- Backlog is increasing, may return old cases to submitting agencies (see section 7)
- Increase in rush case requests
- Uncertainty of Measurement revision completed in 2018

CCIU

- All protocol revisions completed
- Pilot program starting for electronic payment submission for CODIS collections
- 12 trainings for DNA collection set up with Dept. of Probation

6. Customer and Personnel Feedback

Quality Assurance

- Change in mechanism of evaluating feedback and complaints due to new standards/OAT QA Manual
 - Deputy Directors and QA will be reviewing employee and customer surveys and complaints
 - Currently this only applies to OAT (For. Chem and QA) – no survey responses since issuance of OAT QA Manual
 - Revision to lab-wide QA manual will include this change

Employee Feedback (2018)

- 16 responses in 2018 (February and March only, 11 on 2/9)
- Consistent theme is communication, however difficult to determine specifics
 - Information not making its way from the top down
 - Information not getting from the bench analysts to management/director
 - Need more opportunities for direct communication with management
 - Inconsistent information being given from different supervisors
 - Need more documentation of meetings (mentioned twice)
 - Want more timely answers to questions
 - Last-minute communication regarding visits from external personnel & tours (mentioned twice)
 - Varied responses for communication between units
 - Concerns about facilities (Sudbury lab)
- Encourage Constructive feedback
 - Non-constructive answers (example provided) received in answer to communication in unit
 - Respondents providing at least section information would allow appropriate personnel to address the problem
 - Be descriptive and provide suggestion for improvement, if possible
- Some constructive suggestion box feedback included:
 - Request for lab-wide contamination presentation
 - Request for some signage in Maynard directing visitors to 911 call center and OAT entrance
- Suggestion boxes will be removed with new revision of QA manual – plan to eventually move to online survey only

Customer Feedback

- 19 responses in 2018

- Mostly positive feedback – court testimony, quick responses to inquiries, specific references to personnel in legal, OAT, TRAE, CSRU, Tox/PMT, CMU
- 1 complaint – entered into survey but also pursued through MSP and became an internal investigation Evidence Control Unit Feedback
- Not yet received by QA, but will reach out

Biology

- Qualtrax
 - Positive feedback
 - Protocol was suggested; would be helpful especially for supervisors/tech leads
- Protocol updates
 - Units feel discouraged to make updates as process for review is too long
- Lab-wide CMU for all units
 - Case clearance assistance
 - Include technical experts from multiple disciplines
 - Increase consistency on testing, priority of cases, etc.
- Lab-wide training on trace evidence (similar to DNA contamination presentation)
- Better communication
 - From management to lab through use of town hall meetings
- Continue to improve upon intern program
 - Better use of time through units
 - Structured activities
- Presentations
 - Good feedback – developing relationships with outside agencies
 - Included MCLE presentation, post-conviction presentation – DA’s Offices, CPCS, external trainings to DA’s Offices re: general casework processing at the lab.
- Provide more notice for mandatory trainings
- Quality issues between units, mechanism to address not effective
 - Not clear to those who bring up issue that it’s been addressed
- Budget not always clear
 - Communication regarding what they can/cannot spend
 - An informational session would be helpful after budget approved
- LIMS training – responsibility shifted to unit trainee will be working in, test to be available on QualTrax

Chemistry

- Protocols/authorizations take too long to review
- Hiring takes too long (more than 6 months after vacancy)
- Training – positive feedback on BTO and OIC training (OAT)
- Increased rush turnaround time (from 10 to 15 weeks) in Drug Unit
- Training for some DA’s offices including discovery materials very helpful. Drug Unit specific trainings provided internally and externally to DA’s Offices. Positive feedback on these trainings.

