## eHealth for Health

## European MS strategic trends & initiatives

Michèle THONNET, PhD
Ministry of Health, Paris, France
eHealth Network member
EU IOP eHealth Roadmap chair

MINISTÈRE DU TRAVAIL, DE L'EMPLOI ET DE LA SANTÉ

EU eHealth Gov Initiative Mainstream chair

# Reforming the H system: a necessity

- Demographic changes : ageing population
- increased prevalence of chronic diseases
- citizen expectations for high Q HC
- increasing costs of research, equipments, examinations, treatment
- quicker pandemia expansion
- lack of staff & shortage of HP
- mobility of citizens, patients, HCP, workers
- mastering costs : crisis & 'business' model

## Healthcare

## A complex socio-technical specialised System of systems

where goods are alive and unpredictable

# (new) Role of the public authorities

- Co-Organise the concertation between actors
- Propose a vision reflecting the very diverse citizens demands or needs and educate people (C,P, HC)
- Co-design a framework in order to protect (public) goods and promote (public) health
- Sustain the HC system
  - Coordinate the policies, instruments, incentives
     to help the design-deployment-usage-adoption
     of adequate- affordable -scalable -evolving « solutions »

### France

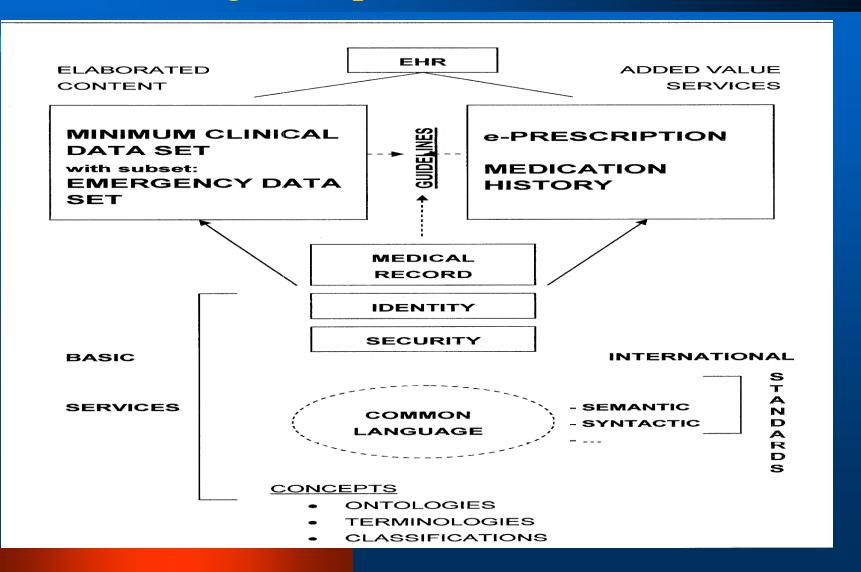

- 1996 Health ICT law
  - Infrastructure
  - Secure access to data for HP
- 2002 patient data
- 2004 certification of websites
- 2008 ePHR
  - IOP framework
- 2010 telemedicine

## FR-EU co-operation: Health in the EU Treaty

- HEALTH is a national prerogative
  - subsidiarity is key
  - but challenges are the same in each M.S.
- what could be done at EU level :
  - a volontarist collaboration between countries
  - supported by the European Commission
  - confirmed by the « eHAP » & « mobility » Dir.
  - design through a dedicated initiative
  - declined on pragmatic priorities

### eHR Modelling: an input for collaboration (2007)

### epSOS: From Strategies to Services

# Provide concrete cross border services that ensure safe, secure and efficient medical treatment for citizens when travelling across Europe

- Focus on services close to the patient:
  - Patient Summary for EU Citizens
    - Occasional Visit
    - Regular Visit
  - ePrescribing for EU Citizens
    - Medication ePrescription
    - Medication eDispensation
- Build on existing National eHealth Projects and use experiences and knowledge from all Member States
- Europe-USA cooperation ... on going ?