Forensic Services

- FIS has shortest time to get cases done due to end of sequence for multi-unit analysis cases
- No full-time evidence window for FIS
 - Requests at least 2 days/week
 - Re-evaluate when staffing in ECU is back up

Additional comments

- Suggestions for improving authorizations – faster turnaround in QA
- If QA notices themes in comments/issues, relay to unit

7. Changes in Volume and Types of Casework (2018)

Chemistry

- OAT getting ready for internal audit
- OAT receiving more PBTs than usual
- Increasing capability of eDiscovery
- Drug Unit' work increased by CJ bill
 - Fentanyl trafficking language adjusted in recent legislation
 - Currently only working on priority/rush cases – increased turnaround time to 15 weeks
 - Unit has begun returning older cases back to agencies due to evidence storage capacity limitations (see section 5)
- Toxicology
 - Increase in OUI cases – resulting in increased volume of discoveries
 - Continues distributing OUI blood and DRE kits
 - Tox – will evaluate reported and unreported Tox kit process for decreased turnaround time
- PMT
 - Increase in cases with positive results for fentanyl w/ benzos
 - Additional analyses requested per case
 - Unit is sending fewer cases out to NMS due to incorporation of additional in-house testing methods

Biology

- TRAE no longer requested to conduct Boston PD GSR testing as of 12/7/18
- RSA 30 day TAT in Crim/DNA requirement for CJ Reform Bill (ongoing initiative)
 - Early January: RSA turn-around time decreased from 350 days to approximately 120 days in DNA Unit
- ECU
 - Both supervisors heavily involved in JusticeTrax implementation; manual data entry involved, including entering new agencies and creating workflows
 - EOPSS Milford storage facility set up and maintenance has been a large undertaking as a result of CJR Bill
- CSRU removed request requirement for BSPA on serious crime, now unit evaluates on a case by case basis
- CMU discovery requests have increased 6% from 2017 to 2018
 - Unit assumed duties of Criminalistics case clearance - fully incorporated in 2018

- Forensic Biology SAECK spreadsheet/inventory for municipal backlog to assist EOPSS with CJR bill SAECK inventory requirements
 - All municipalities required to inventory kits in their custody
 - Systematically creating spreadsheets to determine what has been submitted to the lab previously and what testing has been conducted to date
- Forensic Bio send-outs have increased from 100 to up to 150 per month
- DNA assumed duties of CODIS hit file preparation in late 2017
- NDIS search/upload schedule changed. This allowed the DNA Unit to begin (scheduled) nightly uploads and searches.

CSSS

- Increased volume of rush requests
- Drug packaging – not getting many print hits, plan to discuss the possibility of eliminating or reducing this evidence type from case load due to limited success and possible safety issues

FIS

- Increased volume of rush requests
- Plan to return cases submitted prior to 2016 without requests for analysis
 - Letter has been drafted to send to agencies (formally documenting this initiative)

CCIU

- Convicted offender collections are down
- Convicted offenders up (~13,000 to be collected, up from 11,000)
- Send letters after 1 year, many get returned due to outdated address
- Staffing shortage issue – if out at collections, unable to answer phones
- As a result of CJ Reform Bill, Probation to begin assisting with conducting qualifications and collections – significant training required.

8. Staff Resources and Training

Quality Assurance

- Attended AFQAM meeting in October – helpful resource for new standards (local, allowed for three attendees from QA)
- Palm pilots – functionality issues with inventories, need additional to be more efficient
- Office Support Specialist would be beneficial if budget allows

Biology

- Criminalistics
 - Three analysts completed training in 2018
 - BSP training in 2018 – excellent feedback received
 - Two analysts to start the week of 1/20/19
 - One is previous Lab Technician and one former Evidence Technician
 - Four additional hires are in background
 - Current opening for backfill

- Working on developing refresher trainings for tasks not performed regularly
 - GSR
 - Would like to continue with BSP – several external trainings of interest but costly; would like to host in lab
- Several attended NEAFS and AAFS in 2018 – positive feedback
- Two analysts attended MAAFS – minimal content, negative feedback
- Budget
 - Equipment budgeting difficult with limited state funds
 - Grants provide some assistance
 - If unanticipated purchases are needed for equipment that breaks and grant funds are needed to purchase the replacements, a GAN is often required. This can take several weeks to obtain approval for purchase.
- TRAE
 - Able to backfill vacancy (due to promotion)
 - Extremely slow process
 - Originally posted for FSII, unable to fill
 - Dropped to FSI and filled
 - FSII resigned
 - Able to backfill end of January 2019 and pull from previous list
 - Interested in getting lab tech position back
 - Currently have individuals in various stages of training
 - Prioritize training to focus on procedures with highest volume of requests
 - FSIII on leave
 - Difficulty with volume of casework reviews due to limited staff trained in specific disciplines; Boston PD staff is assisting with this work
 - Training initiative this year is increase tech and admin reviewers in sub-disciplines
 - Other trainings include ATF post blast course
 - Programmed money into Coverdell for Hooke college
 - In-house training limited due to on-site equipment needs for each participant
 - Two analysts attended NEAFS
 - Tech Lead is continuing to serve on OSAC
- CSRU
 - Training program is adequate, however some ongoing challenges include:
 - Dependence on scene occurrence and type of processing needed
 - Restrictions placed upon personnel outside of Criminalistics which affect availability to train during regular work hours causes delays
 - Grants not as readily available for purchasing needs
- DNA/CODIS
 - Promotions/Movements
 - Two promotions to FSIII
 - Promotion of DNA FSII to CMU as FSIII
 - QC Lab Tech to FSI

- 3 resignations
 - Open spot (LMB as acting QA manager)
 - Hiring challenges
 - Difficulty filling positions due to educational requirements for DNA Unit
 - 11 positions currently posted for FSI, backfill for technician also posted
 - Background process taking longer than usual
 - Internal training program
 - Currently focuses on training individuals to work in the Databasing section followed by mixture training for transition to casework processing
 - Program is being re-evaluated
 - Discussions on whether to tailor the training more to individuals if they have previous experience
 - Began assigning mentors to new analysts – well received
 - Helps give experience to senior analysts as well as taking some onus off supervisors
 - Training highlights
 - Likelihood Ratio / STRmix given by Tech Lead from NV – extremely well received
 - Bode, Green Mountain and Promega - all good reviews
 - Hosted Thermo Fisher Road Show – allowed many to go without cost to Commonwealth
 - STR/Y-STR workshop, STRmix New England users group, AAFS, NEAFS, CODIS meeting
 - Contract with Sorenson – some challenges
 - Unable to get stats training in house last year
 - Most of legwork done by Crime Lab as opposed to Sorenson to find appropriate training resources
 - Exploring other options for future training contracts
 - Resources generally good – still utilizing grants; availability of equipment and consumables has been sufficient
- ECU
 - 2017 – hired full complement of staff
 - One trainee resigned - position backfilled
 - 2018 – maintained full staff
 - One ET resigned, backfill position offered to candidate
 - 2 positions posted for MESU; positions offered to candidates
 - 2019
 - 2 on FMLA
 - 3 staff members promoted (to other laboratory units)
 - Shortage of staffing will reduced satellite staffing (to include FIS as mentioned above) and reduced transport schedule
 - Internal Training
 - IAPE (2017)
 - Active Shooter (2017)
 - NARCAN (2017)
 - Cognitive Bias (2018)
- CMU

- 2017 – Promoted new FSIII to backfill vacancy for Crim case clearance
- 2018 – FSIII reclassified to FSIV
 - Posted FSIII, 3 PCI and 1 OSSSI for CJ bill – positions offered to candidates
 - Several temps on staff that have completed drug file project and 1979-2000 log of Crim files (for post-conviction grant)
- 2019 – 2 FMLA
 - By February, FSIII and PCI positions will be filled and staff will begin training
 - Office Support Specialist pending interviews
- Internal Training
 - Active Shooter (2017)
 - NARCAN (2017)
 - Biohazard (2017)
 - Federal Court Procedures (2017)
 - Cognitive Bias (2018)
- Goal to obtain FTP site or other means of providing discovery packets electronically
 - Considerable time spent burning files to CD format
 - Computer equipment unable to handle volume of work (becoming non-functional after short use)

Chemistry

- Negative staffing changes - Forensic Chemistry hired 6 forensic scientists, lost 5
- 3 new hires currently in training in Drug Unit, adding more soon
 - Provided training to 8 FSIs, NEAFS attendance, hopefully sending others to DEA
- New training protocol in PMT to train 1 FSI now and 2 more FSIs soon
 - Sending 3 staff members to SOFT
- Tox training takes too long to complete as assigned casework (after authorization is received for a module) delays training on subsequent modules and casework experience is required prior to training on report writing.
- OAT
 - New training protocol in place
 - Training 1 FSIII and 2 FSIs
 - FSII completed training
 - Taking longer to authorize
 - Sending 3 to Borkenstein and training by Draeger
- Forensic chemistry is down 2 lab technicians
- Need funding to replace refrigerators/freezers