AN EU eHEALTH INTEROPERABILITY ROADMAP

What: possible future actions at EU level

For what:

To accelerate eHealth deployment

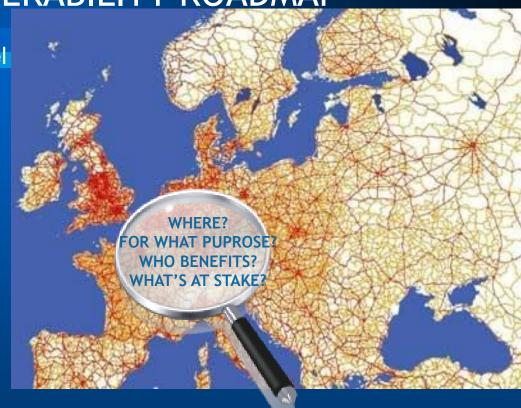

Who: Health care community

**How**: Use Cases, alternatives, maturity and opportunities, building on what is shown to work

2010 Barcelona launch

2011 Budapest process valid

2012 Copenhaguen 1st result (eID)

A proposal for a common EU Roadmap for eHealth

## Collaborative evolving process

### **Political priorities**

Stakeholder priorities

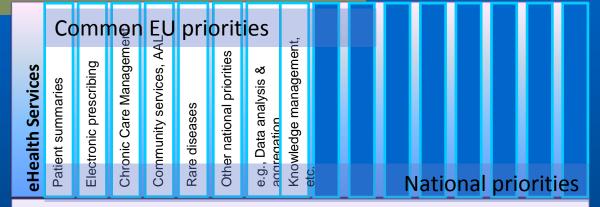

2<sup>nd</sup>stop Budapest, Mai 2011

Agreement and validation of the Roadmap by the MoH-Secretaries of State

Reaching agreements through continuous bench-learning loop across concerned actors

# Adoption of a common working model

# Sustainable Healthcare Sharing Information and Knowledge for Better Health

EU & National Stakeholder collaboration

Privacy, quality and safety policies

Legislative and regulatory framework

Fostering standards adoption

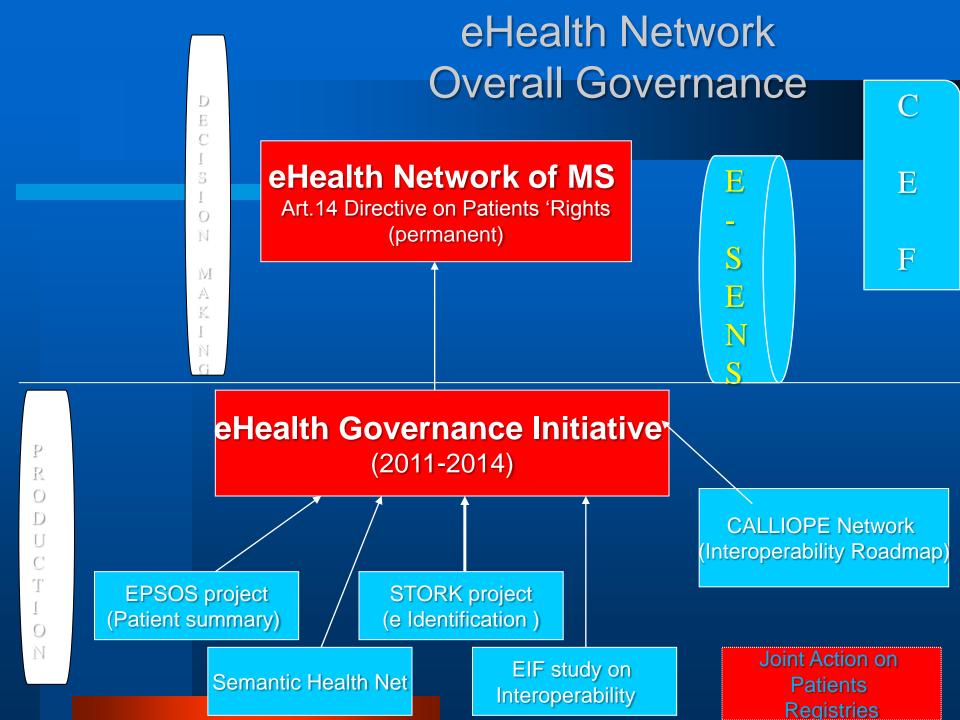

Market development, new business models, and

Financing, Resource allocation and reimbursement

Monitoring, evaluation

## [European] eHealth Governance levels

- Policy level: to set out higher level political objectives, define common priorities and policy measures
- Strategic level: to agree on concrete strategies for developing and implementing integrated, value adding eHealth services Establishment and maintenance of an open platform for multi-stakeholder trusted dialogue
- Operational level: deeper focus in areas such as ethics, security policies and services, EU infostructure, re-engineering of the standardisation process, maintaining links to national stakeholder groups, etc.