CSSS

- 6 new trainees
 - Request dedicated trainer for new employees (~20% of staff either in training or conducting training)
 - Promotional system affects staffing, experienced analysts transferred out of section
- New computers – burning CDs for photos is decreasing life of computers
- Positive feedback received from staff on cognitive bias training

FIS

- Section Supervisor recently retired
- Two new analysts have been hired, however training process is lengthy (approximately two years to complete training)
- Rotating supervisors to Springfield due to staffing shortage
- Several FIS staff taking Sergeants test – supervisors needed, however high likelihood of transfer if promoted
- Few institutions offer firearms trainings
 - AFTE in Nashville affected by government shutdown
 - NIBIN training – unable to determine schedule far enough in advance to secure training approval
 - Suggestion to attend regional and national meeting(s) with FIS workshops/presentations (for example, NEAFS, AAFS)

CCIU

- Short-staffed
 - Additional staff needed to answer phones – temp employee from CMU is currently assisting the unit
 - Posting to backfill for two lab techs
 - Request made for 1-2 sworn members (recent promotion resulted in transfer out of unit)
- New troopers sent to ID theft training
- Current laptops may not be viable for e-payment option
- Discussions ongoing regarding funding for additional collection kits as a result of Department of Probation's required involvement in DNA collections (due to CJR Bill).

9. Security and Health and Safety Programs

General

- Injury reports
 - Confusion about when to fill out paperwork when no medical attention is needed and who are the responsible parties to sign

Safety

- New structure, meeting once per month
 - Chris Donahue – training (currently putting together online training)
 - Betsy Duval – handling QA aspects
 - Katherine West – safety log, chemical pickup, injuries
- Annual chemical inventory completed
- Quarterly committee meetings continue
- Revisions to Safety Manual will include Fentanyl potential exposure response

Security

- Camera repairs – Lan Tel very helpful, quick response
- New camera installed at front desk in Maynard with view of back door
- Katherine West added to facility security group

10. Review of Quality Control Activities

Biology

- EDI has been extremely helpful
 - Some perplexing hits – results in units stepping back and evaluating risk areas for contamination
 - Lab-wide contamination presentation well-received
- TRAE
 - XRD not yet up and running
 - Limited resources to dedicate to validation
 - Beneficial to have lab tech to help with validations and QC
 - Mini-study on effects of printing on GSR recovery
 - FIS/CSSS assisted
 - Able to present at NEAFS; also being written up as thesis for intern grad program
 - Training non-supervisors in TR/AR
 - Discussions ongoing regarding separating technical and administrative review functions due to findings in internal audit
- Criminalistics
 - KM validation almost complete
 - Will replace OT procedure
 - Safer for analysts (not carcinogenic)
 - Slightly more labor intensive preparation
 - Some delay getting equipment because of budget
 - Y-screening validation in progress
 - Procedure will be a tremendous asset to biology, especially for RSA cases
 - Challenges:
 - Multi-location – physical space makes this difficult to incorporate in all labs
 - SWGDAM requirements – will these apply to analysts performing real-time PCR procedure? If required, this will have a large impact on this project moving forward.
 - SWGDAM publication release date has been delayed
 - New GSR paper validated for use
 - Safer
 - Less waste
 - Better preservation
 - Presented at NEAFS
 - QC duties – extremely helpful to have technician
 - MVAC
 - Evaluating technology, however, to date, company will not lend to laboratory for limited testing
 - Mini study to test filters with extraction methods successful
 - Mixed reviews in forensic community
- DNA
 - STRmix
 - Anticipated online for ID early 2019

- Challenges:
 - Resources in-house
 - Community divided as to reporting verbiage
 - Upgrade in software resulted in delays
- PowerQuant
 - New quant system to be validated in-house
 - Will be validated in tandem with Y-screening
- QC duties
 - Lost technician mid-year, replacement is in background process Implementation of a new temperature monitoring system (JFactor)
 - Goal is for satellite locations to have as well
- Profile comparison tool in GMID-X software aids in checking contamination

CSSS

- Suggestion to implement checklist for review due to administrative errors
- Remind tech reviewers to take additional time to review for administrative requirements
- Moving to verifications of exclusions in future

Chemistry

- PMT/TOX validated 2 assays (Opiate and THC) – 4 additional assay validations in progress
 - Working on combining protocols between PMT and Tox
- Drug Unit
 - CAR related to QC has been effective
 - Validated one extraction procedure
- PMT Tramadol CAR in progress
- OAT continued to meet with QA to finalize protocols

11. Review of Subcontractors

- When contracting a vendor, suggestion to send letter stating they need to notify us of any lapse in accreditation. Legal counsel Kerry Collins can draft template to assist.

Biology

- Bode Technology
 - DNA not currently sending out low sperm cell samples
 - Differences in thresholds and interpretation have reduced ability to obtain suitable profiles for CODIS upload
 - Testing going well otherwise
 - Bode taking 100-150 samples per month
 - DNA satisfied with follow up and resolution of errors
 - Bode able to accommodate expedited testing requests

Chemistry

- OAT – waiting for response from Draeger regarding training for new hires
- PMT – using services of NMS labs less frequently

12. Objectives of the Management System

- Review of Overall Laboratory Goals and Objectives (comments resulting from review of listed objectives in QA Manual)
 - Validations are thorough, QC appropriate
 - Mock courts have improved
 - Help analysts to appreciate what’s involved in testimony preparation and testifying to their results
 - Suggestion to incorporate two attorneys at all times – more realistic
 - Are there continuing education/refreshers we should explore to continue to improve this?
 - Suggestion to include ECU and CMU in mock courts and training as staff in these sections can be called to testify
 - Coordinate to attend other sections’ mock courts and include new employees
 - Travel and training
 - Process is extremely cumbersome and money not evenly distributed (due to grant funding)
 - Initiative to bring in trainers has worked well
 - Biology - have put emphasis on QC as a result of audit
- Review of Status of Unit/Section Goals from 2016 Management Review

Biology

- DNA
 - Increased Mix Y reviewers by 4 and Mix STR reviewers by 4
 - Helpful but lost some progress due to attrition and transfer/promotion
 - 10-day TAT work in progress
 - Routinely 70%+ of cases are written and ready for tech review by day 7
 - Still working on getting them closed by day 10
 - Balance between assigning enough cases and getting them closed
 - Overall TAT decreased throughout year and is at lowest as of Dec 2018
 - Probabilistic Genotyping
 - Took far longer than expected
 - Feb 1 is the phase 1 roll out date
 - Reasons were discussed previously but include scope of project, change in software, resources, consensus of community of verbiage
 - Alternate workflow for rushes/priorities
 - Not fully implemented
 - Improved incorporation into normal workflows
 - LSS project may help address this
 - Evaluation of quant kit
 - Currently validating PowerQuant

- Y kit was put on hold as it was a lower priority than quant, STRmix and LR
 - Time from collection to upload
 - Have not met goal
 - Areas have been identified to improve this
 - Ongoing goal for 2019
 - Verification
 - Not consistently hitting 10-day but below 20
- TRAE
 - Limited progress with lifters
 - The type Crim chose still interfered with analysis
 - Ongoing project
 - Reached out to other trace experts for suggestions
 - XRD validation not yet completed
- Criminalistics
 - Training manual was completed in May 2017
 - Kit TAT is close to 60 days
 - Y-screening project is ongoing
 - LSS project will happen this year (grant) but have already been working on validating CW Direct and PowerQuant for use
 - Decisions as to how to incorporate in the workflow are needed
- CSRU
 - BSPA mentor program implemented
 - BPA of the week
 - Library of references
- CMU
 - FSIII retired/currently 3 scientists in CMU for case review – met goal
- ECU
 - Evidence manual revised in 2017 – met goal
 - New revisions currently in progress
 - Staff brought to full complement – met

Chemistry

- OAT
 - ANAB Accreditation - delayed
 - Train new staff – in progress
- Drugs
 - Increase and train staff – in progress
 - Decrease the rush backlog – increased due to lack of staff
 - Continue backlog reduction initiate by returning unanalyzed cases to submitting agencies
- PMT
 - Keep TAT at 30 days
 - Evaluate PMT training SOP – in progress

- Complete 4 additional validations – met goal
- Validate QTOF
- Train new staff – in progress
- Continue merging SOPs for PMT and TOX – in progress
- TOX
 - Decrease backlog - in progress
 - Decrease TAT - in progress

Quality Assurance

- Standardized authorization process
- Reviewed 5-year PT plan
- Qualtrax online – met August 2018
- OAT accreditation – application date of end of Feb 2019
- Internal audit training – provided in 2017
 - Standards have since changed
 - New training will be provided
- Implement PT policy – met goal

CCIU

- Protocols updated as planned
- 10-day TAT met

FIS

- Returning old cases/working on backlog – in progress
- Prioritizing NIBIN cases

CSSS

- Plans to update manual – not yet met
 - Training manual needs to be updated/consolidated
- Open positions filled
- Organize archive files – met but ongoing
 - Possibly having sub labs hold only one year of files, not three

Admin

- News LIMS program – in progress
- Updating MSP website – met

13. Changes in Internal and External Issues that are relevant to the laboratory

Biology

- Crime Bill
- Remodeled Lakeville in 2017

Prepared By: BLK/LMB

Reviewed By: KLS

- Improved pathway from lab to evidence storage
- Enlarged darkroom
- Enhanced capacity of ECU space
- 20% reduction in case load because of change in Boston PD SEM

Chemistry

- Drugs
 - CJ reform act – change in drug classification
 - Loss of staff
 - More sampling per case
- OAT
 - Legal decision includes requirements:
 - No BT testimony until lab files OAT accreditation application “substantially likely to succeed”
 - Still allowed in certain circumstances
 - Training on exculpatory evidence
 - Discovery protocol
 - Loss of staff
- PMT
 - Loss of staff
- Hiring Process
 - Competing for limited resources at HR with incoming RTT class

Construction

- Approximately 34 new hires coming in, phased approach
- Significant changes on second and third floors
- Some changes to first floor
- Crime Lab study with DCAM
 - PowerPoint presentation put together to present to DCAM and EOPSS to justify need for new lab or more space

14. Results of Risk Identification

- Language added to OAT QA Manual regarding risk identification:
Risk identification is achieved by following the laboratory procedures for nonconforming work, corrective action, internal audits, training and competency, proficiency testing, technical and administrative reviews of laboratory activities, testimony review, soliciting internal and external feedback, management review, preventive actions, and health and safety.

What can be improved? What is working?

- Management review items should be discussed throughout the year
- Feedback mechanisms for internal feedback are not as effective as desired
 - Anonymous feedback makes it extremely difficult to address issues

- Other mechanism(s) should be implemented
- Meeting deadlines in need of improvement
- PT
 - If there is an issue there can be a lag time to address, sometimes not until results are received from vendor (needed for grading) - process improvement needed for these important, however infrequent occurrences
- Non-conforming work
 - Some confusion within units about when to initiate forms and when they are required
 - QA to provide additional assistance with initiation of nonconformance and corrective action workflows in Qualtrax
- Suggestion to have multiple individuals in each unit with the ability to perform same task/cover for another staff. Advocate for redundancy.
- Metrics tracking down to analyst level – used to support civilian and sworn staffing needs
 - Resource requests need to be backed by data showing why resources are needed
- Adequate supervision in sections – ratio of supervisor to # of analysts is appropriate

15. New Goals, Objectives and Improvements for 2019

Biology

- Criminalistics
 - Train 6 new analysts within 6-9 months of hire
 - Bring Y-Screening online
 - Continue with intermittent practical/refresher trainings (BPA)
 - Host fluid dynamics course (budget permitting)
 - Decrease TAT in 2019, working toward 30-day TAT requirement for SAEC kits
- TRAE
 - XRD validation
 - Train unit on admin reviews – complete training of all analysts by June
 - Increase the number of tech reviewers in sub-disciplines
 - Evaluate reallocation of resources since no longer required to do BPD kits
 - Cross-train as needed
- DNA
 - Train each person up to the next level of tech reviews – December 2019
 - Fill crime bill and backlog positions for phase 1 and 2 by 4/1/19
 - Complete initial ID STRmix retro cases by December 2019
 - Restructure training program to accommodate influx of staff by 4/1/19
 - Statistics training – early April
 - LSS project – complete formal project by December, 2019
 - SWGDAM updates training – dependent on approval of new document
 - Decrease SAECK backlog to 90 days by June – 60 for all kits by end of year
 - Complete PF 6C STRmix validation by 6/1/19
 - 15 day TAT for CODIS hit verifications (consistent) by 6/1/19 and maintain this for the year

- 4-week TAT from collection of CO samples to upload
 - Currently 12 week TAT
 - 6 weeks by June; 4 weeks by December
- CSRU
 - Fully implement BPA mentorship program by 5/1/19
 - Host trainings on scene-specific topics
 - Clan lab and explosives 2/12/19
 - Looking to schedule training on DNA as it relates to crime scene evidence later in the year
 - Additional technical reviewer in BPA by summertime
- CMU
 - Hire/train new staff to regain full complement
- ECU
 - Hire/train new staff to regain full complement
 - Establish EOPSS Milford staffing needs
- GENERAL
 - Review hires within 2 weeks of closing date
 - Complete 10 spreadsheets/month for municipal backlog project
 - Update Item Analysis Policy
 - Evaluate different method for DNA recovery on discharged cartridge casings

Chemistry

- OAT accreditation in 2019
- Hire additional OAT personnel
- Increase drug staffing
- Decrease rush backlog in Drug Unit
- Continue initiative of returning unanalyzed drug cases
- Decrease PMT/OCME turnaround time
- Decrease backlog and turnaround time in TOX
- Combine PMT/TOX protocols
- Train new staff in OAT/PMT/Drug Units

Quality Assurance

- OAT - apply for accreditation by end of February
- Expand on new employee training to include additional lab-wide training topics (e.g., general forensic science and ethics)
- Evaluate the current management review process for potential areas of improvement
- Decrease time for protocol and authorization review

CSSS

- Improve efficiency of multi-unit analysis processing
- Establish dedicated trainer/training coordinator. This individual will also be involved in protocol drafting/revisions
- Replace outdated computers in phases

- Replace outdated Alternate Light Sources
- Maintain goal (as budgeted) of attending two training courses/year for new analysts and provide at least one training for current analysts
- Advocate to maintain staffing levels in the face of promotions and transfer requests

FIS

- Send new analysts to NIBIN training, provide ATF (free) Training and in-house training if possible
- Train three new employees
- Hire two new people to keep up with casework demand
- Purchase and install water tank for Danvers laboratory
- Address backlog in phases, starting with Springfield laboratory

CCIU

- Revamping workflows to integrate Board of Probation DNA collections (to include training) as required in CJR bill
- Revamp protocols as needed (see above)
- Backfill lab technicians who have left the section
- Backfill troopers who have left the section
- E-payment program implementation

Overall Lab

- Completion of JusticeTrax implementation to include training by December, 2019
- Re-evaluate process of bringing forward quality concerns for other units
- Multi-unit analysis – Incorporate appropriate deadlines for processing in all units involved in a multi-unit analysis case to ensure all analysts have adequate time to complete their assignment on time.
- Implement Expedited Analysis Request Form and update policy to streamline the processing of these requests
- Crime scene reports – goal is consistent 30-day or less TAT for all units
- FIS/CSSS/CCIU personnel to become involved with internal audits
- Decrease number of outstanding offenders to be collected (CODIS)
- Coordinate and complete lab-wide evidence inventory in 2019
- Develop additional temperature control instruction/guidance for evidence storage areas

“Outputs”

Note: Outputs include all decisions and action related to, at minimum:

- a) the effectiveness of the management system and its processes,*
- b) improvement of the laboratory activities related to the fulfillment of accreditation requirements*
- c) provision of required resources, and*
- d) any need for change.*

Note: Outputs will be added to the agenda of management meetings over the course of the year unless more appropriate for smaller group meetings.

- Comments on the effectiveness of the management system and its processes
 - Not completing tasks by established deadlines is a recurring problem. This includes completion of nonconformance forms/ workflows and corrective actions, audit remediations, protocol revision, etc. Management shall discuss measures to improve. This is also a finding in the management audit for 2018, and as such nonconformance workflows which are anticipated to head to corrective action plans are underway.
 - More frequent management meetings with specific agenda topics will improve communication between units and assist the lab with working together as a whole.
- Some suggestions for improvement of laboratory activities related to the fulfillment of accreditation requirements include the following:
 - Providing clarification on Preventive Action Requests, including assisting with determining the priority of the request, the timeline for implementation, and whether or not a protocol revision would be a more suitable resolution.
 - Providing additional instruction on the use of Qualtrax, specifically for the tasks performed by management and supervisors, to improve efficiency and minimize mistakes and delays.
 - Provide court testimony training to non-analysts who may be required to testify. This includes, but is not limited to personnel in the Evidence Control Unit and Case Management Unit.
 - Improve mechanism for personnel feedback by requiring additional information from survey respondents.
 - Improving communication at all levels, bench analysts and admin staff through management, including multi-unit communication and communication of lab policy/procedures (e.g., budget process and available funds).
- Smaller breakout meetings to be scheduled with management
 - Meeting(s) to discuss the process of creating and assigning one comprehensive crime scene proficiency test for CSRU, CSSS and FIS
 - Meeting(s) with Deputy Directors to discuss the process of conducting a lab-wide evidence inventory
 - Meeting(s) to discuss the marking of evidence. Should this continue to be done by the first analyst to process the evidence?
 - Meeting(s) to discuss the practice of sending drug packaging to CSSS for latent print processing
 - Meeting to discuss improving MSPCL internship program
 - Meeting(s) to address revisions to Item Analysis Policy and Expedited Analysis Policy
 - Meeting to discuss current PT technical review and grading practices
 - Meeting to discuss and evaluate staffing levels and resources for all sections

MSPCL Summary of Key Issues and Concerns

The primary mission of the Massachusetts State Police Crime Laboratory (MSPCL) is to provide quality forensic services to the Commonwealth. Over the last 5-7 years, the Laboratory has been significantly impacted by external factors such as the opioid epidemic, the closing of the MA Department of Public Health Laboratories and subsequent absorption of thousands of drug cases, changes in evidence retention requirements, increase of post-conviction review and testing, and the enactment of the Criminal Justice Reform Bill (CJR) of 2018. These circumstances, among others, have strained the resources of the MSPCL and its ability to effectively meet the Commonwealth's demand for forensic services. While the quality of the forensic work performed remains exceptional, the MSPCL fully recognizes with the current volume of demand, the ability to provide these services in a timely manner is challenging in certain sections. Identified factors periodically inhibiting the ability of the MSPCL to meet the Commonwealth's casework demands include:

Equipment: Prior to the CJR, the MSPCL budget had been near level –funded or reduced for approximately 4 consecutive years. As a result, funds available to replace or update equipment were below optimal and only the most critical equipment needs across the laboratory could be addressed. While the CJR provided some relief in that area, the funding associated with this bill is strictly limited to specific functions of the laboratory, leaving other sections periodically unable to repair or upgrade equipment.

Facilities: The MSPCL facilities are at or near capacity in the majority of sections, resulting in limited options for increasing physical space and/or full time employees. The MSPCL actively participated in a 2-year study to evaluate current and future facility options. Designs were proposed that would allow the Laboratory to meet the volume of casework needs of the Commonwealth. At this time, the proposals are no longer under consideration, effectively minimizing any substantial or impactful renovation possibilities within the current facilities and eliminating the possibility of a new facility.

Staffing: The MSPCL maintains detailed metrics on casework demand and section productivity and routinely employs these metrics to support staffing requests and plan for future needs. While the MSPCL has been fortunate to receive periodic increase in staff numbers, the approval for such increases has historically been a focused reaction to external factors (e.g., CJR mandates, DPH lab closing) rather than a result of proactive strategic long-term planning. While this is understandably justified in emergency situations, laboratory sections that are not experiencing an urgent need for staff increase have not consistently been granted approval to backfill for normal attrition or internal promotions. If not addressed, these unfilled positions can leave the section understaffed and at risk of delaying casework.

Summary: The MSPCL provides a unique and critical service to the Commonwealth and as such, has many unique needs as well as risks if the needs are not met. As the forensic field continues to evolve globally, it is inevitable that demand for forensic services in the Commonwealth will continue to expand. As such, it is imperative that the MSPCL is provided a consistent and effective avenue to proactively advocate for necessary resources, and meaningful consideration is given to the MSPCL's strategic plans for sufficient and balanced allocation of resources.
